—The storm Tuesday of this week which turned from a heavy rain and hail and then in the evening to a blinding snow and blizzard, urged us badly west of Harrison, but Tuesday's west bound train could get no farther than Rock, the next station west of here, turning around and returning in the evening, the road west of Lusk being snow-blocked and the wires being down so communication could be had from the west. The snow-plow passed through Harrison near mid-night Tuesday for the west end of the road, clearing out the cuts as it went. In the morning another train from Laramie, plowing up the section means they went along to clear out bad drifts and to put the track in shape for business as soon as possible again. Superintendent Harris was along with the section boys and will help them to get the blockade lifted, which will probably be about twenty-four hours unless another severe storm should follow this up very soon.

You see boys, you can't most always tell.

—One of the heaviest snow and hail storms visited this section of the country last Tuesday that has been known here for a long time at the season of the year. The snow continued about 9 o'clock Monday evening, and rained almost continually, ending with heavy rain and then turning into snow and getting cold up to Wednesday morning. At a rough estimate, at least two inches or more of water followed the storm. The ground, for this season of the year, we say the old residents say the best condition for raising a crop ever known.

—There is liable to be some trouble in getting what water will be needed for the town for a few days until engineer Hamlin can tell out the piping under which, in some way broke loose with about twenty feet of taking and dropped to the bottom of the well where they have not been able at this time to get it out. If, however, Mr. Hamlin does not succeed in getting it dry before the portion of the well he will be obliged to send away for a new one, which will take him at least, perhaps longer before the well will be in shape for pumping again. Laramie—Mr. Hamlin will have the pipes in running order in a couple of days.
