—County Clerk Blewett completed the work of making copies of the records in irrigation matters which were filed prior to the passage of the new law and sent them down to the state board of irrigation the last of the week. There were sixty-one claims filed. Since the new law was passed a large number of applications have been made, but those go direct to the state board.

—From the reports from different parts of the county it is learned that the acreage of grain put in this year is considerably less than that of former years. Some are giving their attention to smaller fields which they will irrigate, some did not have the seed and some have moved away. It may be that the increased acreage under ditch, and the better farming that will come will bring the aggregate yield up to that of former

**LATE LITERARY NEWS.**

**Rudyard Kipling to Revisit India.**

Much interest will be felt by the public in the return of Rudyard Kipling to India. He has just agreed to furnish a regular contribution to The Cosmopolitan magazine for the coming year, beginning his work upon his return to India. India has never been critically considered by such a pen as Kipling's, and what he will write for the Cosmopolitan will attract the widest attention, both here and in England.

Perhaps the most beautiful series of pictures ever presented of the Rocky mountains will be found in a collection of fourteen original paintings, executed by Thomas Moran for the May Cosmopolitan. To those who have been in the Rockies, this issue of the Cosmopolitan will be a souvenir worthy of preservation. This number contains fifty-two original drawings by Thomas Moran, Oliver Herford, Dan Beard, H. M. Eaton, F. G. Atwood, F. O. Small, F. Lix, J. H. Dolph, and Rosina Emmet Sherwood, besides six reproductions of famous recent works of art, and forty other interesting illustrations—ninety-eight in all. Though the Cosmopolitan sells for but fifteen cents, probably no magazine in the world will present for May so great a number of illustrations specially designed for its pages by famous illustrators. The fiction in this number is by F. Hopkinson Smith, Gustav Kobbe, W. Clark Russell, Edgar W. Nye, and T. C. Crawford.

**A Successful Strike Arbitration.**

The first of May, 1895, is a date of some significance in New York City. It marks the introduction of the eight-hour day among the electrical workers engaged in the building trades. This fact by itself might mean little to those not directly concerned, were it not for the accompanying conditions. The strike undertaken by the men to secure the eight-hour concession called out 10,000 builders, and at one time seriously threatened all the important building operations of the season in and about New York city. It is not the strike itself, however, to which we care to call attention (though it may be worthy of note that in a contest of this kind lasting a month not one act of violence is known to have occurred), but the manner of its ending. Late in March a conference was held at the residence of Bishop Potter, who is chairman of the Council of Conciliation and Mediation, and through the efforts of the council, represented in this instance by its chairman and by Prof. Felix Adler, a satisfactory agreement was soon reached between the master builders and contractors and the delegates of the unions. Committees of the contending parties had conferred together repeatedly without success, but it was found that the moment a mediating agency could be employed in which both sides had implicit confidence the differences were reduced to a minimum. The incident suggests the importance of the service which such boards of conciliation seem destined to render in the near future, as their merits become better known to both employers and employed. The result of the council's kindly intervention in the building trades dispute is a useful object-lesson in the advantages of the peaceful settlement of all labor difficulties. The general situation in and about New York City this spring has been greatly improved by the practical and timely efforts of Bishop Potter and his associates.—From "The Progress of the World," May Review of Reviews.

**Blood Poison**

THE BANE OF HUMAN LIFE,  
Driven Out of the System by the Use of

**Ayer's Sarsaparilla**

"For five years, I was a great sufferer from a most persistent blood disease, none of the various medicines I took being of any help whatever. Hoping that change of climate would benefit me, I went to Cuba, to Florida, and then to Saratoga Springs, where I remained some time drinking the waters. But all was no use. At last, being advised by several friends to try Ayer's Sarsaparilla, I began taking it, and very soon favorable results were manifested. Today I consider myself a perfectly healthy man, with a good appetite and not the least trace of my former complaint. To all my friends, and especially young men, I myself, I recommend Ayer's Sarsaparilla, if in need of a reliable, blood-purifier."—J. A. B. CHASE, proprietor, Hotel Victoria, Key West, Fla. Price per bottle, 25c. Sold by all druggists.
