GRAIN AND PRODUCE MARKET

Good Demand and Light Receipts Send Wheat Up Cent and a Half to Four Cents.

PREDICT UNSETTLED MARKET

OMAHA, July 17, 1915. Wheat was strong today, selling from 1% to 4 cents higher. Light receipts and a good demand caused a good advance in wheat and corn. in wheat and corn.

Corn sold unchanged to a haif higher, and outs remained unchanged. Yellow corn sold at a slight advance over the white and mixed in the commercial reader. corn sold at a slight advance over the white and mixed in the commercial stades.

There were no sales of tye or barley reported and those markets were nominally unchanged.

It is the general belief of the wheat trade that until there is more settled weather over the greater part of the winter wheat country and larger receipts. an unsettled market is to be expected.

The light stocks leave the market without any balance wheel, and with many of the exporters short the cash wheat and millers without stocks, an absorption of the new offerings is expected.

Clearances were: Wheat and flour equal to \$30.00 bushels, corn, 8.00 bushels, and oats, 35.00 bushels.

Liverpool closed with wheat unchanged to \$40 higher.

Primary wheat receipts were 412.000 bushels of \$45.000 bushels and shipments of \$25,000 bush and shipments of \$25,000 bushels and \$25,000 bushe Primary wheat receipts were 412,000 bu. and shipments of 285,000 bu., against receipts of 2,450,000 bu. and shipments of 1,165,000 bu. hast year.

Crucible Steel was again the most conspicuous feature, advancing to 61, with the preferred at 104. Other issues in this class which touched quotation never before equalled included Bethlehem Steel at 191, Baldwin Locomotive at 74%, American Can preferred at 105% and General Motors at 1894.

Features of the Trading and Closing Prices on Board of Trade.

Numerous minor industrials such as Republic Steel common and preferred and Allys-Chalmers common and preferred and Allys-Chalmers common and preferred made striking gains on fairly large absorption. In fact every issue in the so-called industrial and equipment divisions of the stock list was in demand, including some stocks long dormant.

United States Steel was almost the only of the former market leaders to take part in today's movement, rising to 6, its highest quotation of the year. Steel ranked second to Crucible Steel in point of activity, but such erstwhile favorites as Amalgamated Copper, Reading and Union Pacific were inclined to heaviness, when not suffering from actual neglect. Total sales of stocks amounted to 43,000 shares. Prices on Board of Trade.

CHICAGO, July 17.—Wheat prices turned heavy today owing to a more rapid movement of the new crop. The market closed weak at % to 2% o net decline. Corn finished % off to % up; oats, 42% to % down, and provisions varying from 12% loss to a rise of 2%. July delivery of wheat showed the greatest setback, as receipts here today were materially enlarged, and the estimate was that arrivals Monday would total 250 carloads or more. In this connection, significance was attached to advices from sewthern Illinois that threshing was being rushed by means of double crews working far into the night. The trade was further handicapped by efforts to market an unusual amount of damp wheat that could not readily be disposed of. As a result of the bearish outlook, all of an early advance was wiped out and prices continued to sag the rest of the day except for a slight reaction at the close.

Buillish foreign news and predictions of rainy weather over Sunday were chiefly responsible for an upur in prices durranked second to the street of a second to according to a second to the street of a second to the second of the company's steamable holdings on lightly second to terms. Factors making for expansion multiply. Evidence is provided by such facts as considerable improvements in industrial matters, virtually full movements in finite interest of the considerable improvements in industrial matters, virtually full movements in finite interest of the considerable improvements in industrial matters, virtually full movements in finite interest of the corn matters, virtually full movements in finite interest and steel, overtime work in numerous war order lines, smart activity at ship-yards, freer distribution of seasonable goods, somewhat fairer skies alding crops, bounteous yields of foodstuffs, better collections, growing searcity of labor, slightly larger sales of steam coal, absence of strain in money matters at the crop moving season, increased construction placed to take care of war orders and some western agricultural implement makers resuming operations whereas awhile ago it seemed as though work would not be started before September. There is a notable absence of talk of shutdowns due to necessity for repairs or for vacation purposes. Irregular improvement in rallway freight tonnage, accompanied by a uniformly heavy movement of the passenger traffic, is reported. Commercial paper is not large, while low rates rule.
