Food, when it sours on the stomach, becomes unwholesome. It poisons the blood, and both mind and body suffer in consequence. What is needed to restore perfect digestion is a dose or two of Ayer's Pills. They never fail to relieve.

It is a great mistake to suppose that a simple tonic gives strength; it only stimulates the stomach to renewed action. To impart real strength, the blood must be purified and enriched, and this can only be done by such a standard alternative as Ayer's Sarsaparilla.

Judge Wilson, in addition to looking after the honors and emoluments of his office has planted over twenty acres of potatoes. With a reasonable yield from that acreage the Judge and his family need have no fear of starvation next winter.

C. S. CRANE, General Passenger and Ticket Agent, St. Louis, Mo.

The past week has demonstrated the fact that it can rain in Sioux county. The latter part of last week local showers visited most parts of the county and wet things up pretty well. Then on Tuesday it began to rain and has not got through yet and to judge from the appearances it may continue for an indefinite time. The result will be that good grass is assured, while the crops of all kinds have excellent prospects. If one good rain will come in June and one in July, Sioux county will show up the biggest crop in its history.

A party of emigrants came along the first of the week and camped for the night just west of town. They hopped four of their horses and turned the whole bunch loose. Next morning the animals were not to be found in the vicinity of the camp. A saddle horse was procured and a search made and the horses finally found at the ranch of R. F. Neece, on Running Water, about twenty-five miles from where they started.

The editor of THE JOURNAL has been watching the working of the irrigation interests in the various parts of the county and surrounding territory. Some interesting facts can be learned if a person takes the trouble to investigate the conditions. It is admitted by all who live along the Running Water that the precipitation this season, until the recent rains came, has been much less than common. It is also a fact that a great deal more water has been diverted for irrigating purposes this season than at any time in the past, yet parties living on the stream in Dawes county inform us that the volume of water flowing in the channel this season is considerably in excess of that of former years. Just what should cause such a condition is not known, but the generally accepted theory seems to be that the water having been put on the land from the ditches, gradually works its way back to the bed of the stream and increases the volume of water in the channel, whereas, had it not been diverted by the ditches it would have gone down the stream with a rush and done no one any good. THE JOURNAL would be glad to receive information from parties who know of anything of interest on this subject in connection with any of the streams of the county.

What Ails the Horse Market.

A prominent electric company has collected some startling figures, which show the almost incalculable influence of the introduction of the electric car, taken merely on its one basis of replacing the horse for traction purposes. It is estimated that electric cars have already displaced 1,100,000 horses, and this estimate is manifestly far below the actual number. The feeding of these horses would entail the consumption of 508,000 bushels of corn or oats a day. The animals are now back on grass, and the enormous decrease in corn and oats consumption caused by their withdrawal is sufficient to appreciably affect the prices of these grains. There is another view of this subject, the significance of which will be probably more apparent a few years hence than it is even now. The loss of commercial demand for these coarse grains in the cities means an enormous decrease in the tonnage of the railroad freight traffic. This failure is already put at a minimum of 250,000 car loads. But it is not only in public traffic that the day of the horse is waning. In some cities the electric car lines have been so judiciously distributed, and give such excellent service, that many private families have given up their carriages and use the electric car instead. In many places the business of livery men is practically ruined by the electric car, and, as at Niagara Falls, the formerly arrogant and extortionate hackman has become a comparatively civil and tempering individual. The electric car and the bicycle have sounded the knell of the horse as a commercial factor.—Seward Reporter.

It May do as Much for You.

Mr. Fred Miller, of Irving, Ill., writes that he had a severe kidney trouble for many years, with severe pains in his back and also that his bladder was affected. Electric Bitters is especially adapted to cure all kidney and liver troubles and often gives almost instant relief. One trial will prove our statement. Price only 50c. for large bottle. Largest Circulation in Nebraska.

It isn't much wonder that the State Journal now has the largest circulation in Nebraska. It has reduced its price to 65 cents a month with Sunday, or 50 cents without Sunday; it has been spending more money for Nebraska than any other paper; it has on its staff such men as Bixby, Walt Mason and Amin. The Journal is being pushed at every point and is climbing steadily and surely away ahead of the other state dailies. People like a Lincoln paper. Especially when it is as good as the Journal.

50 Cents to January 1, 1896.

That is an awful little bit of money for a twice-a-week paper like the Semi-Weekly Journal, but if you will send 50 cents you will receive that paper until January 1, 1896. You will find it the farmer's daily. Markets alone are worth more money than that. If you take it the rest of this year for 50 cents you will want to keep it always. If you get up a club of five 50-cent subscribers you can have a copy free for your trouble. Address, Nebraska State Journal, Lincoln, Neb.
