### .401 Caliber Self-Loading Rifle As the recoil is utilized to reload this rifle, it is only necessary to pull the trigger for each shot. This makes it possible to shoot this rifle with great rapidity. The five shots which the magazine holds can be poured into an animal so fast that the cumulative shocking effect is so tremendous that it will stop almost any species of big game. Magazines can be exchanged in an instant, which makes it easy to shoot a series of shots from this rifle very rapidly. The working parts and the receiver, guard and barrel are made of Nickel steel which gives them strength to withstand the strain of such a heavy cartridge.
