High Price of Feeder Sheep.

The high price of tosder sheep on the ocal market will have considerable to do with the alacrity with which sheepmen of Nebraska, Colorado and Wyoming, who have been steady annual season buyers in this class of stock previous to the present year, buy such stock this Contrary to reports emanating from Wyoming that high prices are being paid for such stock in that state, Albert Nichols of Ault, Colo., who was at the local yards yesterday with a consignment of stock, was of the opinion that between 25 and 20 per cent of the present sheep herds in this state were still in feeder lots.

That sheep feeders would turn themselves into the cattle business, because of the high prices of feeder stock at present and which show good prospect of being just as high throughout the entire summer, would be very unlikely according to Nichols. He said that if worst come to worst, these men would go out of business altogether in such a case. He also said that he has good reason to believe that sheepmen would not be buying feeders until way later than the usual summer rush this year.

ont turn out for track meet this spring due to an overstrained heart. Paynter has taken part in both foot ball and basket ball this year and the strain has proved too much for him. Paynter will be back for foot ball next fall.

Paynter was the only dependable miler on the high school aquad and he had been counted on to participate in all the big meets this year. Coach Mulligan will now have to develop a suitable man to take his place. Turk" Logan and Raymond Burgess seem the most likely men at present. Of these, Logan has had the most experience.

morning, while riding for a commission firm in the yards. As rider and horse were about to pass under one of the concrete bridges, something frightened the steed and the latter bolted. Young Routt was knocked squarely between the eyes and thrown unconclous to the pavement below.

The young man was hurriedly removed to his home at 2002 South Twenty-fourth street and medical ail summoned. Several stitches were taken in the cut which did not prove serious. Had the blow struck a few inches higher it is thought that a fracture would have resulted. Mr. Routt is reported to be slowly improving.
