WILSON "MILLING" **OUT HIS MESSAGE**

President Has Decided on Chief Features and Writing Document on Typewriter.

WILL SPEND ALL WEEK ON IT

WASHINGTON, Nov. 22 .- President Wilson will put aside practically all other public business this week to devote his entire time to completing his third annual message to congress, which he plans to read personally at a joint meeting of the senate and house on December 7.

The president has decided on the chief features of the message after careful consultation with close advisers and is now writing it out on his typewriter. No attempt is being made to deal in the document with all the public questions pressing for solution, for the president plans to read special messages to congress as occasions arise.

Hold Long Conference.

Representative Fitzgerald, chairman of the house appropriations committee. held a long conference with the president tonight and urged him to include in the message an outline of methods considered best for the raising of revenues to meet the appropriations deemed certain to greatly be increased on account of the national defense plans,

Mr. Fitzgerald directed attention to an amendment to the aundry civil bill of 1906, which provides that in case the estimated appropriations exceed the estimates in any year the president may advise the congress how, in his tudgment, the estimated appropriations could with least injury to the public servicebe reduced so as to bring the appropriations to the required estimates, or if such reduction be not in his judgment, practicable, without undue injury to the public service, that he may recommend to congress such loans or new taxes as may be necessary to cover the deficiency.

Two Views of Matter. The view was taken by Mr. Fitzgerald that the president should at least indicate generally how he thought the needed money might be raised, and it was considered probable tonight that this will be done. Other advisers of the pres dent, however, have told him that since revenue measures must originate in the house, he ought not to appear to try to usurp that power.

Mr. Fitzgerald, Senator Underwood and a number of other leaders of congress on the democratic side are known to be opposed to bond issue to pay for the army and navy increases for the expenditures for the purpose will have to be continued from year to year.

The President's Program. Although the president may not refer to all of the subjects in his message at the opening of congress, the program which the administration hopes to see disposed during the comming session in-

cludes:
Stringthening the army and navy in accordance with the plans outlined by Secretaries Garrison and Danlels.
A merchant marine bill.
Rural credits legislation.
Ratification of the Haitien, Colombian and Nicaraguan treaties.
The bill to give a greater measure of self-government to the philippines and promising ultimate independence.
Conservation measures which failed of final passage at the last session. Conservation measures which failed of final passage at the last session.

Amendment of the anti-trust laws so as to allow the use of common selling agencies abroad by American exporters.

Legislation to protect the American market against "dumping" of cheap forceign products following the European way.

Amendment of the Sherman anti-trust is so as to give the federal government more power to prosecute plots to inter-fere with American commerce by blowing up factories and ships.

The administration also is interested in the efforts to establish a budget system of co-ordinating expenses and reverule for the senate.

The president, however, is not expected

ination for United States senator, any statement made by me, at this time, should relate to national affairs.

The Tariff.
"The tariff will be the paramount issue in the coming presidential campaign. On that issue the two great parties decisively disagree. The republican party will adhere to and advocate the policy of protection to American industries; and the democratic party, without a definite plan, will try to raise revenue by im posing unusual, burdensome taxes on American enterprise. We are at peace with all the world; but, nevertheless, we are subject to war taxes, imposed upon us by a democratic administration. Taxes are levied, not only upon property and assets, but upon liabilities as well. The industrious citizen who borrows money for his business is taxed for that privilege. The present method of raising the nues of the government and in a cloture | necessary revenue for the government is not a system; it is a patchwork process It starts nowhere, leads nowhere, and to take a direct part in the cloture gets nowhere. When the republican party went out of power, the treasury was full; now it is nearly empty. If our factories were not furnishing munitions of war, and our farmers were not supplying Europe with farm products for war purposes, our industrial and commercial con-River Mouth Town dittons would be similar to that existing, under the democratic administration prior to election of McKinely in 1896. trade relations with other countries, and especialy with South America. We are a producing country, and the surplus products of the farm and the factory should find a ready and profitable foreign market. To bring that about we must restore American ships to the high seas. This need not mean the granting of subthis no greater enemy than con- sidies to private lines; but it does mean the creation of conditions favorable to the stomach sweet. Hver active, bowels the development of our shipping interests. regular and banish billiousness, sick A farmer could not successfully manage hendaches, sour stomach. Stout persons his farm were he dependent upon his headaches, sour stomach. Stout persons are neighbors wagons to hauf his grain to welcome the light, free feeling they give. neighbors wagons to hauf his grain to town; and this nation can not

its citizens their proper share of commercial and industrial growth, without providing American vessels to carry abread the products of their energy and enterprise. There are many ways in which ships may be provided, but they must be built, manned and maintained, if we are to live up to our responsibilities and our opportunities.

The Navy. "When we take our proper place as a great commercial and industrial nation. we must have a navy powerful enough to protect our commerce and our coasts. The dreadnaught seems to have had its day. The submarine and the aeroplane have come to stay. We should be careful not to sink too many millions in old line battleships, but we should build a navy, efficient for defense along modern "We have no need of a large standing

army. We do need to provide the material and the machinery for the creation of an army. When the European war is over, the nations engaged in it will be exhausted physically and financlally, and we will be safe from attack for a generation, or for a decade at least. It is not the immediate future, but the more remote future, for which we must prepare. Why not provide military training for the boys and young men in the high schools, normal schools, colleges and universities of the country? The government could furnish the instructors and the equipment; otherwise there would be no expense. The training should be voluntary, so that it would be optional with the student and his parents, to take it or leave it. Nearly all of the students would take it. Such a course would istration has been less fortunate. It is strengthen the boys physically, men- difficult to see wherein Carranza is any tally and morally. Irrigation.

"A more liberal policy should be adopted by the government towards the farmers owning and occupying land in irrigation districts. Millions have been "War is the worst of the remaining spent on rivers and harbors, the Panama canal and other works of internal pended. It is different with irrigation.

able and unjust. The farmers should pay for water privileges, but not on the basis of total cost. Irrigation is in a measure for the benefit of the whole country. It increases production, plants bomes in otherwise arid territory and builds no agricultural communities. We all share to some extent in the bencsits and we should bear our proper pro-

cortion of the burdens. Rural Credits.

"The government should assist lu the stabilshment of a system of rural credits at reasonable rates to enable the - rmers to develop more fully the agricultural resources of the country.

In becoming a candidate for the republican nomination for United States senator I realize to the fullest extent the importance of that great office. For almost thirty-three years I have been a resident of Nebraska and during all that time I have taken an active interest in the welfare of the state. I have been in many republican campaigns, and in 1911 I served as chairman of the republican state committee, when the entire repuls-Hean state ticket was elected. In the Fifty-ninth congress I represented the second district. That congress was paricularly noted for much constructive legislation. My experience in the house should make it possible for me to render more efficient service in the senate."

Child's Tongue **Becomes Coated** If Constipated

If cross, bilious, sick, feverish, or full of cold, take no chances.

'California Syrup of Figs' can't harm tender stomach, liver, bowels.

Children love this "fruit laxative," and

nothing else cleanses the tender stomach, liver and howels so nicely. A child simply will not stop playing to empty the bowels, and the result is, they become tightly clogged with waste, liver gets sluggish, stomach sours, then your little one becomes cross, half-sick, feverish, don't eat, sleep or act naturally, breath is bad, system full of cold, has sore throat, stomachache or diarrhoea. Listen, Mother! See if tongue is coated, then give a teaspoonful of "California Syrup of Figs," and in a few hours all the constipated waste, sour bile and undigested food passes out of the system and you have a well, playful child again. Millions of mothers give "California Syrup of Figs" because it is perfectly harmless; children love it, and it never fails to act on the stomach, liver and

today are worth hoking over. You are doing yourself an in-justice if you fail to share in the opportunities offered.

"PREPAREDNESS"

In times of peace, nations prepare for war. "Preparedness" is an insurance policy to protect from possible assault.

States and cities "prepare" for possible emergencies, by enacting and enforcing laws for the benefit of their citizens.

Individuals should prepare for the future, profiting by the wisdom of the organized citizenry and patterning after its example.

Are you personally—and is your business—prepared for trying industrial times?

The best preparation that any individual can possess-preparation to protect his personal and his business interests—is to maintain a maximum of money in constant circulation through home channels.

By purchasing Omaha-Made Goods you keep Omaha money at home and at work—you prepare for the emergencies that adverse business conditions may bring at any time.

The free circulation of money from one Omaha business house to another, eliminates to a great extent the sending of our money to other cities—building them up to the detriment of Omaha. Keeping our money at home, brings prosperity to each Omaha business and to each individual-whether he be a manufacturer, a retailer, a professional man or a laborer.

And then, by purchasing Omaha-Made Goods you not only help to bring prosperity to our door, but you secure better quality for the same money-or the same quality for less money. No heavy transportation expenses are included in the cost of Omaha-Made Goods. You secure a maximum of quality at just the cost of the goods plus an honest profit for the man who makes them.

How can any citizen of Omaha-how can YOU-whose interests are common with our own, afford to buy any but Omaha-Made Goods?

FDRESS IN STYLE and COMFORT THIS WINTER= By Patronizing These Manufacturers

Omaha women who are particular as to the style and service-giving value of their fur garments, should patronize

The National Fur and Tanning Co.

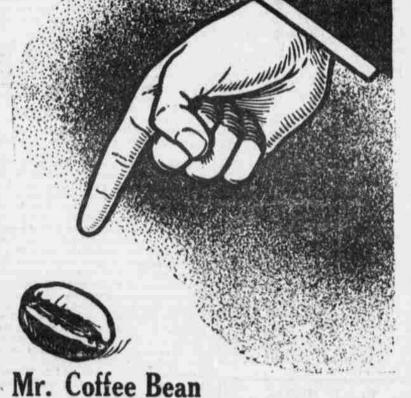

The highest possible service at reasonable prices, is guaranteed by the modern facilities of this well known company. Either it will make up furs you may own according to your direction, or it will furnish high grade furs to suit your demands.

Either the snappy New York styles or the more conservative shapes can be found in the hats and caps made by

The Omaha Hat Factory

Every desire has been anticipated by this company and they have designed a hat for every wearer, regardless of his tastes. And then, too, the high quality of materials and the care and skill in making, coupled with the reasonable cost, insure utmost satisfaction.

Always Talk, Use and Serve Omaha-Made Goods

Seems to be having a hard time of it these days.

He has been found out. Some coffee concerns have tried to rid him of caffeine, a powerful, habit-forming drug, but without full success and in so doing have partially destroyed his only redeeming feature, pleasant taste.

Coffee is becoming more and more unpopular with thinking people everywhere. They are finding out that its drug, caffeine, a a frequent cause of headache, nervousness, biliousness, and

various other ills.

The point is—can you afford to risk health and happiness for a few cups of coffee? The wise thing is to quit coffee and use
