Swoboda's Real Name is Schwind; Native of Bremen

PARIS, April 4.-The real name of the man known as Raymond Swoboda, now on trial before a court-martial on charges of arson and espionage, is Raymond Ruff Schwind, it was developed at the hearing yesterday, according to the Journal. The prisoner, whose arrest resulted from the investigation into the fire aboard the steamship La Touraine, answered without hesitation questions asked by Captain Julian in an effort to establish his identity. This was the most important point brought out during the examina-

Schwind obtained an American passport by a subterfuge, according to the Figaro. Knowing that the municipal ecords of San Francisco were destroyed in the fire which followed the earthquake, he is said to have informed the embassy that he was born in that city. Since it was impossible to obtain proof of this statement, the embassy accepted his word and issued the passport. The paper says his conduct aroused suspicion and he was under surveillance both in Paris and in New York.

A London business man is quoted as asserting that he recognizes in Schwind a man once employed by him as a German clerk, who said he was born in Bremen and that his father was a German fiscal official.

Two Cargoes Dyes At Rotterdam to Be Sent to the U.S.

WASHINGTON, April 16.-Arrangeients have been completed for the shipment of two cargoes of German dyestuffs, which were paid for by the Amercan importers before March 1, and are now at Rotterdam.

This information was conveyed to the State department today by the British embassy. The cargoes in question are on the steamers Guantanamo and City of Savannah. According to the arrangement, these cargoes will not be interfered with by the allied fleet, providing they are under a neutral flag and consigned to Secretary Redfield of the Department of Commerce, for the direct use of the consumers of the dyestuffs.

The arrangement is understood to have been effected directly with the British government by the representatives in London of the American textile manufac turers and no provision is made for the supply of dyestuffs to the regular dealers in this country.

No less than sixteen American vessels with cargoes of various descriptions have been detained in British ports recently, according to British officials here, pers to obtain or use proper certificates down by the British government had been complied with.

Another avoidable cause of delay is said by the British officials to be failure of American shippers to separate contraband from other cargoes. These facts have been brought to the attention of the State department.
