SCHOOL GIRLS TO **BE IN UNIFORM?** 

This is the Question to Be Discussed at the Parent-Teacher Association Meeting.

FOR BROWNELL HALL GIRLS

By MELLIFICIA-March 16. At first thought the question of school uniform seems a settled issue-certainly put the girls in uniform and let them set down to applying themselves solely to their books and athletics and have one period of their lives free from thoughts of looks and frocks and frills.

Does a strictly adherred to uniform destroy individuality in the growing girl? Will the girl who has blindly taken what was handed to her by the school authorities in after life as blindly follow the dictates of the fashion designer? Is a girl's cultivation of taste in dressing and experience in selection of colors and fabrics and construction an essential part of her education?

To Discuss Question.

These are questions that the mothers and teachers of Brownell Hall will discuss at the home of Mrs. Joseph Barken, sr., when the Parent-Teacher association meets this afternoon.

Miss Euphemia Johnson, principal of Brownell Hall, frankly confesses that she has not yet decided the uniform question to her own satisfaction-there is so much to be considered on both sides. The Parent-Teacher association of Brownell Hall was founded last spring to promote understanding between parents and teachers on their common probe lem of education of girls. The meeting this afternoon is the second of this year. The officers are Mrs. A. L. Reed, president; Mrs. Edward L. Burke, vice president: Miss Lillian Galway, secretary. The executive committee is composed of Mrs. Burke, Mrs. J. J. Hess of Council Bluffs and Mrs. Waite Squier. Prof. J. J. Masters of the Omaha High school will give an address on "Modern Tendencies in Education."

Social Gossip.

Mrs. Luther Kountse returned home Tuesday after a short trip to Chicago. Miss Louise Dinning leaves this evene ing for New York City, where she will join Mrs. Charles Turner of Fremont, who will be her chaperon during Miss Dinning's three months' sojourn in the east. Mrs. Turner and Miss Dinning will stay at the Woman's University club and enter the class in practical nursing at the New York Young Women's Christian association, studying every day with three afternoons each week in hospital

Miss Dorothy Marie Brown, who enters the Illinois Training school for nurses next week, is a reserve nurse of the British St. John's ambulance corps and subject to call at any time for service in England or France, Miss Marie Finley accompanies Miss Brown, and both girls take the course together.

#### State Organizer Here.

Mrs. Nora Killian of Kearney, state organizer for the P. E. O. sisterhood, arrived in Omaha Wednesday evening to be the guest of Miss Clars Mason for several days. Mrs. Killian is on rou to Lincoln, where she will organize new chapter. Mrs. O. H. Menold gave a luncheon today for Mrs. ...illian and this afternoon she was guest of honor at a meeting of Chapter B. N. at the home of Mrs. Je C. Buffington.

Milk of Highest Grade. He told the mothers that all babies should be fed on breast milk until they are 5 or 9 months old. When feeding their babies on cow's milk he cautioned them to be sure that it was of the very highest grade and pasteurized. The process of home pasteurisation in

vogue in many homes was criticized by Dr. Jones. "Home pasteurization as a whole," he asserted, "has been found to be unsatisfactory." Infants should be fed as regularly as

adults, according to Dr. Jones, Fully 6 per cent of homes have a hit and mis system that makes great inroads on the health of bables, he said.

"I have found," he added, "that the majority of mothers do not think they are feeding their babies enough; as a matter of fact, the average child is overfed." "When the child becomes 18 months or I years old, hark not to the flowery and luring advertisements of the break fast food companies. Prepared cereals contain comparatively little nourishment. Vegetables Are Good.

Mothers in general are afraid to fee their children vegetables, whereas, they constitute one of the best foods in the world if properly prepared. The average mother does not cook the vegetables long enough, from fifteen to twenty min utes apparently being the length of time in most cases. Vegetables to b
