The land of Armenia is very rich in iron, copper and gold.

MANY WOMEN AVOID OPERATIONS

Through the Use of Lydia E. Pinkham's Vegetable Compound

Two Interesting Cases

Some female troubles may through neglect reach a stage when an operation is necessary. But most of the common ailments are not the surgical ones; they are not caused by serious displacements, tumors or growths, although the symptoms may appear the same. When disturbing ailments first appear, take Lydia E. Pinkham's Vegetable Compound to relieve the present distress and prevent more serious troubles. Many letters have been received from women who have been restored to health by Lydia E. Pinkham's Vegetable Compound after operations have been advised by attending physicians.
Mrs. Edwards Avoids Operation
Wilson, N. C.—“For about a year I was not able to do anything, not even my housework, because of the pains in my sides and the bearing-down pains. I could only lie around the house. The doctor said nothing but an operation would help me, but I tried different medicines which did

no good, until my sister insisted on my trying Lydia E. Pinkham's Vegetable Compound. She said there was nothing like it. I know that she was right, for I began to improve with the first bottle and it has done me more good than anything else. I am able now to do anything on the farm or in my home and I recommend it to my friends.”—LILLIE EDWARDS, R.F.D. 3, Box 44, Wilson, N. C.
Another Operation Avoided
Akron, Ohio.—“I can never praise Lydia E. Pinkham's Vegetable Compound too highly for what it has done for me. I had such pains and weakness that the doctor told me nothing but an operation would help me. But my mother had taken the Vegetable Compound and she told me what it had done for her, and so I took it and I am glad to tell every one that it made me a strong woman, and I have had two children since then.”—Mrs. R. G. WESTOVER, 325 Grant Street, Akron, Ohio.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent you free upon request. Write to Lydia E. Pinkham Medicine Co., Lynn, Massachusetts. This book contains valuable information.

It is easy enough to practice diplomacy when the other man is doing the same thing. But when he frankly insists, what?

For Sale—Two Choice Well Improved Farms
240 acres and 160 acres, half mile from station, Catholic church and school, near eastern Kansas. Crops always sure. Other good farms to exchange. Also St. Joseph income properties. Fourteen good farms with small mortgages will trade equities for clear western Kansas land. W. D. GORMLEY, 511 Edmund Street, ST. JOSEPH, MO.

FRECKLES POSITIVELY REMOVED
For over forty years beautiful women have been keeping their skin soft, clear and free from freckles with Dr. C. B. BARKER'S SKIN PREPARATION. Fully guaranteed. 50-cent bottle free. Two sizes, 1.25 and 50¢. At druggists or postpaid. DR. C. B. BARKER, 2075 So. Western Ave., CHICAGO

Movie films for home use—standard, non-inflammable, complete subjects—drama, comedy, westerns. List 25¢ stamp. Dealers supplied. Coronet Films, 729 7th Ave., New York.

Opportunity Calls from CANADA

Pay a visit to Canada—see for yourself the opportunities which Canada offers to both labor and capital—rich, fertile, virgin prairie land, near rail ways and towns, at \$15 to \$20 an acre—long terms if desired. Wheat crops last year the biggest in history; dairying and hog raising well mixed farming rapidly increasing.
Excursion on 1st and 3d Tuesday of Each Month from various U.S. points, single fare plus \$2 for the round trip. Other special rates any day. Make this your summer outing—Canada welcomes tourists—no passport required—have a great trip and see with your own eyes the opportunities that await you.

Gruesome and Inhuman!
Gilbert Wiley is one of those kind of men who won't let women drive and always operates the family auto mobile himself. Mrs. Wiley charged while on the stand in her divorce action in Chicago the other day.
She alleged cruelty.
Mrs. Wiley told the court between sobs that she had held down the back seat with no opportunity to blow the horn or feed the gas while her husband rode jauntily at the steering wheel.
She got alimony with her decree.—Utica Globe.

Feeling the Men
An invention for the use of the farmer is the "cuckie switch," designed to increase the waking hours of hens and, correspondingly, the egg yield. This is a clock equipped with an on-and-off switch by means of which the electric lights in the hen house will be automatically turned on at dark or early in the morning and turned off when the desired number of hours of light have been added to the hen's working day.—Utility Bulletin.

Not Too Free.
“Why do so many immigrants want to come to America?”
“They think this is a free country.”
“Well?”
“And that they can come over here and help themselves.”—Louisville Courier-Journal.

There's a Reason

Farmers' Opinions on Stock Feeding

Obtaining Feed Economically Is Most Troublesome Problem of Breeders.

(Prepared by the United States Department of Agriculture.)
Producing or otherwise obtaining their feed economically is the most troublesome feeding problem of farmers who keep live stock. This was brought out emphatically through a questionnaire sent out by the United States Department of Agriculture which was answered by nearly 500 farmers scattered over the country. The replies showed that general economy of rations, the cost of grain, and the cost of protein represent about 52 per cent of the difficulties in feeding.
These men classed balancing of rations next in importance. Other problems, such as labor, increasing production, difficulties in wintering stock, short pastures, and variety and palatability of feeds apparently were thought of only in connection with the principal difficulties. That these opinions are worth considering is borne out by the fact that all of the men questioned were progressive farmers and breeders, and the average period of their experience was 20 years.
Adopt Balanced Rations.
During the two decades these stock raisers have been working to get ahead, many changes have taken place in the ways of feeding animals. The outstanding progressive step taken has been the wide adopting of the balanced ration. Other improvements in the order given by most of the five hundred farmers are more liberal feeding, feeding more legumes, better water supply, providing minerals, feeding according to production, feeding more protein, and more regular feeding. At the same time they list the common errors in feeding which are responsible for poor results, poor combinations of feeds being the one most frequently mentioned, followed by underfeeding as the next most effective reducer of profits. Following these in regular order, based on the number of times mentioned in the answers, come lack of protein, lack of water, lack of legumes, sudden changes of feed, poor housing parasites, lack of salt, waste of feed, poor equipment, and overfeeding. Practically all of these troubles are easily preventable.
Almost all of these 500 farmers had raised at one time or another scrubs, grades, and pure breeds, and almost to a man they joined in a paean of praise of the pure bred. Only 1 per cent of them reported that they had failed with improved stock. Most replies contained specific estimates showing the superiority of well-bred over random-bred animals, and when averaged it was brought out that these men consider that pure breeds make about 40 per cent better returns on feed used than common stock.
Many Use Self-Feeders.
The report prepared by the department on the results of this feeding investigation contains many more interesting sidelights on feeding and corroborates a number of tendencies that good observers must have suspected. For instance, of 400 who answered questions regarding the use of self-feeders, 41.5 per cent had used this method of feeding, leaving about three-fifths yet to take up this economy. At present the self-feeder seems to be used mostly in hog raising districts and for poultry. In the Middle West more than half the farmers reporting used it. The general sentiment seems to be that this piece of equipment is especially suited to hogs and chickens, but a few farmers used it for feeding calves and sheep.
Nearly all of those who replied made comment on the feeding of silage, and practically 50 per cent of them use this feed. In the north-eastern states, where dairying is very generally followed, two-thirds of the farmers in the list have silos. Although most of the silage is fed to dairy cows, the list of animals to which it is fed, according to the questionnaire, includes also steers, breeding ewes, and brood sows. A few men reported feeding it in limited quantities to horses, hogs, and lambs.
It is worth while to note that more than 22 per cent of these farmers who answered the government questions credited farm papers as the principal source of their knowledge of feeding problems. Other important sources mentioned were: Experience on home farm, general observation, bulletins, and books and records.

Darken Colt's Stall to Lessen Fly Irritation
Leave the colts in the barn while their mother is working in the field. Darken the colts' stalls to lessen the irritation from flies and give them access to clean feed at all times. This will give them a chance to develop and grow into much better individuals.
Profitable to Cull Flocks.
It is just as profitable to keep the farm flock culled for wool and mutton as for eggs and white meat.
Mark of Good Layer.
Late molting is the mark of a good producer.

Worm Causes Heavier Losses Than Cholera

Biggest Part of the Damage Comes From Wasted Feed.

Swine raisers suffer greater loss from round worms than from hog cholera, according to the department of animal husbandry of the New Jersey agricultural experiment station, but they do not attract so much attention because few hogs actually die from worms. The damage comes from the amount of feed wasted in feeding the worms and the loss of vitality of the animals. Many lung diseases, especially pneumonia, occur as the direct result of worms.
To combat the round worm successfully its life cycle should be thoroughly understood. Six to eight million eggs a year are laid by the female worm in the hog's intestines. The eggs come out with the manure, infecting every particle of food on the surface of the hog lot. They will survive most conditions for at least a year.
The eggs are swallowed by the pig in feeding and hatch in the intestines. The young worms then work their way through the walls of the intestines, and into the liver and blood stream, by which they are carried to the lungs. While in the lungs they may cause "humps" or heavy breathing. Here they become active, crawl up the windpipe and cause coughing. Some are expelled from the mouth at this time, but most are swallowed and then remain permanently in the intestines.
Several treatments for worms may be followed:
Withhold feed from the hog for 24 hours and give a capsule containing two grains of santolin, three grains of aloin and eight grains of sodium bicarbonate. Do not feed for eight or ten hours after treatment, and then give one to two tablespoonfuls of epsom salts or Glaubler salts in the feed for every 100 pounds live weight of the hogs. One capsule is sufficient for a pig weighing up to 75 pounds.
If santolin cannot be procured, oil chenopodium, also known as "oil of worm seed" may be used. Four teaspoonfuls mixed with one ounce of castor oil is the usual dosage. The results will be most satisfactory if the oil is given alone rather than with the feed. Each pig should be fasted 24 hours before treatment.
If necessary, repeat the treatment in four to six weeks.

Late Built Houses May Cause Colds and Roup
Many poultrymen are finding that poultry houses built too late in the fall are apt to result in colds and roup.
Before the birds, especially pullets, are put in a new poultry house the floor as well as the lumber used in construction must be thoroughly dry. The essentials of a good poultry house are: dryness, as this prevents colds and roup; fresh air, which keeps the birds in good health; sunlight, nature's best disinfectant, and floor space so that during confinement the birds will have room to exercise.
For the best results a poultry house should be built for units of 200 birds. This requires a house 20 by 40 feet. It should face southward and should be located on high dry ground, and where it gets some shelter. Glass windows on the east and west sides with curtain windows in the front will allow all the sunlight and fresh air that the birds require.
Protection of the flock against daily and seasonal changes of weather and climate is the purpose of a poultry house.

High Feeding Value of Buttermilk and Products
The feeding value of buttermilk and buttermilk products, such as condensed or dried buttermilk, is not generally appreciated. At any rate, creameries are unable to get as much out of their buttermilk as its feeding value indicates they should be able to realize. Farmers who live close to the creamery at which they sell their cream sometimes take their own share of the buttermilk back home as a feed for hogs and chickens. They derive much value from the product, provided it is fed in an economical manner. Buttermilk is relatively rich in protein and its protein has a high feeding value because of its animal origin. For that reason, if it is supplied more liberally than is needed for balancing the grain ration fed, part of it is wasted and, as a result, its full feeding value is not realized.
Pure Strain Selections of Tubers Are Superior
Cornell university plant breeders have found that pure-strain selections of potatoes are much superior to those ordinarily grown by farmers in New York. Plants of the pure strain, developed from a single tuber, produced 48 more bushels to the acre than seed potatoes selected by farmers in a two-year commercial test.
Disposing of Produce to Commission Merchant
Selling to commission merchants is the simplest method of disposing of the produce, as it does away with the expense and trouble involved in a private trade, but the returns are usually not so great, except when dealing with certain commission houses that have built up a fine trade along certain lines.

Alabama Mayor Out With Strong Facts

Judge G. W. Thomason, Mayor of Tarrant City, Alabama, widely known and highly esteemed pioneer citizen, recently gave his unqualified endorsement to the Taniae treatment.
“Chronic indigestion brought me to the verge of a general breakdown three years ago,” said Judge Thomason, “and nothing seemed to afford much relief. I was eating scarcely enough to keep going on, and food stayed in my stomach like a rock, causing pain and extreme nervousness.”
Telling it to the Policeman.
An aged colored man was driving an equally aged horse down Commercial street recently.
A street car coming from the Santa Fe depot caused the traffic “cop” on the corner to signal the old darkey to stop. He failed to check his horse and drove up in front of the car, which forced it to stop.
“Why didn't you stop?” yelled the angry cop.
The old darkey answered: “I just done bought this horse from a Mexican and he started him, and I see done forgot what he said to say to stop him.”—Topeka Capital.

Sleep was often impossible, and I gradually weakened so I could hardly attend to my office duties.
“The first bottle of Taniae improved me wonderfully, and each successive bottle gave added impetus to my returning strength. I felt ten years younger when I finished the sixth bottle a short time later. Taniae gave me new zest in life that still remains with me.”
Taniae is for sale by all good druggists.
Squeezed Out of It.
“The idea of your dozing while I was singing.”
“You were singing a lullaby, weren't you?”
“Yes.”
“Then I couldn't pay your art any higher compliment.”—Boston Transcript.
Dad's Opinion.

CHEVROLET
for Economical Transportation OF Farm Products

Modern, progressive farmers, being also business men, now depend on fast economical motor transportation to save time, save products and get the money.
Chevrolet Superior Light Delivery, with four post body was built especially for farm needs. It has the space and power for a big load, which it moves fast at a very low cost per mile.
For heavy work, Chevrolet Utility Express Truck at only \$550 chassis only, offers a remarkable value. Fits any standard truck body.
Chevrolet Motor Company
Division of General Motors Corporation
Detroit, Michigan
Dealers and Service Stations Everywhere
These new low prices effective September 1st

Important Qualification.
“You go so far as to admit the possibility of defeat for your party?”
“Yes,” replied Senator Sorghum; “but you will observe that I observe the rule of statesmen who lift a warning voice and an always mighty careful to say ‘unless.’”
Medical Professor—Where is the gnotis?
Stude—I don't know, sir. I think you put it on the shelf in the dissecting room with the rest of the surgical instruments.—Boston Transcript.
Pictures represent all farmers as six feet tall; but they're not.

Important to All Women Readers of This Paper

CORNS
Thousands upon thousands of women have kidney or bladder trouble and never suspect it.
Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.
If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.
You may suffer pain in the back, headache and loss of ambition.
Poor health makes you nervous, irritable and maybe despondent; it makes any one so.
But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions.
Many send for a sample bottle to see what Swamp-Root, the great kidney, liver and bladder medicine, will do for them. By enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample size bottle by parcel post. You can purchase medium and large size bottles at all drug stores.—Advertisement.
St. Paul's cathedral covers an area of two and a quarter acres.
At every crisis look around for the opportunity. It's there.

SHINOLA
AMERICA'S HOME SHOE POLISH
Black - Tan - White - Ox-Blood - Brown
SHINOLA and the Shinola Home Set should be in every home. Every member of the family can use it for it gives the quick easy shine. The shine that preserves leather and resists weather. SHINOLA in the handy quick opening box with the key.
It's easy to shine with the Home Set. “The Shine for Mine”
