Overton Wins Two Games.

Batteries: Loomis, Bruner and Martin. Overton, Plympton and Thomas.

Won by the Clerks. Wen by the Clerks.

The game between the Omaha Rubber company clerks and salesmen ended with the first of the fourth, the clerks leading, 4 to 1. The salesmen had Sutey and Spellman the Alamito battery, while Andrews, former teammate, worked for the clerks. Andrews had by far the best of the pitching duel, striking out seven out of nine men up. Sutey allowed three hits and fanned three. The salesmen shored one in the second on an error and on overthrow.

The clerks stored in the first and in the third, when Andrews scored three men with a two-bagger.

Played to a Tie. The South Omaha Rambiers and the Stars and Stripes played ten innings to a 5 to 5 tie.

PUBLICITY Sure Cure for Corporate Diseases.

As Necessary as Light and Air in Mos-pitals.

The startling disclosures of corporate mismanagement in the last ten years have brought about a general feeling that publicity of corporation affairs is both necessary and desirable for the future well-being of all corporations. This publicity may be affected in many ways and should give the public as well as the stockholders such information as will eliminate all possible chance for corruption and mismanagement.

In the past, managers of some corporations have operated their business in a more or less arrogant fashion, persistently refusing to make their acts known to the public or even to their stockholders. In most instances if these operations had been made public at the time, many of the life from which they are now suffering would not have occurred, and millions of dollars of investment woulf have been saved.

The effect of corporate mismanagement is greatly manified, however, when its discovery comes too late by governmental investia tion. Generally speaking, if the facts were voluntarily made public, or if they were made known through established methods of publicity, in the regular course of business, the mismanagement of the corporation would never occur or it could be reimedied immediately and the bad effect of it would be comparatively small.

And so it is with many houses of business—in the field of commerce and manufacture. They are afraid of publicity—afraid to have their factories examined and to let purchasers verify statements or facts concerning the licity—arraid to have their factories and and to let purchasers verify statements or facts concerning the goods. The only conclusion to be reached in such case is that the manufacturer has something to conceal which, if discovered, would not bear out his assertions. which, if discovered, would not bear out his assertions.
