SAVE YOUR MONEY, JACK TELLS JESS

Parting Advice of Defeated Negro to New Champion is to Salt Down the Coin.

SEES HIM OFF AT STEAMER

HAVANA, April 7.—Jess Willard, the new heavyweight champion of the world, left Havana with his party at 11 o'clock this morning for New York, where he is due to arrive Friday at 6:30 p. m. The party will travel via Key West, Jacksonville, Charleston, Richmond and Washington. Willard's steamer was delayed two hours by the demonstrative crowds at the docks.

Jack Johnson, who came down to the steamer, shook hands with the conqueror and said: "Wishes Him Luck.

"Jess, I wish you all the luck you could wish for yourself. I hope you can make a heap of money. Be sure to save it." Willard answered with his best wishes, and said: "I will see you in Europe." He appeared to be affected by the incident.

The Cuban rights for the moving pictures of the Johnson-Willard fight were sold today for \$10,000. Although it was announced last night that the gate receipts of the fight were \$10,000, no one in Havana seems to have definite information on this point. Various stories have been given out, placing the amount at \$30,000 up to \$110,000.

The largest profits went to the race track lessee, Curley Brown, who got \$1 extra from each spectator by running a few races after the fight.

Jess Gets London Offer. LONDON, April 7.—A London syndicate has offered a purse of £4,000 (\$20,000) for a fight between Jess Willard, who won the heavyweight championship from Jack Johnson at Havana last Monday, and Frank Moran of Pittsburgh. Willard will be offered £200 (\$1,000) for his traveling expenses.

Moran was defeated by Johnson in twenty rounds on points in Paris on June 7 of last year, and on March 29 of this year he knocked out Bombardier Wells at London in ten rounds.

WHEAT IN GOOD CONDITION

Yield of Winter Wheat Estimated at Six Hundred and Nineteen Million Bushels.

SLIGHT LOSS SINCE DECEMBER

WASHINGTON, April 7.—Prospects of the winter wheat crop, planted last fall on the greatest acreage in the country's history, were that 82,000,000 bushels would be produced. This estimate by the Department of Agriculture today, passed on the condition of the growing crop on April 1, may be increased or decreased, according to the changes in conditions from that date to time of harvest.

Wheat condition was 82.5 per cent of normal against 81.3 last year and 80.1, the ten-year average.

The par, or 100 per cent normal condition of wheat on April 1 may be regarded as equivalent to approximately 75 bushels an acre planted; hence a condition of 82.5 would indicate 78 bushels, which on the 41,263,000 acres planted would give a total production of 69,000,000 bushels as compared with a final estimate of 64,000,000 bushels last year, 53,561,000 bushels two years ago, 59,919,000 bushels three years ago and 40,683,000 bushels four years ago.

Stagnant Blood Given A Quick Impulse

The appearance of pimples, boils, skin eruptions and all evidence of impure blood, calls for S. S. S. the common blood purifier. Cathartics, purges, bowel movers and laxatives won't do. No amount of bile will destroy certain germs which cause blood and skin eruptions. They are away down deep in the tissues, perhaps in the very marrow of the bones. And such a condition calls for the searching influence of S. S. S. It is indeed a remarkable remedy, since it is taken up by the blood stream and never loses its medicinal influence. On and on it goes, through and through the entire system and always with the same definite action to dislodge germs, destroy their activity and stimulate the liver, lungs, kidneys, bowels and skin to throw them out completely.

Germans No Longer Hurl Epithets at the Indian Troops

LONDON, March 27.—During the Boxer war in China the Germans applied the epithet of coolies to the Indian contingent serving with the British expedition, and the memory of that insult is one of the reasons for the loyalty of the Indian army in the present war, declared Lieutenant-Colonel A. C. Yate in a lecture before the Royal Society of Arts, at which Viscount James Bryce, former ambassador at Washington, presided.

Colonel Yate further stated that the Indian army serving in France and Flanders had even two months ago a casualty list of 10,000 names, including 388 British officers, and the contingent is not a large one. He knew of one corps which by Christmas had lost 75 per cent of its original effectives.

Viscount Bryce said the devotion of the Indian troops at the front, their courage and endurance was one of the redeeming incidents in a time so full of sorrow. This war, he thought, would create new ties between Britain and India and put the two countries on a surer foundation of mutual understanding and respect.

Speaking of the composition of the Indian army, Sir Thomas Holdich said that he did not believe that if Rumania, Greece and Italy were to join Belgium, France and Britain, would there be so large an admixture of totally distinct nationalities as may now be found in the Indian corps.

Ice is Broken by German Shells and Russ Soldiers Drown

WOENIGSBERG, March 27.—The difficulties with which the opposing forces in east Prussia have had to contend during the winter months are described by a Prussian soldier who has been through the long campaign. His company was entrenched near one of the Musurian lakes, when three Russian companies attempted a surprise attack by creeping over the ice. The assault was discovered and repelled, and the Germans were able to annihilate every member of the Russian force without leaving the trenches by the simple expedient of breaking up the ice with heavy shells, so that their opponents drowned.

Clad in their heavy uniforms and weighted down with cartridge belts, the Russian soldiers never had a chance. Before the eyes of the Germans, they clung desperately to cakes of ice, and then, one by one, sank from sight. Not a man ever reached shore.

War Forces Up the Wages in England

(Correspondence of Associated Press.) LONDON, March 27.—Members of the House of Commons who have been investigating recent labor troubles in various parts of Great Britain have received several complaints from manufacturers that the extremely high wages paid by the war office is one of the great difficulties with which they have to deal.

In a question put to the war office, one of the members gives details of such a complaint. He states that in a district of Sussex boys who formerly earned from £1.50 to £2.25 a week are getting wages which average nearly £18, and that while the standard wage for carpenters is from £7.50 to \$10 a week, the war office is paying £12.50.

The war bonus, an increase in wages which was awarded first to the railway men and miners, is now being extended to various other departments of public and semi-public employment. A sliding scale of bonuses to employees of the London subway has just been announced, to continue until the end of the war, and the London police commissioner has notified all policemen that the government will give them a war bonus of 25 cents a week, commencing from March 15, bringing their minimum wage up to \$16.75 a week.
