

ABOUT CATTLE.

Once the Law Forbade the Killing of Cows in This Country.

The first cattle that were brought into the American colonies were landed at the James River plantation, in Virginia, in the year 1607.

In order to encourage the industry to the fullest possible extent an order was passed forbidding the slaughter of any animal of the bovine kind under penalty of death.

The first cattle brought into the New England colonies arrived at Plymouth in 1624, and were imported from England by Governor Winslow.

The reader naturally thinks of these animals as superb specimens of the bovine race, but they were not.

OLD LONDON CHURCHES.

The Pestilential Air With Which They are Filled.

The Church of St. Mary Woolnoth, which stands out conspicuously at the King William street corner of Lombard street, London, was closed ten months ago, and it is clear from the statement of the rector that the step was not premature.

Arthur Statham, the counsel representing the parish, stated that 1,681 adults and 422 children had been deposited in this horrible receptacle between 1700 and 1832.

Wanted, Two Good Murderers.

Some curious letters passed between Garrick and a man named Stone. The latter was employed to get recruits for the lower parts of the drama, and one night he wrote to Garrick: "Sir, the Bishop of Winchester is getting drunk at the Bear and swears he will not pay to-night."

A Peacock's Little Foster Mother.

A bantam hen at Norwich, Conn., has adopted a young peacock, newly hatched from an ordinary looking egg, to the greatest disgust of another hen, who did the hatching.

Dangerous at Such Times.

Some ladies never, never can understand that a man of letters should sometimes be left alone in his den. Byron himself says that, however much in love he might be any moment, he always felt, even when with the fair, a hankering to be back in his untidy library.

CURE CONSUMPTION.

T. A. Slocum, M. C., the Great Chemist and Scientist, Offers to Send Free, to the Afflicted, Three Bottles of His Newly Discovered Remedies to Cure Consumption and All Lung Troubles.

Nothing could be fairer, more philanthropic or carry more joy in its wake than the offer of T. A. Slocum, M. C., of 183 Pearl street, New York City.

Confident that he has discovered an absolute cure for consumption and all pulmonary complaints, and to make its great merits known, he will send, free, three bottles (the Slocum new system of medicine) to any reader of the Herald who is suffering from chest, throat and lung troubles or consumption.

He invites those desirous of obtaining the remedies to simply send him their express and postoffice address, and receive in return the three free bottles.

Already this "new scientific course of medicine" has permanently cured thousands of apparently hopeless cases.

He considers it his religious duty—a duty which he owes to humanity—to donate his infallible cure.

Offered freely, apart from its inherent strength, is enough to commend it, and more so is the perfect confidence of the great chemist making the offer.

He has proved consumption to be a curable disease beyond any doubt. There will be no mistake in sending—the mistake will be in overlooking the Doctor's generous invitation.

Delays are dangerous; mail your address to T. A. Slocum, M. C., 183 Pearl street, New York, and when writing the Doctor, please mention reading this article in THE HERALD.
