UR repeated statement that Goodyear users far outnumber the users of any other single brand is confirmed by the overwhelming Goodyear preference revealed in the tire census of seventy-one leading cities. These figures show more than twenty-one per cent of the tires used in these cities to be Goodyear; and they may be accepted as indicative of the Goodyear standing in the country at large.

The basis for this emphatic public preference cannot be price; for dozens of tires sell for less than Goodyear.

It is found in Goodyear quality and in Goodyear features of construction, which make Goodyear Tires last longer, go farther and so cost less in the end.
