NO WOODEN INDIANS, BUT A WOODEN HEAD

Senator Jack Grace of Harlan Replies in This Fashion to Senator Quinby.

PLEASANTRIES AFTER SESSION

(From a Staff Correspondent.) LINCOLN, April 27.—(Special.)—Senator Jack Grace of Harlan county, a member of the last and preceding senate, was a caller at the state house this morning and in a discussion of the statement made by Senator Laurie J. Quinby of Omaha that the senate had nineteen "wooden Indians" in it at the last session the statesman from Harlan remarked, "I don't know about the wooden Indians, but I know there was one woodenhead in the senate and he came from Omaha."

Grace is satisfied. Speaking of the work of the last senate, the senator said he believed the record of that body would stand up well with the work of other senates in the past.

"One thing is sure," said Senator Grace. "If the state of Nebraska had had only one body, there is hardly an institution of the state but what would have been crippled for funds to run it or have been compelled to sacrifice its efficiency because there would not have been funds to run it on a business basis."

Senate Stood Firm. The senate stood up to the rack and voted for business efficiency in the face of the fact that its members knew that the house was making a political play for no other purpose than to put the senate in the hole. We recognized the situation and instead of playing politics faced a situation which we knew was put up to us for political effect and met it and solved it for the best interests of the state of Nebraska. If we did wrong we are willing to stand on the record we made."

Kohl Backs the Record. Senator Kohl, president pro tem of the last senate, was also in the city today and he, too, stands ready to back up the work of the senate as a general thing. He was one of the members who fought the economy proposition of the house as being a sacrifice of efficiency and was rewarded by seeing the house members come to their senses and finally virtually come to the terms demanded by the senate in the appropriations. He says he does not believe the senate was composed of "wooden Indians," and does not believe that there is anything in the record which would indicate that the senate should be abolished.

Have Pure Blood

Hood's Sarsaparilla Makes Pure, Rich, Red Blood.

Your heart works night and day without a pause. It is the principal organ of the circulation of your blood. It is of the utmost importance that it should do its work well. The quality and quantity of your blood have much to do with its action. If this fluid is pure and abundant, your heart and other vital organs act with more energy than when it is defective in quality or deficient in quantity.

Hood's Sarsaparilla makes the blood pure and abundant. It is the one old reliable medicine, that has been sold for forty years, for purifying the blood. There is no better blood remedy, appetizer, stomach tonic or nerve builder. Be sure your druggist gives you Hood's, for nothing else can possibly take its place. Get it today.—Advertisement.

Motor Car Upkeep Under the Microscope

By "Utility Test" 1915 Maxwell

CHAPTER VI.

I've got to hustle, no doubt about it. Heating it Some, Maybe. Mr. Klein asked my driver, if I was showing my best speed. I don't know whether he was serious or not, but I felt a foot on my throttle and I jumped out like a shot. As I said, the roads are hard and rough, but in less than a minute I was showing better than 45 on my speedometer. That isn't a racing clip exactly, but I'll guarantee you'll never want to ride any faster over those roads as they were yesterday in your MAXWELL or any other car.

While I wouldn't say I did it (because you can't always tell what some constables will do) I do know that you can leave Lincoln and be in Omaha in two hours and thirty minutes and not jar your teeth out, either. Remember, I didn't say I did it; only that I know a MAXWELL can do it.

Yesterday's Run.

I made 152.5 miles on just a little less than 7 1/2 gallons of gas, which will figure about 20.5 miles per gallon. I haven't one cent charged up against me for mechanical trouble or tires, and only a pint of oil so far. I had to have a spark plug cleaned on Monday, and due to the bad roads and hard pulls I've had to take on water, as I told you. Incidentally, I'm pretty proud of my starter. It hasn't failed yet; and listen, it isn't going to, for it's storing up current just as fast as it is being used.

In these last six days I've added 802.9 miles to my age, and I've used 45 1/2 gallons of gas. Watch for my last chapter tomorrow.

The idea is new—the method is new, original and exclusive with W. K. Kellogg, of Battle Creek.

Try a saucerful of KRUMBLES, with cream or milk. See how new the flavor is—how pleasing—and how KRUMBLES tastes sweeter and sweeter the more you chew it!
