CARRISON. . . NEBRASEA

her time on a handsome man.

A woman will forgive a man any thing except his refusal to ask forgiveness.

Some of the new millionaires seem their elbows.

The fall of water in New York City recently was the heaviest ever known except in Wall street.

As far as some of our eminent United States Senators are concerned, it meens to be merely a case of second. bushood.

Lowie says he never klosed a womthe presence of their wives.

Over in Canada there is still some talk about secession. Canada evidently dury and revision of the tariff system believes in crying over the spilled milk as long as there is a spot on the car-

H. B. Marristt Watson, the English novelist, says American women are degenerates. But he has had a chance-Englishmen.

Eather Hagerly advises every young woman to drop her lover if he doesn't hold a union card. Might not a murriage license be liberally construed as filling the bill?

Was might merely remind Russla that it is not the number nor the size of the ships that count in a naval struggle but the way they are managed much the number of shots that hit the muric.

commed howelf to during pretty vizore sy with month's when it came

An American syndicate is buying Popo stop il, and on the hastallment plan at that, in order to market the sulphur depod s. This commercializado a of one of the wind's greatest volcances suggests that nothing in nature, been taken up by individuals, who is oo big to as upe our propensity for doubtless will achieve the success that jel lus

States will resolve to let Morgan and of the Canadian Pacific have almost School and Keene and Rockefeller buy and sell stocks entirely with each other the power of stock gambling to in use the people will be emisculated. There is but one way for the ordinary from to 1 o d for his future. That it is a work and to invest his savings in some form that he can see f r hims I' is stable.

The number of women now employed in bus ness and confidential posithat which offer opportunities to distors go down in ruinous heap. When hen sty is very great, but it is rarely a woman's life is saved by her corset the any embezziem nt, defalcation or breach of trust is committed by them. by the absence among women of many of the temptations to which men so often las themse ves open, and also in great measure by that sensitiveness as to reputation which is more acute smoone women than among men.

One of the precious few gifts whose al are will forever remain unknown is the SEO Of which a gentleman handcd to the late Mr. Hewitt one day. le ling him to give it to the Cooper ton int never reveal the name of the giver. Mr. Hewitt accepted the gir with the conditions attached and it ded without revealing the secret. I the annual meeting of the Union ther day it came out that none of resent trustees knows or suspects nine of the donor. And they will to Try to End out.

our of the States of the Union has ce liked that its Legislature shall meet. This is one of the most terrible disaswalls once in four years, and that even the 1's proceedings shall be strictly resimined to extremely short sessions. by various parts of the republic the en in eat against annual meetings of th Solons of the capitols and against ir longed d Eberations and discussions wh n the sages do assemble is evicently gaining ground. The belief that carlier generations have been legislated for to excess, and that there has been too much talking through weary mouths in Statehouses is stendily making headway.

The ultimate upon which all rests is the average. This fixes the place of a nation-rather than sporadic gentus. Average intellect, average virtuesthese make national character. While this is sound, the nation prospers; when it decays the nation dies and a multitude of geniuses cannot save it from destruction. It is unwise to dwell too much upon cases of great wronging. They are so executional that they prove nothing. Numerous as they are, they are too few to justify a genevaluation. The average is sound. That is the important fact which should control all thinking on the subject of nutle nal condition

The automobile is not sending "Dob ola" to the honeyard. Contrary to preps. It has not driven the h at of business. If he is turned adrift ele out an ancertain livelibe e Canadian thistles and mullgrow along the highways it is be-

cause he is not uld buil decrenit for ervice and not because the automobile; has destrayed his u-efulness. The automobile, indeed, has not even affect ed the horse market. The demand for good borses all over the country is as great as it was before the automobile came into use, and the prices are as-A sensible woman seldom wastes high. All this is shown by reports from 325 cities in the United States. collated and embedied in a report to the mational convention of Master Horseshoers in St. Paul. According to this report, the figures from each city show the usual normal increase in the use of bors a and that the demand for to have got ahead by thinking with them is constant and without fluctuations. While there is little doubt that the perfection of a cheap and durable storage battery, suitable for all forms of trucking, would displace many horses in the larger cities, greatly simplliying the problem of street cleaning it is hardly probable that this would have an approximate effect upon the general demand for horses, or that it would discourage in any degree the breeding of high-priced hors flesh an outside of his own family. A good The gos line burgy is doubtless here many uses make remarks like that in to stay, but so is the horse-at least for many years to come. All the talk about the Alaskan boun

of England and her colonies, and Camudien independence and Canadian annexistion, increases the interest of the American people in their neighbors on the north. And it does not take more than half an eye to discern a marked similarity between the development of to study only those who have married | cannot and the history of the development of the United States, or to foresee a period of remarkable and lang-drawn-out prosperity for Great It italn's empire colony, from the rugged banks of Newfoundland even to the farthest stretches of the Portland Canal The history of Canadian progress will, for the period of a quarter of a century, at least, revolve about the great transcontinental railroad that is opening up the Western reaches. just as the Union Pacific opened new nations to add bright stars to Columbin's diadem. The extent of the im-Alexum Sart ris. General Grant's migration of the home and fortune gram's in wants to go over and nanex seekers into Western Canada can be Can da to the United States. Alzy's understood better by the statistics of g and father was a man who generally the Caundian Pacific Railroad, which sold last year upward of 2,500,000 acres of land, at an average of about \$4 an acre. Three years ago its sales fell short of 400,000 acres, but the year following they increased to nearly 1,600,000 acres, which averaged about \$3 an acre. So in three years 4,500, 000 good, rich acres of the West have came open-handed to the early settlers of our Western plains and mountains. if he common people of the United Within five years the gross receipts doubled, a slight earnest of the business that is bound to come when the doughty ploneers begin to reap their golden harvests.

Every little while some woman's life is saved by her corset. Either the bullet strikes one of the steel ribs and glances off or the deadly blade which the villain aimed at her heart is stopped by the tough fabric of the corset, and thus the arguments of the doc new courage and draws the strings a This is perhaps to be explained largely little tighter. If the family doctor chides her because of the smallnest of her waist she shows him the dispatch from Schenectady, or Scranton, or wherever the fortunate girl with the corset lived, and he knows that it is useless to reason with her. He can theorize concerning the harmful effects of corset wearing, but a yard of theory is quickly demolished by an inch of fact. At last, however, the doctor is to be furnished with a solid steel fact to fash in the face of the woman who insists that the corset is a life-server. When Mrs. William Halliday died at Buffalo a post-morte-a examination was made, and the doc tors found two pieces of corset steel in her flesh. One of these pieces had penetrated ber heart. It is supposed that while very tightly laced she must have best her body or been struck by something, so that the steel ribs broke and jamued themselves into her side ters on record, and the doctors must not neglect to put it to good use as an awful warning. There isn't the slight est probability that the unfortunate case of Mrs. Halliday, of Buffalo, will cause any woman to quit wearing corsets, but as long as the doctors must argue on the subject it is fortunate that they may at last back themselved up with something more than theory

George Repeats Himself. "And you told George he must spena to your father?"

"I know what he said." "How do you know?"

"Well, George isn't original." "What difference does that make?" "Of course, he said the same thing he said when-there, don't get mad.
