GERMAN MARKS TAKE BIG DROP

Kaiser's Medium of Exchange Depreciates Over Twenty Per Cent in Wall Street.

WORTH 19 5-8 CENTS NOW

BERLIN (by Wireless to Saville, Dec. 3.—The latest performance of the British censors is to attempt to render impossible transmission of cable news concerning the American stock exchange, to the European continent.

NEW YORK, Dec. 2.—Further depreciation in marks here today to the lowest rates ever quoted drew renewed attention to the anomalous economic conditions which are said to prevail within the German empire.

Can Give No Definite Reason. Dealers in exchange won't be able to advance any definite reason for the steady decline in the value of German currency.

Work of Enemy. PARIS, Dec. 3.—Fantastic predictions as to the total absorption to the new French "victory loans" are thought in official circles here to originate in a scheme concocted by the enemies of France to discredit the success of the loan by over anticipating it.

A striking feature in the formidable impetus the movement still shows among small subscribers. The postal savings bank is besieged by long lines of workers and children waiting their turn to transfer the thin, little balances into new bonds.

Leading Sales of Red Cross Seals Will Get Pennant

The states, cities, towns and villages selling the largest number of Red Cross seals per capita will be given pennants in their respective classes by the American Red Cross and the National Association for the Study and Prevention of Tuberculosis, as announced in a bulletin issued today.

A handsome silk banner in red and white will be awarded to the city, village, town or county anywhere in the United States and territories which shall make the highest score in sale per capita in its class.

Last year's pennant winners were: Pittsburgh, 2,336; Rochester, N. Y., 2,114; Troy, N. Y., 1,813; New Rochelle, N. Y., 1,787; Charleston, W. Va., 1,766; Sewickley, Pa., 1,674; Garden City, N. Y., 1,490.

Charged with Murder. SALT LAKE CITY, Dec. 3.—Herbert R. Marshall of Salt Lake City was arrested at Sabetha, Kan., today at the request of the Salt Lake City police on a warrant charging him with the murder of his wife here Sunday.

Want Six-Foot Channel. QUINCY, Ill., Dec. 2.—Resolutions were adopted at the closing session of the Upper Mississippi River improvement association tonight reaffirming support in the government plan for a six-foot channel from Minneapolis to the mouth of Missouri river.

MILITARY DEFENSE BIG PROBLEM IN CONGRESS—Secretary of war and committee chairmen who will figure prominently in preparedness plans.

LAUNCH A MOVE TO ORGANIZE FARMERS

Markets and Credits Meet Votes to Create Committee to Gather All in America Into Fold.

BIGGEST CO-OP THING IN WORLD

CHICAGO, Dec. 3.—Resolutions creating a central committee to organize the farmers of America into co-operative societies covering every farm product from poultry and garden truck to grain and live stock, and operating in each of the forty-eight states, were unanimously adopted today at the closing session of the National Conference on marketing and farm credits.

On Permanent Basis. The plan provides first for the forming of an agricultural society on a permanent financial basis which shall have charge of the general organization and educational work.

Prominent among those who stand sponsors for the movement are: Clifford Pinchot, Philadelphia; Sir Horace Frank, Ireland; Harris Weinstock, San Francisco; M. Toussley, Minneapolis, secretary of Right Relationship league; John Lee Coulter, University of West Virginia; Frank L. McVey, president of the University of North Dakota; Alexander E. Canoe, professor of agricultural economics, Massachusetts State Agricultural college; H. W. Danforth, Washington, Ill., president of the National Council of Farmers Co-operative associations; James Caldwell, Lake City, Minnesota; Clarence Ousley, Agricultural College of Texas; Agriculture Commissioner Fred W. Davis of Texas; Chas. W. Dillon, Kansas; Lou D. Sweet, Denver, Colo.; Henry Wallace, Des Moines, Ia.; John R. Commons, University of Wisconsin; G. R. Hill, banking commissioner, Idaho; Edward M. Wood, University of California; Hector McPherson, University of Oregon; State Market directors of twelve other states.

Purposes of Organization. The purposes of the agricultural association to be formed are defined in the resolutions adopted as follows:

To examine into the production and distribution of farm products with a view of evolving a system of greater economy and efficiency in handling and marketing the same.

To encourage and promote the co-operative organization of farmers and of those engaged in allied industries for mutual help in the distribution, storing and marketing of the produce.

To furnish instructors and lecturers upon the subject of co-operation among farmers, auditing and accounting experts, and legal advice on matters relating to organization.

To encourage and incorporate with government departments, educational institutions, societies, educational centers, etc., in all efforts to solve the questions of rural life, rural betterment and agricultural finance and marketing and distributing of produce and special applications of the facts and conditions existing among farmers of America and to the solution of the problem of the increasing cost of living.

To investigate land conditions and land tenure with a view to working out better, more equating and fairer systems of dealing with this problem so vital to the social and economic well-being of the country.

To call from time to time such conferences or conventions as will help to carry out the above mentioned objects.

Herrick on Credit System. The theory that conservative associations can not be used for profit making, as exemplified by the laws of the various states, is wrong and should be corrected, said Myron T. Herrick, former ambassador to France. Before making this point Mr. Herrick reviewed at great length the efforts to establish agricultural credit systems and, as in previous addresses by him on this subject, said that the movement had "taken on such socialistic tendencies that it will likely be written out of existence."

Drugs never build up a worn-out body—only food can do that, and the first thing to take after any sickness is the concentrated, blood-making oil-food in Scott's Emulsion, which feeds the tissues, benefits the blood and strengthens both lungs and throat.

Physicians prescribe Scott's Emulsion after sickness. Nurses everywhere advocate it. Scott's is pure medicinal food, without alcohol or drugs.

Metz Do Much Better Than During Tourney

The Metz team broke all of this season's Omaha league records when they knocked down the pins for a 3,002 total on the Huntington alleys. They were pitted against their ancient rivals, the Storz, and came out on top with a three-game victory. With a 962 start they came right back in the second game and rolled the Omaha league's high team game for the season with a 1,084 count. They kept up their pocket pounding in the third and chalked up another big game with 1,066.

Joffre Given More Frenchmen to Rule

PARIS, Dec. 3.—General Joffre has been appointed commander-in-chief of all the French armies except those in North Africa, including Morocco and dependent military colonies. President Poincare signed the decree today.

Co-operative Terminal Elevators

James Boyle of the University of North Dakota said that state-owned elevators would not in any sense cure the evils in marketing complained of by grain growers. He held that self-help is better than government subsidy, and that the co-operative terminal elevators is the next logical step. He said in part: "When grain prices are high, farmers are satisfied; when grain prices are low, they blame, to a large extent, the terminal elevators. Yet if the government would build 100 terminal elevators and furnish free storage, it would likely not change the price of grain by 1 cent a bushel. World markets, operating under known and anticipated conditions of supply and demand, determine grain prices in the last analysis."

Tenants Not Co-operators

B. H. Hubbard of the University of Wisconsin, said the increase in the percentage of tenant farmers was a serious problem in that it makes for less efficient farming and more wasteful marketing. He added that tenant farmers "drift," and concluded: "Where the tenants are more numerous than the landowning farmers this is almost a fatal weakness, since one of the fundamental principles of successful marketing organizations is stability of membership. There cannot be stability of membership where the majority of the
