Dave Rowden Proud
of His Turnip Patch

(From a Staff Correspondent.)

LINCOLN, Nov. 15.—(Special.)—Colonel Dave Rowden, commandant of the military police, walked into the office of the State Board of Control this morning swinging a couple of turnips which he had raised in the garden of the home to his year. One of them weighed five pounds and the other four and one-half. They are of the common round variety and are a part of a crop of about fifty bushels, the seed for which was sown July 25.

The home farm consists of nine acres and Colonel Dave has been able to produce 60 bushels of potatoes and 325 bushels of corn from the tract besides other crops of a minor nature. The colonel feels proud of his farm and thinks other state institutions will have to go some to beat his record on a nine-acre tract.

HALL DISTRICT COURT
CLEARS CRIMINAL DOCKET

GRAND ISLAND, Neb., Nov. 15.—(Special.)—As a result of the clearing up of the criminal docket in the district court the latter part of the week several men have received penitentiary, jail sentences or fines and others are yet to be sentenced. In the case against Gus Krueger, for tampering with the city electric wires, there was a disagreement of the jury and the case will very likely be tried again in view of the rumor that ten stood for conviction from the beginning and two held out. Harry Faxton pleaded guilty to forgery and received a penitentiary sentence of not less than six months or more than ten years. George Goodenough pleaded guilty to maintaining rooms for gambling, but the man who furnished the evidence was severely criticised, he having sat in the game and lost. Charles Monroe pleaded guilty to burglary, but stated that he had done so while under the influence of liquor. The man was the support of a sister, showed a good record and the recommendation of the state attorney of nolle prosequi was carried out under pledges of good behavior.

Box Butte Potatoes
Show Great Yield
Present Season

HEMINGFORD, Neb., Nov. 15.—(Special.)—Farmers here have succeeded in digging their large potato crop and storing it without a particle of frost. It was hard to get during the digger season, but the heavy frosts held off till very recently. The Hemingford farmers have turned their attention to a few years to raising the Bliss Triumph variety of potatoes and are rewarded this year by receiving more than double the price of the old standby of former years, the Early Ohio. These are bought to go south for seed and are not required to be sorted as closely as table stock, hence the farmers can sell a larger proportion of the Triumphs, and they yield more than double the Ohio yield. The Ohio are now only about a third of the production, and it is likely that they will not be raised here to any great extent in the future.

With the cellars recently built there is storage here for about 1.0 car, not considering dozens of cellars on the farms close in that will hold eight to fifteen cars each. Albert Miller Co. of Chicago have just finished a new cellar which will hold about sixty carloads. This is in addition to a cellar holding thirty cars which they have owned for years.

These storage cellars are on the railroad right-of-way and are convenient to load from in any kind of weather. J. G. Best & Co. of Minneapolis have just completed a storage cellar at Marsland, sixteen miles northwest of here, which will hold fifty cars. The Triumph variety yielded this year about 300 bushels or better to the acre, the White Globe 175 and the Ohio about 115 bushels to the acre. The fact it is entirely free from frost adds greatly to the value of the potato crop.

Small grain is very good and grades very high. The corn is disappointing and probably 50 per cent is soft and of little value.

Cattle are about all shipped and good prices have prevailed. Horses are much scarcer than a year ago, most of the stuff fit for war purposes having been sold.

GETS BLANKS OF MR. POOL

(From a Staff Correspondent.)
LINCOLN, Nov. 15.—(Special.)—Peter Boland of Omaha was at the state house today and secured filing papers to enable him to file for the democratic nomination for railway commissioner.

Mr. Boland has not fully made up his mind to file, but secured the blank forms that he might act quickly if the spirit moved in that direction.

It is said that Mr. Boland will be up against a ruling alleged to be made by the Omaha & Council Bluffs street railway company about two years ago, that any employee of the company filing for a political office would lose his position with the company. Mr. Boland is an employee of that company.

TODAY'S BEAUTY
SUGGESTIONS

Face powder simply covers up an unattractive complexion and leaves no lasting benefits. Those who have tried a simple spumax face lotion find it much better, as it removes skin discolorations, such as freckles and tan, and makes the skin smooth, white and velvety. This lotion is made by dissolving four ounces of spumax in one-half pint hot water, then adding two teaspoonfuls glycerin. This complexion beautifier does not rub off or show like powder, and gives a more refined appearance. It removes both shininess and sallowness, rapidly giving the skin a permanent healthy, youthful appearance.

An especially fine shampoo for this weather can be had at trifling expense by dissolving a teaspoonful of canthrox in a cup of hot water. Pour slowly on scalp and massage briskly. This creates a soothing, cooling lather that dissolves and removes all dandruff, excess oil and dirt. Rinsing leaves the scalp spotlessly clean, soft and pliant, while the hair takes on a glossy richness of natural color, also a fluffiness which makes it seem much heavier than it is. After a canthrox shampoo arranging the hair is a pleasure.—Advertisement.

How Russia Censors
The Literary Digest

There is a striking example of the methods of the Russian press censorship shown in THE LITERARY DIGEST for November 13th. The article is illustrated by "before" and "after" pictures and the American reader is enabled to judge for himself how the great Russian Empire of 175,000,000 people is protected from the "Digest's" fell influence. It also gives examples of some of the whims of the British press censorship. The article is not, by any means, the most interesting feature in this number of THE LITERARY DIGEST—for there are also these:
