Farm Loans. Read This.

I am in the farm loan business and am making quite a success of it for various reasons. I have the very lowest rate of interest going and by all odds the best option offered. There is no delay in closing a loan, as it is practically closed the moment the application is made. I have certain advantages that enable me to save many of you from \$20 to \$30 in negotiating the loan. You get the entire face of the loan, as no portion of it is held out in advance.

SAMPLE OF CHINESE 'JUSTICE'

Possibly a Little of This Might Wake Up Some Town Authorities in America.

It appears that when one has lived in China for some time and studied its institutions the one thought that strikes him is the feeling of responsibility that pervades every phase of Chinese life.

Two men were gambling in an obscure part of one town, in a room hidden away from observation. A dispute arose over the game; it ended in a fight, and one of them got a fatal stab.

With that he was thrown upon his back and a couple of sturdy lieters, who had been looking at him with angry and expectant eyes, proceeded to administer with their bamboos a lesson in the art of ruling a ward that would keep him in a recumbent position for at least a week to come.—Exchange.

DANCE IS PART OF CEREMONY

Norwegian Wedding Would Not Be Complete Without the Merriment That Custom Has Prescribed.

There is nothing Norwegians love as they love dancing. At a wedding celebration three generations often dance together, and the bridegroom dances with each of his bachelor friends.

When this is all over, the bridegroom stands quietly among the married men, while the bride "dances off her crown." She is blindfolded, and after a time lifts the crown from her head and places it upon the head of any maiden she can contrive to reach and securely crown. The girl thus selected steps into the center of a ring formed by the celebrators, who sing: "She will be married next; she will be married next."—Detroit News.

Fish Uses Fins as Feet.

A walking fish inhabits some of the small streams of St. Thomas Island.

The head is somewhat like that of the ordinary freshwater sucker, with a round, full-tipped mouth and no teeth. Just back of the head, on either side, is a large, well-developed fin, armed with a strong bony spine. The fish uses these fins to crawl or "elbow" their way out of the water and to cling to half-submerged logs and stumps.

Perhaps the strangest feature of all is the tail, which is soft and boneless, and composed almost entirely of a most delicate arterial network. For it is through the tail that this fish secures its necessary supply of oxygen while out of the water.

That First Impression. Mrs. Burton was paying a social afternoon call on Mrs. Templeton.

"And what do you think of your new neighbors?" Mrs. Burton asked.

"Well, you know, I haven't called on them yet, but, from what I've seen of them, I can't say that I think very much," Mrs. Templeton replied.

"Maybe you shouldn't form an opinion so soon," Mrs. Burton ventured.

"Oh, yes, I'm perfectly safe in that," Mrs. Templeton assured her. "The opinion I form of anyone at first sight is usually correct. Yes, ma'am, what I think when I first see anyone is nearly always what I think later."

Little Marjorie was interested in this last statement, and took a hand in the conversation.
