### OTHER SYSTEMS ARE TIED UP

NEW YORK, Nov. 27 .- The Delaware, Lackawanna & Western railroad, whose lines are choked as far back as Scranton with loaded freight cars it cannot move, today instructed its agents to accept no more freight for export until further notice.

More than 6.000 loaded cars from the west, all containing grain, feed, flour, copper and hundreds of other commodities, have virtually turned the terminals and sidings of the road into a storage warehouse for weeks. Some of the cars have been here for eighty days.

Cars Are Everywhere. Inquiry at other railroad offices developed that nearly every road with a terminus here is glutted, with freight cars standing loaded and idle on sidings for hundreds of miles back along the line and that other roads would follow the Lackawanna's lead shortly.

For months New York, mouth of the bottle through which pours the great bulk of America's export trade, has been clogged with freight in excess of the cilities of the steamship companies atempting to handle it.
