 STIFFNESS,**
 and the like,

ST. JACOBS OIL
 WIPES OUT
 Promptly and Effectually.

Timely Warning.

The great success of the chocolate preparations of the house of Walter Baker & Co. (established in 1780) has led to the placing on the market many misleading and unscrupulous imitations of their name, labels, and wrappers. Walter Baker & Co. are the oldest and largest manufacturers of pure and high-grade Cocos and Chocolates on this continent. No chemicals are used in their manufactures. Consumers should ask for, and be sure that they get, the genuine Walter Baker & Co.'s goods.

Beecham's pills are for biliousness, sick headache, dizziness, dyspepsia, bad taste in the mouth, heartburn, torpid liver, foul breath, sallow skin, coated tongue, pimples, loss of appetite, etc., when caused by constipation; and constipation is the most frequent cause of all of them.

One of the most important things for everybody to learn is that constipation causes more than half the sickness in the world, especially of women; and it can all be prevented. Go by the book, free at your druggist's, or write B. F. Allen Co., 165 Canal St., New York. Pills, 10c and 25c a box.

The Greatest Medical Discovery of the Age.

KENNEDY'S MEDICAL DISCOVERY.

DONALD KENNEDY, OF ROXBURY, MASS., Has discovered in one of our common pasture weeds a remedy that cures every kind of Humor, from the worst Scrofula down to a common Pimple. He has tried it in over eleven hundred cases, and never failed except in two cases (both thunder humor). He has now in his possession over two hundred certificates of its value, all within twenty miles of Boston. Send postal card for book.

A benefit is always experienced from the first bottle, and a perfect cure is warranted when the right quantity is taken. When the lungs are affected it causes shooting pains, like needles passing through them; the same with the Liver of Bowels. This is caused by the ducts being stopped, and always disappears in a week after taking it. Read the label. If the stomach is foul or bilious it will cause squeamish feelings at first. No change of diet ever necessary. Eat the best you can get, and enough of it. Dose, one tablespoonful in water at bedtime. Sold by all Druggists.

World's Fair! HIGHEST AWARD.
IMPERIAL GRANUM
 Is unquestionably a most valuable FOOD in the sick room, where either little one or adult needs delicate, nourishing diet!!
 Sold by DRUGGISTS EVERYWHERE!
 John Carle & Sons, New York.

AYER'S SARSAPARILLA
 It cured these two.
 "My sister was afflicted with a severe case of scrofula. Our doctor recommended Ayer's Sarsaparilla as being the best blood-purifier within his experience. We gave her this medicine, and a complete cure was the result."—Wm. O. JENNINGS, Downsville, Neb.
 "Afflicted for seven years, with what appeared to be a cancer in the face, other treatment being of no benefit, I tried Ayer's Sarsaparilla. The result is that in one year, all trace of cancer has been removed."—Mrs. JOSEPH B. RIVKINS, Manchester, N. H.
IT WILL CURE YOU TOO.

More Horse Sense.
 You'll find the horse. If you'll inquire, In favor of A broader tire.

Road Work by Convicts in Hawaii.
 There is no doubt whatever of the practical value of employing convict labor on the public highways—wherever it has been tried it has proved highly successful.

In the Hawaiian Islands, for instance, the road work is done entirely by the convicts, and the result is that the little republic away off in the Pacific Ocean can boast of far better roads than the United States.

During over a year's stay in the islands I had an excellent opportunity to watch the working of this system, and in several hundred miles of wheeling never came across an unridable road.

The Hawaiian convicts themselves told me they preferred road work to any form of punishment, as it gave them a chance to be out in the free air and occasionally see their friends.

From the Honolulu prison, gangs are constantly being sent out to the other islands to open up new roads and keep the old ones in good repair. The majority of the prisoners taken in the recent revolution are employed in this way. No trouble has ever been caused by the prisoners during the many years the system has been in operation.

In various South American countries also the convict system has proved highly successful. Why should not the system then be tried in the United States, where good roads are so badly needed?—R. Percy Grandall, U. S. Navy.

Fully Qualified.
 Harper's Magazine published, more than twenty-five years ago, an amusing story of the ineffectual efforts made by a young man to escape from serving on a jury.

When I was a young man, I spent several years at the South, residing for a while at Port Hudson, on the Mississippi river. A great deal of litigation was going on there, and it was not always easy to obtain juries. One day I was summoned to act in that capacity, and repaired to court to get excused.

On my name being called, I informed the judge that I was not a freholder, and therefore not qualified to serve.

"Where do you reside?" inquired the judge.
 "I am stopping for the time being at Port Hudson."
 "You board at the hotel, I presume?"
 "I take my meals there, but have rooms in another part of the town."
 "So you keep bachelor's hall?"
 "Yes, sir."

"How long have you lived in that manner?"
 "About six months."
 "I think you are qualified," gravely remarked the judge. "I have never known a man to keep bachelor's hall for the length of time you name without having dirt enough in his room to make him a freholder! The court does not excuse you."

He Credits Everything.
 The Sedalia Bazaar is a newspaper which really exists, says Moses P. Handy in the Chicago Times-Herald, although many people doubt it, just as many people used to doubt whether there was really any such place as Oshkosh or Kalamazoo. Sedalia is a flourishing town in Missouri, and the Bazaar is a good paper published there by Col. Goodwin, a unique type of Southwesterner. A few years ago, at a dinner of the American Newspaper Publishers' Association in New York, Col. Goodwin followed Charles A. Dana in the speech making. He said: "I am mighty glad to meet Mr. Dana and hear him talk. I admire him and his paper very much, but have always had a grudge against them both. One day the Sun had an editorial on 'Plural Wives,' which seemed to me to be a pretty good thing. So being short of editorial matter that day I just scissored it and slapped it into the Bazaar. During the next few days I had to barricade my office and keep my revolver out of the

drawer. There was a constant procession of indignation men who called me to account for making personal reflection on them. I had to come out the next week and explain that the article was from the Sun, and was only aimed at Mormons. That taught me a lesson. Now I always credit everything I take from other papers—especially what is likely to hurt anybody's feelings."

WHEEL-TIRE PHILOSOPHY.—Scene on country road, showing deep ruts and disastrous effects of narrow tires.

The Stopping of Fast Trains.
 When railway roadbeds have been made as nearly perfect as possible, and as far as practicable, leveled, and when the best types of locomotives and cars have been devised, how fast will steam be able to carry us? An answer to this question, based on a scientific examination of the conditions involved, is furnished by Mr. Theodore N. Ely, an authority on facts relating to rail ways. One hundred miles an hour is about the limit of speed suggested by him.

Another very important question growing out of the first is: Within what distance can a train running 100 miles an hour, or but little less than 150 feet in a second, be stopped? The reply is that under the most favorable circumstances, a distance of nearly half a mile would be required.

A train running a mile a minute can be stopped, it is estimated, within a distance of 100 feet. By adding only two-thirds to the speed, therefore, the distance required for bringing the train to a standstill would be increased almost three times. It is evident that when we are whirled across the country at the rate of a hundred miles an hour, "a clear track" will become a far more important thing even than it is to-day.

A Philadelphia Mustache.
 "I've seen some peculiar whiskers in my day," remarked a 9th street barber the other day, "but there was a fellow in here who simply beat the deck for mustaches. They were of the long, flowing kind, and when in repose hung gracefully down over his shirt front. After I had finished shaving him he asked me to dress his mustache, giving me my instructions how to do it. First I gave it a brilliantine-bath and combed it out. Then I waxed it until the points stood out on each side of his face like bayonets. He seemed very proud of it, and didn't object when I asked him if I might measure it. In fact, he seemed rather pleased. I took a tape-line and found that from tip to tip that marvelous mustache measured a trifle over twenty-three inches. He next asked me to curl it. This was a difficult operation, but, after exhausting several curling irons, I succeeded in heating a section of gas pipe to the proper temperature and finished the job."—Philadelphia Record.

Trouble from Lack of Thought.
 "You would be surprised at the frequent unnecessary accounts of missing persons that we are compelled to register," said Detective Allmendinger. "If a woman misses her child for a few minutes, without taking the trouble to look around the neighborhood for it, she rushes up here to me and registers the case. We no sooner have it telegraphed throughout the city than she returns and says the little one was in a neighbor's house, or makes some similar statement. They little realize the trouble we are put to, for we have to send word throughout the city that the lost one has been found."—Philadelphia Call.

Change of Ideas.
 It is curious to note how the progress of knowledge causes the medical profession to change its opinions. It has always been thought that the use of new bread is most unhealthy, a doctrine which is religiously believed in and acted upon in most households. But a Russian doctor now asserts that new bread is far more beneficial to the consumer than that which has been out and exposed to the air, and has had time to gather the numerous germs which find in the material a nutrient medium. The heat of the oven is destructive to these germs, and hence new bread is found to be perfectly free from them.

His Dog's Name.
 A boy's fishing pole was fastened to the foot of a tree on the river bank, and he was sitting in the sun playing with his dog, idling the time away, as he had been fishing all day and caught nothing.

"Fishing?" inquired the man passing.
 "Yes," answered the boy.
 "Nice dog you have there; what is his name?"
 "Fish."
 "Fish? That's a queer name for a dog. What do you call him that for?"
 "Cause he won't bite."
 Then the man proceeded on his way.—Erie Messenger.

In 1880 the approximate wealth of the country was \$43,642,000,000, an average of \$870 to each individual.

Highest of all in Leavening Power.—Latest U. S. Govt Report
Royal Baking Powder
ABSOLUTELY PURE

Couldn't Endure the Profanity.
 George Green, the mayor of Leicester, England, in answer to an invitation to attend a local athletic gathering, has sent a letter as follows to the secretary of a certain club: "Town Hall, Leicester. Dear Sir: I do not feel disposed to attend any football sports until the managers of such things can purge, by enforcing strict regulations, the players and even the circles of the use of oaths and foul words. Now would I think of the mayors being degraded by hearing such language as is too often heard at the sport."

A Little Hard on Papa.
 "Don't you think the baby looks like me, dear?" asked the proud father.
 "Y-e-e-s," replied the mother, cautiously, "when it's getting ready to cry."
 —Washington Star.

THAT JOYFUL FEELING
 With that exhilarating sense of renewed health and strength and internal cleanliness, which follows the use of Syrup of Figs, is unknown to the few who have not progressed beyond the old time medicines and the cheap substitutes sometimes offered but never accepted by the well-informed.

George Moore is one of the most modest of contemporary writers. He writes not think that everything he has written is great. After finishing "Mike Fletcher," however, he wrote, "At last I have written a really great book."

John Norton, who is 93 years old, has lived all his life in his house near Conouance Lake, Connecticut, and although he has been in sight of both the Northampton Division of the Connecticut and of the New England railroad, he never rode in a car of any kind until recently.

Fully 23,000 persons annually visit the birthplace of Shakespeare. About one-fourth of them are Americans.

Prof. Schmoller, a favorite with many American students at the University of Berlin, is mentioned as the probable successor of the late Heinrich von Sybel as the head of the bureau in charge of the Prussian state archives.

Mary E. Wilkins is in luck. She's not only the leading novelist in New England, but has won a \$2,000 prize for her best short detective story—a new field for her—with Mr. Chamberlin, of the Boston Transcript, as collaborator.

The Salina, Kas., girl who telegraphed invitations to her wedding knows what to do with a bird in the hand when she gets him.

Shells for Road Making.
 A lighter load of snail shells from Mr. Curtis, of Eustis, was received yesterday by the city engineer, and will be used to pave a portion of Main street, on top of the Alachua rock pavement as an experiment. The shells were presented to the city by Mr. Curtis. If this thing keeps on, the entire Alachua rock pavement will soon be covered with different samples of paving material at no cost to the city. The shells from Eustis are snail shells and are said to make an excellent driveway.

Ivory paper is a paper which is considered in many particulars superior to ivory itself. It is peculiarly adapted for the most delicate kind of pencil drawing.

One of the most striking of the experiments in a recent lecture before the Royal Institute of Great Britain showed a frozen soap bubble floating on liquid air.

Dr. Burggrave, professor of medicine in the university of Ghent, is eighty-nine years old and actively practices his profession. He smokes and drinks liquor, but uses medicine sparingly.

In each wing of the ostrich twenty-six inches long, white plumes grow to maturity in eight months. In the male these are pure white, while those in the female shade to ecru or gray. The short feathers are plucked for tips and each wing furnishes seventy-five of these.

Nerves and Blood

Are inseparably connected. The former depend simply, solely, solidly upon the latter. If it is pure they are properly fed and there is no "nervousness." If it is impure they are fed on refuse and the horrors of nervous prostration result. Feed the nerves on pure blood. Make pure blood and keep it pure by taking
