AFRAID OF THE JAPS.

fandwich Island People Have New Cause to Seek Annexation.

SEATTLE, Wash., Sept. 5 .- H. G. Whitney, ex-postmaster general of the Hawallan islands, who has just arrived from Honolulu, reports a strong revival of the annexation feeling on the islands and says that it is greatly intensified through the belief that should Hawaii be annexed to the United States the threatened Japanese trouble would be entirely viped out by the abrogation of all existing treaties. By what is known as the Gibson treaty, entered into with Japan about thirteen years ago, the Japanese may pour into the islands in unlimited numbers. They now number 25,000 and are coming at the alarming rate of 3,000 a year. thinks it is only a question of a few years when the Japanese will outnumber the natives and naturalized population, and in that case would cause serious trouble. They are already demanding the right of franchise, which, by treaty, is conferred upon them as soon as they can read and write the English language.

Hears Cheers for Mckinley-Again Denounces the Anarchist Charge-The People Asked to Study the Issnes and Cast Their Ballots Intelligently and for

Their Best Interests.

CHICAGO, Sept. 7 .--- Mr. Bryan left at 8:45 o'clock this morning for Milwau kee, where he was to make two speeches to-day. With him were E. C. Wall, F. W. Von Cothausen, Julius Schuendel and P. J. Somers.

At Waukegan, where about 700 people demanded a speech from Mr. Bryan, he was introduced by Mr. Wall as the next President of the United States and said: "Ladies and Gentlemen, I haven't time to make a speech, but I am very glad to see you, whether you are drawn here by what opposing papers call idle curiosity or by inter-

est in the cause being presented in this campaign. I am inclined to believe there is a great deal of interest among the people on both sides of this question. Some believe the success of the free silver cause would be detrimental to the country. They say they are earnestly opposed to us. Others believe that there can be no general return of prosperity to the people of the United States until we stop the appreciation of money by giving the people more standard money.. It is natural to believe that these people feel interested. It is not for one man to say how another shall think, or act or vote, but I believe we have the right to urge upon you the importance of studying the question for ourselves and not allowing anybody to think for you. I do not believe there is any class of people who can safely be intrusted to the right to think and act for another class. The ballot is given to the citizen in order that each citizen may make his vote represent not what somebody else may think, but what he wants himself. I simply ask you, during the days which intervene between now and election day, to study the issues presented in this campaign, and when you have made up your minds, have the courage to vote as you please, and no one can question

vour right to do it. I thank you." CHEERS AND COUNTER CHEERS.

There was a loud cheer when Mr. Bryan had finished. Then some one proposed "Three cheers for McKinlev." and about half the crowd gave them with a will. These were followed by return cheering for the

At Kenosha a thousand people were where all the power emanates from the people and where officers are chosen by the people, they should feel His nomination, following an interest in public affairs and campaigns through which they pass. When the time comes when the great question forces itself to the front the interest is deepened, and we have reached such a time. Often it is a matter of comparatively little importance whether an issue before the people is settled this year or next, or a few years in the future; but there are times when great results depend on a campaign, and we have reached such a time. The money question has been forced upon the attention of the people by those who are not satis-tiled with the gradual appre-ciation of the dollar, but have sought to hasten its rise. It certainly has been too rapid for the welfare of the people, but those who were the beneficiaries of the appreciation of the dollar were not satisfied and attempted to hasten its rise by action still more hostile to the white metal. They have not been content to let the peo ple have an increased value of money, but have secured the repeal of the Sherman law and put nothing in its place and then begun to issue bonds because hard times had made it 'mpossible to invest money in enterprises. Property has fallen and when property is falling people do not want to invest in property. They want to invest in money and then when money was idle and they could not find profitable investments in enterprises some wanted to draw a good interest on such investments. In my judgment those who want a safe investment and wanted government bonds issued were to a large extent responsible for the result. In our platform we have declared against the issue of bonds in times of peace. When you come to consider these questions, the interests of the people who must pay taxes which pay the bonds should be considered rather than the people who desire to profit by taxation wrung from a people already overburdened. We knew when we put the clause in our platform against the issue of bonds we would lose the bondholders, but we want the people who pay the taxes."

there were no necessary evils in gov-ernment; that its evils grew out of its abuse. Some people de not draw any lines between government and the abuse of government, and whenever people speak out against an abuse of government those who are making money out of the abuse generally find fault with the people who complain and try to put them in the attitude of opponents of govern-ment. 1 want to assure you the most loyal supporters of government are not found in great trusts which think they are greater than the government and control it. They are found among the masses who want to secure love for the government by every citizen by making it so good it will deserve their love. Remember you cannot reform evil by talking, you have got to reform it by voting. People may complain as much as they like about a bad law, but the way to get rid of it is to repeal it and the way to repeal it is to vote for those who believe in repealing the laws that are bad and not those who want to make more bad laws and keep all the make more bad laws and keep all the bad laws already in existence. If the people of this country would all rec-ognize the power of the ballot and use that power as they should, there would be less complaint against injus-tice. If our laws are bad, remember the people who permit the laws to re-main bad are to blame. If our laws are to be good, those who want them good have got to make them good. I thank you.

Opposite the residence of Colo-nel R. M. Newport, the white haired veterans uncovered and saluted as they recognized the widow of their loved "Black Jack," and Mrs. John A. Logan carefully returned every salute. As the head of each division ar rived at this part of the avenue, twenty daughters of old soldiers stepped out into the street and scattered flowers before the oncoming veteraus, who picked up the blossoms and plazed them in their buttonholes.
