United Statees Steel was strong in the face of steady offerings and metals shares made moderate gains to the accompaniment of an increased domestic demand. The improvement shown by representative railway issues accemed to have its origin mainly in more encouraging crop advices from western and north-western sections of the country. in United States CHICAGO, July 20.-The European war has caused a dearth of the common labor in the United States. Railroads are particularly affected, it was said today by Richard Knight, state superintendent of

employment agencies in Illinois. Men employed as track workers are preparing to leave to join their regiments as quickly as possible, Knight said. Thousands of Italians, Austrians and men from the Balkan states have given up their railroad work within the last few weeks, he said, and have started for their native countries.

"Reports indicate that private agencies are finding it extremely diffucult to get common lator for the big improvement jobs on railroads," Knight said, "and Y look for a serious situation in the Chicago labor market within a few weeks."
