**SHINOLA**  
AMERICA'S HOME SHOE POLISH  
Black - Tan - White - Ox-Blood - Brown

SHINOLA and the Shinola Home Set should be in every home. Every member of the family can use it for it gives the quick easy shine. The shine that preserves leather and resists weather. SHINOLA in the handy quick opening box with the key.

It's easy to shine with the Home Set. "The Shine for Mine"

she talks more than the girl who is to pay the bill.—Boston Transcript.

**MOTHER! GIVE SICK CHILD "CALIFORNIA FIG SYRUP"**

Harmless Laxative for a Bilious, Constipated Baby or Child.

Constipated, bilious, feverish, or sick, colic babies and children love to take genuine "California Fig Syrup." No other laxative regulates the tender little bowels so nicely. It sweetens the stomach and starts the liver and bowels acting without griping. Contains no narcotics or soothing drugs. Say "California" to your druggist and avoid counterfeits! Insist upon genuine "California Fig Syrup" which contains directions.—Advertisement.

**Portugal's National Epic.**

The national epic of Portugal is the "Lusiad," written by Luis Vaz de Camoens (1524-1580) and published in 1572, says the Detroit News. The great poem which has been translated into many languages, was begun by Camoens while he was in exile in India and was completed shortly after he was allowed to return to Portugal. Before 1700, 28 editions of the "Lusiad" were printed in Lisbon. Although the "Lusiad" was, as a piece of literature, a tremendous success, it netted its author little financial gain, for, as his epitaph, destroyed in 1775, read, "He lived poor and neglected and so died."

Everybody wants to succeed, but too many of us want to succeed without working.

That one can read seems to be of little benefit, sometimes.

All our wants beyond those which a very moderate income will supply, are purely imaginary.

**WOMEN! DYE FADED THINGS NEW AGAIN**

Dye or Tint Any Worn, Shabby Garment or Drapery.

**Diamond Dyes**

Each 15-cent package of "Diamond Dyes" contains directions so simple that any woman can dye or tint any old, worn, faded thing new. Even if she has never dyed before. Choose any color at drug store.—Advertisement.

**Greek Cynics.**

The Cynics were a sect of Grecian philosophers, founded by Antisthenes about 396 B. C. The Cynics were noted for their morose and gloomy views of life; for their disregard of all sciences, save that of morality; and for their contempt for the ordinary conventionalities of life. The word cynic is derived either from Cynosarges, the place where Antisthenes taught; or from Nainos (Gr., doglike), in allusion to the snarling or surly manner affected by the philosophers of this school. To Diogenes of Sinope, the most distinguished disciple of Antisthenes, the Athenians erected a column of Parian marble surmounted by a dog.

**Of Course.**

If he boasts of the things he did yesterday, you are safe in classifying him as a has-been.

Love is the history of woman's life—it is an episode in man's.

**Why the Doctor asks: "Do you drink coffee?"**

If you are troubled with headaches, insomnia, indigestion, or sluggishness of the liver or bowels, probably one of the first questions your doctor asks is, "Do you drink coffee?"

He knows, better than anyone else, that the drug, caffeine, present in coffee, tends to irritate the nervous system and is a frequent cause of disturbance to health.

If coffee causes trouble, and you value health, stop coffee and drink Postum.

Postum is a pure cereal beverage—absolutely free from caffeine or any other drug. It has a delicious flavor, that many people prefer to coffee.

Your grocer sells Postum in two forms: Instant Postum (in tins) prepared instantly in the cup by the addition of boiling water. Postum Cereal (in packages) for those who prefer the flavor brought out by boiling fully 20 minutes. The cost of either form is about one-half cent a cup.

**Postum FOR HEALTH—There's a Reason**

**Youth Exhibits Champion Steer**

Lloyd Taube of Marion, Iowa, Wins First Prize With His Calf.

Lloyd Taube, a seventeen-year-old boy from Marion, Linn county, Iowa, had the proud distinction of exhibiting the grand champion baby beef at the Iowa state fair, held at Des Moines, in what was probably the largest show of this character ever held. The boys and girls whose animals had won at the various county fairs were entitled to compete for state honors at Des Moines, and a total of 446 head were lined up before the Judges when the state contest was called.

The steer with which Lloyd won the highest honor against this strong field was a pure bred Aberdeen Angus calf named "Tiny." He was a February calf, sired by Erin Boy II of Lone Ash, Lloyd bought him in September and fed him largely on a home-grown ration of shelled corn and clover hay. The calf did so well that his owner entered him in the Boy's Beef club in his county, and at the local fair was awarded the championship over 32 entries. This award carried with it a free trip to the International Live Stock exposition, which will be held in Chicago the first week in December.

**Took His Pet to Fair.**

Spurred on by this success, Lloyd took his pet steer to the Iowa state fair. This animal and one other were the only entries from Linn county, which made his subsequent triumph all the more noteworthy. After the large classes of well-fitted breeds had been sifted down by the breed judges, Prof. H. H. Kildee was called upon to

Lloyd Taube and His Champion Steer.

tie the ribbon on the grand champion of the show, and he selected Tiny for this high honor. Lloyd accepted the congratulations of the ringside crowd with becoming modesty and attributed his success to plenty of good feed and constant attention.

They weighed 925 pounds when records were started on April 1, and at the close of the contest balanced the beam at 1,150 pounds. He was allowed about eighteen pounds of shelled corn a day and all the clover hay he would eat. At Des Moines he presented such a highly finished appearance that he could not be denied the victory, in spite of very strong competition.

**Has Won Three Times.**

Lloyd has been in club work for six years and has won at a county show three times, always with an Angus calf. Three years ago he was awarded a trip to the international, and it was the inspiration received while at Chicago that later proved a big factor in achieving his crowning triumph. While he will again attend that premier exhibition of the live stock world this year, he will not exhibit Tiny there himself, as he had promised a well-known Angus exhibitor living in his home town to let him have the calf at the close of the Iowa state fair. This breeder will continue to grow out the steer and will enter him at Chicago in the open classes against the highest fitted beavers of the most skilled and experienced exhibitors. It will be interesting to watch how this highest type of boys' club endeavor will rank when pitted against the finest products of the noted veterans of the industry.

**Corn for Silage Should Be Practically Matured**

Silage corn should be allowed to grow as late as the season permits, or until the corn is practically matured, i. e., the kernel has become hard and dented. The stalk is usually somewhat green as late as this stage. Many experiments have been conducted which show that a greater amount of feed of a better quality and that will keep more easily can be obtained from silage which is made from corn cut at this stage of maturity.

**Take Pains to Prepare Good Alfalfa Seed Bed**

In sowing alfalfa, take pains to prepare a good seed bed. Have it well firmed and fine on top. Then sow 15 to 18 pounds of seed per acre, but be sure to have it inoculated. Don't sow alfalfa on sour land. If your land is not sweet defer seeding until next spring and in the meantime give it a dressing of two to three tons of ground limestone.

**Hydrocyanic Acid as Fumigant for Pests**

Absorbed in Quantities Sufficient to Be Harmful

(Prepared by the United States Department of Agriculture.)

Because hydrocyanic acid, in the gaseous form, is used extensively in the United States as a fumigant for the destruction of insects and rodents, it often comes in contact with fruits, vegetables and other foods, and thus may be absorbed in sufficient quantity to be dangerous to man. In recent investigations the bureau of chemistry of the United States Department of Agriculture has determined the quantity of the fumigant which is absorbed and retained by various foodstuffs, all products examined being found to absorb the acid to some extent.

Results of the investigations are given in Department Bulletin 1149, just issued. No conclusions, however, as to the safety of fumigated foods for consumption are drawn in this bulletin. Chemical observations alone are included. Determinations of the quantities of hydrocyanic acid injurious to human health lie in the domain of the pharmacologist.

Those interested in the subject may secure a copy of the bulletin from the United States Department of Agriculture, Washington, as long as the supply lasts.

**Entirely Dry Fodder Will Make Good Silage**

Farmers who do not get their silage made before frost may have good silage if they will utilize the dry fodder for this purpose, according to the live stock men at the New York State College of Agriculture.

Fodder silage not only makes better feed than dry fodder, but it is also more convenient to feed. Even though the corn fodder appears dry and wilted, the stalk will be found to contain considerable moisture. If there is not enough moisture in the corn to pack the corn well in the silo, additional water should be added. By adding this to the fanbox the fan thoroughly distributes the additional water.

Even entirely dry fodder will make good silage, providing the water is added in equal weight to the fodder. In any case, the fodder should be tramped down thoroughly.

Silage made in this manner will keep well. The quality is not quite as good as that made from corn cut while still green and no extra water added, but it makes excellent feed. Silage made from corn fodder, further, is not nearly as sour. It has a pleasant sweet smell and the cows not only like it, but thrive on it as well.

**Rye Is Recommended as Economical Swine Feed**

The feeding of rye as a substitute for corn in fattening pigs is held by Minnesota experiment station and agricultural extension men to be good economical practice in view of the prevailing market prices for the two cereals.

"As about 102 pounds of rye have given the same results as 100 pounds of corn," says H. G. Zavoral, live stock specialist, "rye at present prices would be the most economical feed. According to Henry & Morrison's 'Feeds and Feeding,' ground rye is worth 94 per cent as much per ton as ground corn for hog feeding.

"Rye is not as palatable as corn and hogs will not consume it as freely. Neither is it as good a feed for horses or cattle as it is for fattening hogs, but by mixing it with more palatable feed, such as corn and oats, it may be satisfactorily fed. It is harder to masticate than some other grains and should be ground or rolled for best results."

**Winter Cover Crop Will Afford Soil Protection**

A winter cover crop protects the land from washing during the winter months, and at the same time conserves the plant food materials made available during this period. Soil which remains bare during the winter loses much valuable plant food by leaching. A cover crop would make use of this plant food and release it the next spring in time for the crop of cotton or corn to obtain it.

Whenever possible the winter cover crop should be a legume, for legumes are able—by means of their well-known ability to obtain nitrogen from the air—to increase greatly the store of this element in the soil.

**Storing Vegetables for Home Use During Winter**

It is to the interest of every family to grow each season a supply of those vegetables suitable for storage, and to see that they are properly stored for use during the winter months when prices are high and vegetables often hard to get. Less work and less expense are involved in storing vegetables than in keeping them by other methods, as canning, drying, and preserving, and the product retains its characteristic flavor much better.

**Careful Handling Is of Importance With Apples**

Care in handling is of great importance in storing apples. Rough handling results in stem bruises, broken skin and bruised spots. A broken skin gives entrance to blue mold, which develops slowly at a low temperature, but causes considerable deterioration in the fruit.

**Essential to Profitable Farming**

The Utility Express Truck **\$550** Chassis Only f. o. b. Flint, Mich. Fits any Standard Truck Body

No business can succeed unless its product is profitably sold. Most farms have a fine production department but no sales department. They grow crops and stock bought by buyers who set the price.

One of the chief reasons for this unprofitable situation is the average farmer's poor facilities for moving his crops or stock to the place where he can sell or ship to the best advantage. Because of the time and expense of horse delivery millions of dollars worth of produce spoils annually on American farms. The saving of this waste would, in many cases, change a losing farm to a money-maker.

This low-priced, high-grade, reliable truck was designed as a money-saver and money-maker for farmers and business houses needing fast low-cost haulage of heavy or bulky goods. It fits any standard type of ton truck body. Ask any Chevrolet dealer for price of the style of body you require.

**Easy Way to Make Home Improvements.**

Almost every man likes to do little jobs of building, particularly when by doing them he can make permanent, labor-saving improvements around his home.

If you have been wishing for a sidewalk that will keep the house clean and the feet dry—non-slip steps and porch floors, ornamental gateposts—any one of dozens of improvements, you will be interested to know that you can now obtain complete directions free of cost.

The best concrete construction experience has been drawn upon to provide these directions. You will find everything you need to know about small jobs—how much cement to use, how to mix the concrete, what tools to use, and all the rest.

A request to the Portland Cement Association, 111 West Washington Street, Chicago, will bring this free booklet, "Concrete Around the Home," by return mail.—Advertisement.
