like advance and provisions unchanged to like higher.

According to a well known expert here, the winter wheat crop of the United States will amount to 647,00,000 bushels, a total that, deeptic an abandonment of 3,150,000 acres, is only 3,000,000 bushels less that as estimated a month ago. Announcement of the new figures led to a general rush to sell, as long continued rains and the large acreage abandoned had caused an impression that the total yield would be scriously diminished. Moreover, assertions by the same authority were to the affect that although the milling value of the winter crop had been much impaired, the amount actually unfit for any market use was not greatly in excess of the usual percentage. The result was that quotations later showed no important raily and the close was at nearly the lowest level of the day.

Wet weather northwest, with a forecast of more, was chiefly responsible for bullish sentiment which ruled the wheat pit at the start. The movement of the spring crop, however, was of such large proportions that threatened delays falled to have a lasting influence on the market, especially after the issuance of the bearish estimates of the yield in the winter beit.

### Needs Larger House On Account of an Increase in Family

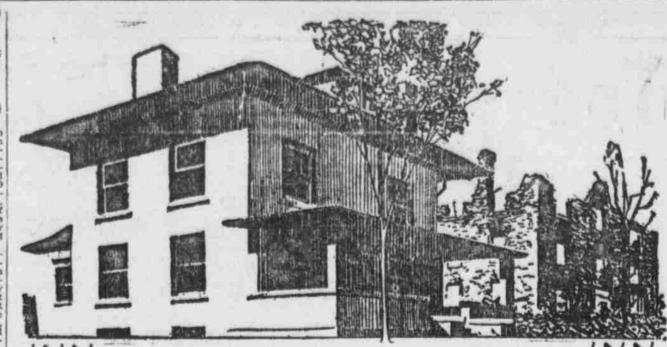

BERLIN, Sept. 20 .- The splendid country residence for the crown prince on Jungfernses, a broad arm of the Havel at Potsdam, has now been completed in the rough and will be ready for occupancy by next spring. The erection of the palace was rendered necessary, it is explained, by reason of the increase in the prince's family. The emperor supplied the money for building it and it will remain the property of the crown, to become the residence of future crown

The palace is really a group of buildfings centering upon not less than five courts and covering about 12,000 square yards. There are apartments for the crown prince himself, then for the crown princess and children; others for the of-ficials of his bourt, and still others for the servants. Not less than four ap-proaches for vehicles will be made—one for members of the royal family, which leads into the court of honor, a second for guests and the court officials, a third for the children of the royal couple, and a fourth for trades people and servanta. The buildings will be surrounded by spaclous grounds, partly terraced. There will be two so-called rose gardens, and these, as well as the rest of the establishment, will give beautiful views over the Havel lakes. The buildings are rather low and of simple outlines, with high roofs covered with red tiles. The palace will be just a good modern house, with an abundance of room and with modern comforts, which are rather scarce in the older palaces of Germany. There will be, for example, not less than twenty bath rooms.

### China Put Out by Visit of Islanders

(Correspondence of The Associated Press. PERING, Sept. 20 .- Chinese newspapers are commenting very generally on the visit to Tokio of twenty chieftains from South Pacific islands taken over declaration that it has no intention of annexing these islands by Chinese publicists. In speaking of the twenty chieftains from the south Pacific archipelago, whom Japan is entertaining, the Peking Gazette says:

"This score of simple minded islanders will be personally conducted and efficiently feasted and it would certainly not be in the least surprising if the results of all this were a demonstration of 'sincerity, frankness and friendship' on the part of these South Sea Crusoes an Fridays, expressed in the shape petition begging the mikado to be gre ously pleased to make their oural isles part of his empire."
