### NEW YORK STOCK MARKET

United States Steel Again is the Pivot Around Which Things Revolve.

### NEW HAVEN A WEAK ISSUE

NEW FORK, Jan. 29.—United States theel was again the pivot around which the stock market revolved today. The common stock was very extensively traded in, investly at 40, its new minimum, a few thousand shares being sold at a fraction above that price. Liquidation in that issue was on so large a scale as to represent 40 per cent of the first hour's entire business. The preferred stock also yielded part of its recent recovery.

New Haven was another weak leasue, selling off \$\psi\_2\$ points to \$\psi\_2\$, its minimum, incidentally the lowest price in the history of the company. The decline coincided with rumors that the company's application to issue preferred stock had been denied by the Massachusetts authorities.

been denied by the Massachusetts authorities.

Canadian Pacific was heaviest of all the high-priced issues, losing over 5 points on persistent selling, much of which was ascribed to European sources. The company's statement of carnings for December, indicating a net loss of over \$1.30000, was in itself regarded as aufficient cause for discouragement on the part of holders of the stock. Declines to lowest prices all around occurred in the final hour, renewed liquidation in Reading. Union Pacific and other speculative favorites producing a weak close.

In addition to the foreign offers of Canadian Pacific, sales for European interests were probably the largest of any recent day. Abrogation of the rule prohibiting sales, except for cash, has resulted in a heavy movement of our securities from abroad. This is especially applicable to bonds of speculative character.

Local banks are expected to make further cash movements from the interior, but supplies of cash at all reserve centers are now so abundant as to make quoted rates virtually neglible. Hank clearings show a decrease from the previous week, the loss being greater in the interior than at New York and New Englished points.

London reported an expansion of business, that market being assisted by the removal of our "cash" restrictions. The London exchange continued, however, to ignore the successive price reductions in Steel here.

Sted here.

Bonds as a whole were affected by the weakness of the stock list. Total sales, par value, aggregated \$1,978,000. United States is advanced 1/2 and Panama. Is 1/2 her cent on call.

Number of sales and leading quotations on stocks were:

Sales, High. Low. Close.

### Germans Arrest British Colonials

BERLIN, Jan. 29.-(Via London.)-A dispatch reaching here from Hamburg pays that all British colonials in that with the exception for the time ng of the Australians, have been arrested and transported to Ruhleben, where they are to be interned in the contration camp along with other British ns. Something like sixty Canadians are in this new draft of prisoners. The arrest of the colonials in Germany will be continued. Colonials were origlly left at liberty when Englishmen interned, but now they are to be esthered up and sent to concentration

# Unseen Dirt in Milk

"It is true that the most dangerous dirt is unseen; that is, it cannot be seen with the naked eye. Especially is this true of milk. In order to have clean milk there must be care and watchfulness all the way along the line, from the dairy farm clear into the city homes. Milk is easily spoiled. It absorbs filth and impurities when exposed to the open air."—From Chicago Department of Health Bulletin,

When cities like Chicago and every other progressive city in the country are spending thousands of dollars a year in maintaining health departments under the direction of the most capable physicians to be found, and these physicians constantly warn against the danger of disease germs found in raw milk, isn't it best for you to be guided by their expert opinion?

You can protect yourself against disease-laden milk.

Cottage Evaporated Milk answers the question. For evaporated milk is not merely a question of convenience and economy—it is a question of health.

is the milk that overcomes all danger of the transmission of disease in milk. It is perfectly sterilized and never exposed to the air until you open it.

It is made from fresh cows' milk, carefully inspected, with no preservatives and nothing added—only part of the water taken out by evaporation. Made fresh every day in sanitary, spotless condenseries in the best dairying districts of the country. Delivered direct to your grocer.

Cottage Evaporated Milk is good for any purpose now using raw milk or cream. It has more than twice the food value of bottle milk. Buy a can. Try a can.
