# Nathan Straus Says---

The thing we have been telling Omaha people is true.

Read what "Nathan Straus," the great merchant, capitalist, philanthropist and public welfare worker says about pasteurized milk.

This telegram was received by THE OMAHA BEE Monday and published by The Bee without the knowledge of Alamito Dairy. That is the reason it is so valuable to us and so valuable to the people of Omaha.

**Alamito Dairy Pasteurizes Its Milk**

We recognize the danger that lurks in raw milk and have installed expensive machinery to pasteurize it and make it safe.

You may have doubted us, but surely you will not doubt Nathan Straus, a man recognized everywhere as unselfish in his many enterprises for the good of humanity. Don't take chances, but

Be sure your milk is pasteurized and your bottles have been scalded.

Come to Our Dairy and Let Us Show You How We Make Milk Safe for You and Your Children.

Milk and Scarlet Fever  
(Telegram.)  
Long Beach, Cal., Feb. 20.  
To the Editor of The Bee:  
As an old friend of your paper, I take the liberty of calling your attention to the fact that epidemics of scarlet fever and also typhoid, diphtheria, septic sore throat and measles can almost invariably be traced to infected milk. This is also the main cause of tuberculosis in its various forms. My twenty-five years of labor combating milk infection by pasteurization has fully convinced me of this fact, which has since been sustained by physicians and bacteriologists all over the civilized world.

I hope my recommendation will prevail to make investigations and, if verified, take proper measures for future prevention. Dairy interests usually object to such measures, but I trust those in your city and state are more enlightened.

NATHAN STRAUS.
