The Presbyterian general assembly urged ministers to take an advanced position on the temperance question and also impressed on them the propriety of their denying themselves tobacco.

On high grounds, this is commendable action while the use of tobacco is not open to the same moral objections as the use of liquid stimulants still the difference is one of degree only. As we have often said before people can be intemperate in drinking tea or coffee or even in eating or in dressing for that matter all such things are dissipation and the principle in all is the same. Many hygienists hold that the highly-seasoned and stimulating diet that so many children are brought up on makes them crave the stronger stimulation of tobacco and intoxicating later on. All people occupying places of authority in our communities are under obligations to live temperately, not alone in regard to the use of liquor but also to indulge in other habits of a demoralizing tendency. It is not enough to preach we must demonstrate our faith in practice.—Pathfinder.
