Put up at the same time yet note the difference!

Here, at a glance, is shown the wonderful difference in wearability between the ordinary shade and the Unfilled Grade of Brenlin Window Shades—the reason why it is in the end the cheapest you can buy.

The Unfilled Grade of Brenlin Window Shades

is made of a different material—a closely woven cloth without that filling of chalk which in the ordinary shade so soon cracks and falls out in unsightly streaks and pinholes. Sun won't fade it—nor water spot it. Made in many rich, lustrous tones and in Brenlin Duplex.

If you want the utmost in shade beauty and economy, go to one of the dealers named below and get this shade. It is perforated with this mark—BRENLIN—along the edge of every yard. Go see it today. CHAS. W. BRENNEMAN & CO., READING ROAD, CINCINNATI, OHIO.

There are two lower-priced grades of Brenlin—Brenlin Filled and Brenlin Machine Made, exceptional values.

SOCIETY HAIR STY'Y ASY TO COPY

Any of the expensive coiffures which are worn by ladies of unlimited means may easily be made by anyone who is blessed with a heavy head of hair. It is much cheaper and easier to keep your own hair long, soft and fluffy than it is to pay hair-dressers and buy transformations, switches, curls, etc. Discriminating ladies never leave the care of their hair to others. They have found that in washing the hair it is not advisable to use a makeshift, but always use a preparation made for shampooing only. You can enjoy the best that is known for about three cents a shampoo by getting a package of cantrox from your druggist; dissolve a teaspoonful in a cup of hot water and your shampoo is ready. After its use the hair dries rapidly, with uniform color. Dandruff, excess oil and dirt are dissolved and entirely disappear. Your hair will be so fluffy that it will look much heavier than it is. Its lustrous softness will also delight you, while the stimulated scalp gains the health which insures hair growth.—Advertisement.

MRS. NINA L. RICE, Proprietor.

The most scientific and up-to-date in the country. The Marinello operator is a student of faciology. In other words, she understands thoroughly the anatomy

of the face and knows at all times just what nerves and layers she is at work on. Instead of giving the same treatment for everyone, each individual is studied separately. The lines of the face are taken into consideration. The location of the muscles and nerves are studied, even character and expression are thoroughly studied before the operator begins work. She knows what she is doing all the time. The milliamperemeter, the most scientific and up-to-date instrument known, is used and the current of electricity reaches the face through the fingers of the operator. It is a most refreshing and revitalizing operation and the appliances used in this department (as is the case of the other departments) are in sterilization at all times, both when in the hands of the operator and when lying in their cases.

The Hair Dressing and Shampooing Department

Once a customer enters this department she does not leave until the work is all done without having to rise from her seat. The electric dryer is used in this department which, as is well known,

has many advantages over the gas dryer. The latter being very injurious to the hair. No appliance in this department is ever used a second time, they are kept sterilized in a 4% solution of formaldehyde and are even in a dry sterilizer when out in the air.

Manicuring Department

The system of radiant manicuring is used, the cuticle of the finger is never cut, except when extreme cases where hang nails occur. The orange stick is used on the nails, the cuticle being curved backwards by use of the electric radiant lamp. The feature about this department as well as the others is the strict attention paid to cleanliness and sterilization all appliances are kept in a 4% solution of formaldehyde and are even in a dry sterilizer when out in the air.
