Greater Stability During Most of Day.

FALL AWAY IN FINAL HOUR NEW YORK, May II.—Securities of all classes displayed marked stability during the greater part of today's moderately active season, but fell away in the that hour to the accompaniment of unconfirmed rumors of a disquieting character. Early gains of 1 to 2 points on standard shares and as much as 2 to 6 in the specialties melted away, the decline being accelerated by a renewal of bearish operations.

bearish operations.

The international situation was the one The international situation was the one governing ractor throughout, the list giving its that manifeatations of strength on announcement that Washington has formulated a definite policy respecting the sinking of the Lusitania. The trading element evidently chose to interpret this favorably and proceeded to buy, continuing its efforts mainly about United States Steel. The movement in this stock derived additional impetus from reports that the Steel corporation had received large orders for unfinished material from companies now filling war contracts.

contracts.

War specialties were prominent at intermittent periods, Bethlehem. Steel.

Westinghouse Electric and Allied shares being ireely absorbed at more or less steady advances.

Railroad issues of the investment class were bought, the rise in Grangers and Pacifics being based upon excellent crop prospects. Coppers also were conspicuous, the entire group moving upward on a revival of domestic demand for the refined metal.

Total sales of stocks amounted to 735,000 shares.

Routine news announced the receipt

735,000 shares.

Routine news announced the receipt of \$5,00,000 gold from France engaged a week ago by an international banking house having close relations with the Bank of France. Trade authorities issued conflicting reports as to the state of the steel and iron industry and exchange on London was more steady, while france and lires were lower. Investment conditions abroad as reported by the London market demoted hesitation by British investors. That part of the new Argentine loan offered by London bankers was closed with evident success, while an East Indian for a nominal amount seemed to find little inquiry.

Many "future" sales, indicating a re-currence of foreign selling, were recorded in the local bond market, which was firm in the main. A feature was the weakness of Argentine 5s, which de-clined 15 points. Total sales par value aggregated \$3.180,000.
