OFFICIAL PAPER OF BOX BUTTE COUNTY.

COUNTY OFFICERS: T. M. PHELPS, Clerk; Jas. H. H. Barrett, Treasurer; J. P. Sweeney, Sheriff; Mrs. A. E. Neilland, Superintendent; CHAR. HANSEN, Surveyor; Dr. W. R. Miller, Coroner; JAMES HANBY, Commissioner of the State; JAR. JOLLENDER, Commissioner of the Dist.; G. W. DUNBAR, Commissioner 3rd Dist.

The anti-privilege bill, putting a heavy penalty upon those who engage in fictitious contests for money in any of the territories or in the District of Columbia, gave the county an excellent idea of how easily and how quickly Congress can act when so disposed.

The results of the bidding for these bonds are in the main satisfactory to the administration, but there are good reasons for the belief that President Cleveland and Secretary Carlisle very reluctantly awarded any portion of the bonds to the Morgan syndicate; but, inasmuch as the subscriptions in excess of the bid of that syndicate only took about two thirds of the issue, there was nothing else that could be fairly done but to award the others to that syndicate.

While in Alliance a few days ago, the writer conferred with a number of the business men of that city and of course the matter of county seat removal came up, and it was evident from the expressions of these men that they have no hopes of obtaining and but very little desire to secure the county seat at that place.

The explanation of Lord Kelvin's estimate that the "set-back" of the earth in its daily rotation round its axis amounts to twenty-two seconds per century, is reported to be that such retardation is owing to the friction caused by the tides, the latter acting as a brake, and such action is calculated, according to the same authority, to be equal in weight to some 400,000 tons applied on the equator.

Those who wish to study begging as a fine art are recommended to visit the museum of the Mendicity society of London, where they will find a curious collection of the varied dodges resorted to by the begging fraternity of that vast city.

An authority on such matters says that there is only one drug store in this country, and that one is located on Fifth avenue, New York. No patent medicines or proprietary articles are in stock, for it is a prescription plant pure and simple, and is patronized by the leading physicians.

First editions of Robert Louis Stevenson are already fetching high prices. At the recent sale of Philip Gilbert Hamerton's library and etchings, which brought only \$3,270, a presentation copy of "An Inland Voyage," 1873, was sold for \$33, and the first edition of the "New Arabian Nights," two volumes, 1852, for \$49.

The luxury implied in the quantity of flowers used by one of the large perfume houses of Cannes is almost beyond imagination. He uses yearly 140,000 pounds of orange flowers, 12,000 of calia flowers, the essence from which most of the white perfume is made; 149,500 pounds of rose, 32,000 pounds of jasmine, 21,500 pounds of violets, besides musk, civet, hyacinth and other perfume plants in large proportion.

LIFE ON DESTRUCTION ISLAND.

Can of Things seen by a North Pacific Lighthouse-keeper.

From the Seattle Post-Intelligencer: The keeper of the government lighthouse, which was established a few years ago on Destruction island, doubtless leads a lonely life, but he has some experiences which a lover of the romantic and the adventurous might well covet. The island itself is not without a certain weird fascination.

On such nights the keeper has visitors that do not come to the door of the ordinary landlubber. Flocks of wild fowl, attracted by the bright light, fly blindly toward it, and, with the force of the wind added to that of their own stout wings, they are driven against the lens with a momentum that sometimes shatters the thick glass, but oftener results in instant death to the birds.

During the day the keeper is frequently greeted by the thrilling sight of a whale hunt by Indians in the neighboring waters, a chase as hazardous and exciting as any on mountain or plain. Each canoe goes out with a crew of six oarsmen, one spearman in the stern. To the end of the spear an airtight sealikin, inflated like a bladder, is attached by a line fifty feet long.

A splashing oar, a sudden move, a wavering hand or hot heat at the helm, and boat and crew would go down beneath a single stroke from the great monster now so near. At precisely the right instant the spearman hurls his spear with unerring aim, and the battle begins. And then one standing on the island cliff sees the little boat dart away and the whale fiercely churning the water.

How the Earth Loses Time.

The explanation of Lord Kelvin's estimate that the "set-back" of the earth in its daily rotation round its axis amounts to twenty-two seconds per century, is reported to be that such retardation is owing to the friction caused by the tides, the latter acting as a brake, and such action is calculated, according to the same authority, to be equal in weight to some 400,000 tons applied on the equator.

The Only Drug Store.

An authority on such matters says that there is only one drug store in this country, and that one is located on Fifth avenue, New York. No patent medicines or proprietary articles are in stock, for it is a prescription plant pure and simple, and is patronized by the leading physicians.

Will Please Smokers.

Professor Hajak of Vienna has declared that smokers are less liable to diphtheria and other throat diseases than non-smokers in the ratio of one to twenty-eight. The learned Dr. Schmoll also gives us to understand that smoking is always positively forbidden in bacteriological laboratories, because it is known to hinder the development of the bacteria.

Flower Farming.

The statistics of flower farming tell us that the British ladies and Europe consume annually, at the very lowest estimate, 1,000,000 millions of perfume spirits, under various names.
