

Do You Want To be Well Or Sick

Of course I want to be well. Do you think I am trying to beat some sick benefit insurance company? You will look a long while before you will find anybody who will admit that he does not want to be well.

DEADLY WORK OF AUSTRIAN GUNNERS

Shot and Shell from Guns Accurately Aimed Destroy Buildings Five to Eight Miles Away.

NOTHING CAN RESIST FORCE

(Correspondence of The Associated Press.) TARNOW, Austrian Galicia, June 7.—The German forty-two centimeter mortars, with which Liege was battered into submission, are declared not to have been as effective as the Austro-Hungarian weapons of the same caliber—two of which were used against the Russian troops in Tarnow in the great May victory in west Galicia. They have left a few, but unmistakable signs of their power, in the shape of demolished houses and big craters in Tarnow, fired at range of from five to eight miles.

The first shell, landing in the city at the time it was occupied as a Russian headquarters, caused the Russian general and his staff to abandon their comfortable quarters in Tarnow, the largest city in the radius of many miles, and decamp to a spot ten miles to the rear. Thereafter the Austrians fired only five shots from their big mortars into the city, for it is, after all, an Austrian town and they had no desire to damage unnecessarily their own property.

Shells Drop into Supply Trains. As the advance Austro-Hungarian army slowly pushed forward against Tarnow—the spot to which the Russians clung longest during the big May battle in an attempt to save the enormous quantity of supplies stored in this vicinity and to give other parts of their army a better chance to retreat undisturbed, the big sixteen and one-half-inch twins were taken over to spots from which they could drop shells into the supply trains and on the men attempting to save the stores.

The correspondent of The Associated Press, now visiting the battlefield in western and middle Galicia on which the great victory of the allied, German and Austro-Hungarian armies was won, has not been permitted to see the new guns, but he has seen the sites from which they were fired and the destruction caused by the shells. At one place the guns were concealed behind a village, where the glazier is now replacing window panes destroyed by the concussion of the discharge. At another place the guns were emplaced near a railroad station—this spot having been chosen for convenience in erecting the guns in their foundation of cement in the third site they were located in a valley.

Strike True to Mark. In Tarnow one shot struck, apparently by error, a peasant's house of brick. It is now a mass of bricks, curiously level with the ground, house and all having apparently been swallowed up in the crater made by the bursting shell. Three persons were killed in this house. A block away is one of the city schools, which the Austrians believed rightly was being used as quarters for Russian soldiers. A gaping rift, thirty feet wide and extending from cellar to roof of the four-story building, shows with what precision the gunners found their mark.

A second school building, a half mile away, was hit squarely on the roof. The wall on the side toward the court yard is torn out bodily. On the side facing the street a hole twenty feet in diameter was carved out neatly in the thick brick and concrete wall, the aperture being as nicely rounded as if the circle had been laid out with a pair of compasses. The brick work circle came out with such accuracy and force that it has left its imprint, again as a carefully rounded semi-circle, in the high ribs of ground run before the school building. The roof is, of course, gone and from various windows the interior woodwork projects in tangled masses.

Horses and Men Blown to Pieces. Another shell struck the cavalry barracks in the great court yard in which Russian soldiers at the moment were hastily loading supplies for the retreat. Horses and men were blown to pieces by the air pressure from the explosion or killed by the shower of bricks, roof-tiles and fragments of shell. In the low one-story building surrounding the barrack square, is at one point a great gap which the correspondent paced out as twenty-four yards wide—the measure of the force of the explosion.

The new forty-two centimeter shells weigh over 2,000 pounds—more than those of the Krupp gun, and each shell costs over \$500.

FRENCH SOLDIER-PRIESTS GIVEN PRAISE BY COUNTESS

(Correspondence of The Associated Press.) BOULOGNE, France, June 11.—A tribute to the soldier-priests of France is paid in a pamphlet just issued by the Countess de Courson.

MANCHESTER TAKES DOCK WORK FROM LIVERPOOL

(Correspondence of The Associated Press.) MANCHESTER, England, June 7.—Owing to pressure to secure discharging facilities at Liverpool several other firms have been approached by owners of shipping arriving in Liverpool to divert their

Omaha Boy Works Way Through School to Enter the Ministry

To rake leaves, mow lawns, and turn flapjacks in restaurants for one's subsistence, when offers to teach on a salary, offers to preach on a ministerial stipend, and offers to go into a military or naval career, are constantly beckoning a young man, is an evidence that a man has a purpose in view.

Claude L. Peake

Claude L. Peake, son of Mr. and Mrs. Charles A. Peake, 194 South Thirty-fifth street, Omaha, is such a man. No, sir, the purpose he had in view was not to become a landscape gardener, or an expert in the construction of lawn mowers. Neither was he seeking to qualify as a Delmonico cook.

He was pursuing a series of courses in education that would finally retrace him out into shape to hold a high position in the educational world. He comes from a race of teachers. His father and grandfather were teachers, and all but one of the uncles and aunts on his father's side were teachers. Even his sister, Miss Glenn May Peake, is today a teacher in the Omaha schools.

Works His Way Through. For nine solid years Claude L. Peake has washed dishes, served soup, cut kindling and tended furnaces in Depauw, Ind., and Boston, Mass., while he heaped degrees after degrees of scholarship upon himself. In those nine years he has refused an appointment to the Annapolis Military academy, refused a position as instructor in the Depauw Methodist college, refused to remain permanently in the employ of the Western Union Telegraph company, refused a permanent place as instructor in Dummer Academy in Massachusetts, refused to remain in the mission work in the churches of Boston and refused to continue preaching at Ralston, Neb.

This is merely his record of refusals. A few days ago he was graduated from the Boston university, School of Theology. This gave him the crowning degree of a long chain of weary college degrees he has gathered into himself.

Goes to Bolivia. Then came an offer he did not refuse. He is to sail in July for La Paz, Bolivia, on a five-year contract as a professor in the big Methodist Mission school at that place. How many more degrees he would have insisted on acquiring no one can say, but the little winged god—master of the destinies of strong men—stopped in Mr. Peake was mastered, and on July 15 he is to marry Miss Frances Cooke of Boston at the Cooke summer home there. Soon after the marriage, the young people are to sail for Bolivia for their five years of work.

Young Mr. Peake returned to Omaha Saturday for a short visit with his parents before sailing for South America.

Omaha High School Graduate. The young man has innumerable friends in Omaha, having been reared here. In 1908 he was graduated from the Omaha High school. He was captain of Company A of the High School Cadets that year. It was upon his graduation here that he was offered the appointment to Annapolis Naval academy, which put him in a position to make an early choice of a career. On refusing this he went

back to Manchester. A trial was made last week with the Norman Monarch, from New Orleans with 5,388 bales for Liverpool and 4,778 bales for Manchester, the steamer coming up the canal direct and discharging the whole of the cargo here. Liverpool authorities now fear this arrangement will be so advantageous that other shippers will follow suit and use Manchester more freely, thereby reducing Liverpool's income from dock dues, wharfage and ship stores.

Norwegian Press Criticizes Germans

(Correspondence of The Associated Press.) CHRISTIANIA, June 11.—The Norwegian press is taking a strong line on the German ambassador to Norway, in addressing the Norwegian people through the General Press bureau in a letter at which the newspapers took offense, has been even more widespread than was indicated in the cable reports.

British Sea Lord Clever Inventor

(Correspondence of The Associated Press.) LONDON, June 11.—Admiral Sir Henry Jackson, who has just succeeded Lord Fisher as first sea lord of the British admiralty, has long been known here as "the cleverest man in the navy." He is the only naval officer who has been honored with election as a Fellow of the Royal society, this high scientific honor falling to him in 1901 for his researches in electrical physics.

Health is the Sunshine of Life

Health is the sunshine of life. It is the foundation of all our happiness and success. Without it, we are like a plant without water, or a lamp without oil. It is the key to a long and fruitful life.

WOULD END MONOPOLIES TO FURTHER ENLISTMENT

(Correspondence of The Associated Press.) LONDON, June 10.—"Am I going to join the army and allow monopolists to grab our food supplies and make it well nigh impossible for my dependents to exist?" is the question that young men ask who have held back from enlisting, declared A. J. Williams, organizer of the National Union of Railwaymen, before a labor conference at Cardiff. To break up the present monopolies, Williams moved resolutions addressed to the government, which were unanimously passed.

SUN BATHS ARE GIVEN TO THE WOUNDED SOLDIERS

(Correspondence of The Associated Press.) PARIS, June 7.—Sun baths for the treatment of wounded soldiers are said to have greatly facilitated the healing of wounds. Monsieur d'Arsonval recently explained the system devised by Joseph Vallot to the Academy of Sciences. The patients are sheltered from the wind and they receive sky radiations as well as rays of the sun, the air being raised to a temperature of from 100 to 120 degrees Fahrenheit. These conditions are obtained by the use of absorbing screens of canvas painted white and stretched on wooden frames. The bath is formed by three vertical screens six feet high and five feet wide set at an angle of 100 degrees so as to reflect the sun's rays inside, the top being left open.

WAR PUTS AN END TO NEARLY ALL STRIKES IN GERMANY

(Correspondence of The Associated Press.) BERLIN, June 7.—An official report on labor conditions in Germany during the year 1914 has just been issued. It shows that the total number of strikes which occurred in 1914 after the outbreak of the war was twenty-four, involving only 1,300 work people. They were all settled promptly and not a single strike was under way at the end of the year.

New White Coats in a Sale

Smart models worth \$15.00---a makers' overstock, Monday \$8.00

Dainty Summer Dresses

That really will surprise you with their beauty. The materials are polka dot, striped and imported flowered voiles, pongee and French linens; also natural Palm Beach. The many varied styles are beyond description, but they come in short and long sleeves; pleated skirts or with flounces; many are ruffly trimmed; satin or velvet belts are a pleasing feature. A few models have organdie collars and cuffs.

Most unusual \$9.75 value

Other prices where value is very obvious, \$5.00, \$7.50, \$12, \$15, \$17.50, \$22.50.

New Waists

Charming embroidered organdies, 3/4 sleeve and a new style collar—cool, airy and delightful.

Special Value in Embroidered Organdies, with Quaker collars and cuffs, dainty embroidery, some are lace trimmed. This waist will launder very satisfactorily—

New Pleasing Creations in crepe de chine, Jap silk, pure linen, French batiste, French voile and polka dot Swiss organdies. Many of them are easily recognized as high price waists. Monday at—

\$1.00 \$1.45 \$2.50

All Babies Destined to Great Achievement

To be born is to be great. For there are possibilities in every tiny human infant. And for the reason every one should remember that whatever is done to aid the mother, to relieve her of distress during her trying months, will surely be of marked benefit to the child. Among the sterling aids is a scientific natural remedy known as "Mother's Friend." It is what is called an emulsion. It is applied to the abdominal muscles, gently rubbed in by your own hand guided by your own mind. It makes the muscles pliant, they expand quite naturally and the effect upon the nerves is such that they adjust themselves to the process of expansion as that pain from this source is almost eliminated. Women who use "Mother's Friend" refer to the absence of morning sickness, they are relieved of a great many minor ailments, all apprehensions disappear and those peculiar nervous "spells" no longer disturb the night. It is what is called "Mother's Friend." Get a bottle today of any drug store. Then at once write for a most interesting and instructive book for all prospective mothers. Address: Regulator Co., 705 Lamar Bldg., Atlanta, Ga. This book explains the physical action of "Mother's Friend," tells why it enforces strength to the muscles and relieves undue strain. It also contains letters of experience from many happy mothers. It is just such a handy little book as every woman will at once recognize as just what she had always wanted to read—plain facts about herself. The book is mailed free to any address. Write for it today.

TAFT'S DENTAL ROOMS

Have You Good Teeth? Without good teeth it is impossible to masticate your food properly—therefore your digestion causes indigestion, constipation, blood poisons, pimples, headaches, drowsiness, nervousness, kidney trouble, and general tearing down of your system. PAINLESS EXTRACTION BY VITALIZED AIR. Taft's Dental Rooms 1517 DOUGLAS STREET.

KILL THAT POTATO BUG

Do it now with Sherwin-Williams Co.'s PARIS GREEN which never fails. It goes twice as fast as some of the adulterated brands. 1/2 lb. pkg., 2c; 1 lb. pkg., 14c; 2 lb. pkg., 24c; 5 lb. pkg., 46c; 10 lb. pkg., 81c; 15 lb. buckets, 21c per lb. \$2.00; 50 lb. buckets, 20c lb. \$11.20. Mail Orders Shipped Promptly per Express. Sherman & McConnell Drug Co. Omaha, Neb.
