LOUP VALLEY MEN BOOST NEW ROAD TO DENVER

ST. PAUL, Neb., May 12.—(Special.)—The officers and boosters for the "Central Nebraska and Loup River" and the "Black Hills and Loup River" routes met here Monday morning at the court house. In the absence of the president, Albert Thompson of Fullerton, Dr. Billings of Ord, chairman of the executive committee, president, and William C. Matley, secretary of the organization, acted secretary.

Representatives from Sargent, Loup City, Ord, Burwell, Duff, Long Pine, Comstock, Mills, Cotesfield and St. Anthony were present. Dr. Billings explained the purpose of the meeting, which is substantially as follows: There is a strong demand for a shorter route from Omaha to Denver than by the Lincoln Highway or the White Pole line. There are many who, in passing through the state, want to see the vast alfalfa fields of this section, and the line is proposed to leave the Lincoln Highway at Columbus, and from there to Fullerton, to three miles north of St. Paul, to North Loup, to Broken Bow and North Platte, making a route sixty-five miles shorter than the Lincoln Highway between Columbus and Denver. The line is all marked and in good shape from Columbus west to North Platte.

Beginning at Long Pine the Black Hills and Loup river route will run southeast through Burwell, Ord, North Loup, Cotesfield, Edna, Grand Island, Hastings and meeting the Meridian route at Bellevue, Kan. Between North Loup and the river bridge north of St. Paul the two routes will follow the same road.

The members of the board of secretaries were told that henceforth their vouchers would have to be more explicit or no warrant would be forthcoming.

The Parts of An Enger Six-50

Would Build a Much Higher Priced Car

If the parts used in the building of an Enger Six-50 were thrown into a heap, it would be possible to produce any of several cars that are priced much higher.

You will find in a number of cars they use the Continental type motor and they are priced quite a little higher than is the price of the Enger Six-50. It is customary to compare other engines as against the Continental and in looking over the Enger you will find that the parts are absolutely standard and are manufactured by a responsible and reputable company. You will also find if you compare the more vital parts of the construction, that we have used the same quality of workmanship and material that the manufacturers of the higher priced cars are using but we have lowered the price very materially.

We built the Enger Six-50 to meet the requirements of the man who wants maximum service and comfort at a minimum cost. The Enger Six-50 is not a trade proposition. We built the car and then set the price. Some manufacturers inflate their prices in order that their dealer may make an extravagant price for your old car in trading. You can be the best judge of this when you compare the Enger Six-50 in detail with any other car you have been considering, regardless of the price.

We do not ask you to buy the Enger because it is built by reputable engineers, neither do we want you to buy the Enger car because it is called Enger, but we ask you to look it over and try it and buy it because you get the most car for your money. Personally I do not think there is a car on the market that gives you more for the money than does the Enger Six 50.

We have the cars to deliver. You do not have to wait when you buy an Enger. Come and see us. Take a ride in the Enger Six-50 and get our terms and prices.
