STANDARDS ARE NEGLECTED

NEW YORK, June 12.—Dealings in stocks today would have been more impressive had the movement shown greater breadth. Most of the standard greater breadth. Most of the standard shares were neglected, activity and greatest advances again converging about war specialties and other stocks more or less remotely within that special class. For instance, federat mining and smelting common and preferred, one of the obscure issues in the Guggenheim group, scored temporary leads of twents and five points, respectively, partly as a result of the higher prices for refined copper and lead, and American Smelting, Guggenheim Exploration, Amalgamated copper and National lead rose one to three and one-half points.

In the more direct war issues, Bethlehem Steel preferred rose to the new high price of 119%, with smart advances in the common stock, New York Air-

high price of 119%, with smart advances in the common stock. New York Airbrake, General Electric and half a score of other industrial and equipments sharing in the manufacture of munitions of war. Motors were relatively inactive, though firm.

See soned railway shares, meluding I nion Pacific, Lehigh Valley New York Central and Atchison, were up a point and United States Steel also held steady until the close, when pressure wiped cut much if not all their early advantage. Reading was heavy throughout, but the the ding was heavy throughout, but the first preferred stock gained five points. The final dealings were culivened by marked activity in American Can and Central Leather, which rose from two to three points, but the list as a whole became increasingly irregular at the close. Total sales amounted to 410,000

ing the week.
