AUGUST SUNDAY CIRCULATION.

#### 43,961

State of Nebraska, County of Douglas, ss.

Dwight Williams, circulation manager of The Bes
Publishing company, being duly sworn, says that
the average Sunday circulation for the month of August, 1914, was 43.261.
DWIGHT, WULLIAMS, Circulation Manager.
Subscribed in ms. presegre and sworn to before
me, this 3d day of September, 1914.

Subscribers leaving the city temporarily should have The Bee mailed to them. Address will be changed as often as requested.

ROBERT HUNTER, Notary Public.

Shame on the heathen Turk for imitating Christian nations at war.

The prospects are at least good for a lot of fine frost on the pumpkin.

Doing away with gun-toting will at least re duce the hazard of being shot.

It's different when the Turk undertakes to violate or abrogate a treaty.

That dum dum bullet story may be considered now to have been exploded,

All works on "Decisive" Hattles of the World" will be subject to revision.

Oyster Bay finds the center of the spotlight pre-empted for the moment by Rustem Bey.

The superiority of The Bee's war news, and of The Bee's war photographs, is self-evident.

Up to latest accounts the indomitable General Pau was still pawing his way to the front

It is plainly evident that the most defective part of the German war machine is its publicity bureau.

This unprecedented wave of prosperity that is heralded as soon to inundate us will find a lot of us eager for a ducking.

In discussing long and short ballot, the expansive possibilities of the initiative and referendum must not be overlooked

The colonel will after all not speak in Omaha, but will make his only Nebraska appearance in Lincoln. That's a downright shame.

Our Nebraska State fair just closed did a little better than last year, but, unfortunately, last year found the gate receipts way behind.

By climbing the Colorado mountains and winping a game the esteemed Omaha ball team has proved its power of surmounting obstacles

Too bad our congressmen will not be able to distribute all those captured cannon as war trophy park ornaments for constituents at home.

Well, Mr. Bryan, we feel sure, will treat us more considerately and favor us with a speech here in Omaha, if he campaigns in Nebraska at all. THE WAR COME THE

You understand, of course, that it is Mr. Marshall, not Mr. Bryan, who was delegated to announce the president's desire for a second cup of coffee.

Perhaps those five American newspaper correspondents who managed to be arrested were merely trying to divert the limelight from Richard Harding Davis.

If all the able-bodied inhabitants of France are at war, we wonder if Monsieur Jack Johnson was able to make satisfactory terms for the gate receipts before enlisting.

Higgs string the effects of this war on some minds, an exchange is moved to dig up and reprint Bob Ingersoll's article written after his visit to the tomb of Napoleon.

The St. Joseph's hospital fair wound up, a pronounced success, netting \$4,000. In the voting con tests Conductor Winkleman of the Union Pacific was voted the lantern; Fireman Swift of the B. & M. the clock; Father Gallagher, an easy chair: Mrs. Ford, a silver tea set, and Warren Switzler another casy chair.

W. P. Mumaugh, superintendent of the farm machinery class at the state fair, was presented with a silver set by the agricultural implement men.

Mary Savage, wife of John H. Savage, died at her late residence, 842 South Sixteenth street. The notorious "Dot" Middleton is in Omaha on a visit. He is now running an agricultural warehouse at O'Neill, where it is said he goes by the name

of Mr. Johnson. Incorporation articles for the Omaha Elevator and Grain company were filed by Henry W. Rogers, D. S. Barriger and F. H. Davis.

Mr. and Mrs. Richard Brown left for Superior to visit friends and relatives.

General Manager Callaway in an interview denies the rumors of extensive removals of Union Pacific

departments heads.

A Bismarck Prophecy.

Remembering that the master mind of the last great triumph of German arms, out of which eventuated the unified German empire was Prince Bismarck, what the "Iron Chancellor" thought he foresaw with respect to the present war cannot fail to excite attentive interest. A war prophecy by Prince Bismarck is embodied in a report, just made accessible, of conversations with him in the later 80's, by an English artist, Mr. Richmond, who painted his portrait, and during the sittings came into close intimacy with him.

The occasion for introducing the subject of war was a reference to the neglect of preparation by England, which Bismarck deplored "for the sake of the peace of Europe." In his mind the natural alliance would be "England, Germany and Italy; these three powers if placed upon a permanently strong war footing, would insure the peace of the world against France and Russia." He is quoted further as saying:

My great-grandfather was killed in the French wars under Frederick; my grandfather fought in 92; my father in '15, and I have fought with the verch since '70. But in the next struggle with rance, which God forbid, we shall wait till its armies come to us. The French have raised such strong and se many fortifications since '70 that our advance would be out of the question, and we could not entertain the possibility of a successful advance as we did then. We should wait and attack them in the field, and if God gives us a chance we will deal with them as we did then.

If Bismarck's views are correctly stated, and there is no reason to doubt it, the Germans in the present campaign should have waited for the French to attack them instead of making an offensive expedition into France; upon their own ground success for the Germans would be assured, which on French territory would be doubly doubtful. But neither Bismarck nor any one else high in German councils, figured that in the fight, when it came, Great Britain was to be ranged with France and Russia or that Italy would slip out from its alliance, which unlooked for developments have plainly interfered with pre-arranged German military plans. Had Bismarck been able to see the existing alignment of the nations, his prophecy might, and doubtless would, have been modified.

#### Promoters as College Heads.

Writing in the Atlantic Monthly on "The Critics of the College," President Henry S. Pritchett of the Carnegie Foundation observes with a show of regret the growing tendency to secure "promoters' as college presidents, men who can get the money and the students. Achievement as an educator gives way to finesse in business management, and scholarship must suffer unless extraordinary means of precaution are employed. Sometimes a good dean and faculty avert the disaster. But where the president, even though essentially a "promoter," is also endowed with the functions as well as the name of his office, this may not be the case, especially if the promoter-president is keenly sensitive to all his responsibilities. This tendency has placed in the presidency of one of the wealthiest and most progressive of medium-sized western colleges a man who, while recognized as a highgrade promoter and money-raiser, is not even a college graduate, and is saved only by a master educator as dean, flanked on all sides by a strong teaching corps.

"The rage for numbers, the hot pursuit for gifts," are named by Dr. Pritchett, together with over-emphasis on intercollegiate athletics as among the demoralizing forces with which the college is beset. To keep up in the race for numbers and gifts, the promoter is maintained. and back of it all is an oversupply of colleges. It is just as true of the classical as the law or medical college, whose multiplication is being combatted by this very Foundation. In the United States we have approximately 900 colleges empowered to grant degrees. Illinois, Iowa, Ohio and Pennsylvania have more than forty each. Iowa has one for every 50,000 of population, Ohio one for every 100,000, Massachusetts for every 200,000, and New York for every 300,000. England has one degree-granting school for each 3,000,000 of its population, and the Engilsh are a fairly-well educated people.

The president of a college in a neighboring state said recently that the competition for students in his state was "unseemly and humiliating." He longed for the day when several of the colleges might be amaigamated. Undoubtedly as efficiency has been promoted by reducing the number of medical colleges, so it should be by merging many of these others, which are not doing full college work because they have not the resources to maintain their pretensions.

## Wells' Warning to England.

If England does not pull itself together and overcome its headlong plunge into national degeneracy, it will not be the fault of H. G. Wel's, its prophet, philosopher and guide. For he has given warning a-plenty.

Mr. Wells is nothing if not frank. If Americans sometimes feel the too keen sting of his criticism, let them see what he says of his own England and the English in his new book, "Social Forces, in England and America." The volume opens with a very phillipic on the English and a panegyric on the Americans. The text of the lecture rests upon M. Bleriot's aviating of the English channel. Wells was called up at his country place by telephone from a London newspaper office for an article on its meaning. True, it was a Frenchman instead of an American who triumphed in the aeroplane, but it served to remind Mr. Wells of the advancement of America also in aviating and of

the backwardness of Britain. "It means, I take it, first and foremost for us, that the world cannot wait for the English." is his book comment. Then a torrent of criticism, from which a few excerpts are quoted: It is extremely desirable that people should realize that these foreign machines are not a temporary and incidental advantage. They are just the first fruits of a steady, enduring lead that the foreigner has won.

The foreigner is ahead of us in education. He makes a better class of man than we do. His science is better than ours. His training is better than ours. His imagination is livelier. His mind is more active. His schools are places for vigorous education instead of genteel athleticism, and his home has books in it, and thought and conversation. Our homes and schools are relatively dull and uninspiring; there is no intellectual guide or stir in them; and to that we owe this new generation of nicely behaved, unenterprising sons, who play golf and dominate the tailoring of the world, white Brazil-

ians, Frenchmen. Americans and Germans fly. The arrival of M. Bleriot suggests most horribly to

me how far behind we must be in all matters of ingenuity, device and mechanical contrivance.

The British navy, Mr. Wells admits, may be an exception to this system of sleepiness rampant in the life of his country, yet with grudging sarcasm he says, "its officers are rescued from the dull homes and dull schools of their class while still of tender years." The implication must be that the navy is superior, not because of, but despite the system of British training and living.

Americans would not be so severe in their estimate of England; they leave all such rigid strictures to the noted Englishman, who is none too sparing, either, of his criticism of us-Yet we recall a statement by another Englishman in the last few years to the effect that a nation's greatness is measured by its share of world-moving inventions, and that England had not in twenty years contributed one such de-

Israel of old had its prophets who were courageous enough with it to "stand on the watch tower" and cry out the pitfalls. One of them saw decay for any nation whose young men had no visions and whose old men dreamed no dreams. We may become impatient with our didactic and dogmatic Wellses, but they are a spur to any halting nation. This curtain lecture is particularly timely now in view of the opportunity England has of testing its national fiber from a new angle.

#### A Good Sign.

In discussing the opportunity which the war will afford American playwrights, the New York Commercial remarks that perhaps the "tardy" but "great" American play will be forthcoming within the next year or so. Whether it is or not, it is gratifying to observe the constant tendency away from the "sex" play, which held too much of the boards the last few seasons. The theater-going public has been surfeited by this type of stage drivel, which never appealed to anything higher than the mere prurient in those who patronized it. It left no compensating moral lesson or effect and will pass off the stage, when it goes, as simply "good riddance of bad rubbish." The obvious fact is that the producers and exploiters of this character of stuff aimed only at money-making without either the desire or capacity for evoking any substantial or helpful response. The whole scheme of such plays, if so they may be called, rested upon a distorted philosophy of life. Falsehood permeated both conception and denouement, drawing on lurid sensualism wherever it would help to whet the appetite and inflame the passion. Of course, such "sex" plays could not last and that they are doomed so speedily is a mighty sign of the times.

#### Our Rightful Distinction.

The destiny of America leads out into the broad, rich fields of human liberty and makes this nation the chief exponent of world peace and orderly government. It is especially gratifying, therefore, that with the grim god of war devastating older nations, our proper distinction should merit the tribute, which the emperor of Germany has just paid it in addressing our chief magistrate as "the most notable representative of the principle of humanity."

The cause of humanity is all we have to serve. That we are serving it so conspicuously as thus to attract the great war lords of the world is, or should be, a matter of deepest pride to every true American, for our country is just what the sum-total of its individual citizens make it. There is no exultation over military prowess in Europe today comparable with the world's admiration of America's power to keep the peace and settle its international disputes at the court of reason instead of by the abitrament of the sword.

## Ornamental Telephone Next.

"Why should we not have telephones in decorative forms as well as electric lights?" asks the Literary Digest, advertising to a suggestion in a technical trade journal, which is wondering how the telephone has so far managed to escape the mania for combining the useful with the artistic. Contrasting the beautiful designs and striking effects which we have in our electric lamps with the plainness, almost hideousness, of them as originally introduced, the possibilities of the ornamental telephone look equally limitless. The Transmitter, the trade paper quoted, draws this imaginative picture:

Why not, indeed, make the telephone like a rose? The base could be disguised as a flower pot, the transmitter lost in a brilliant array of flowering petals, the receiver a cluster of opening buds and the receiver cord a trailing tendril. From flowers it is but a short jump to other things to appeal to the artistic taste. A lover of statuary could have the telephone for his library table fixed up as a famous general on horseback. The transmitter could be concealed in the horse's head; and the message whispered in his ear-a most appropriate place. The receiver, of course, would be the rider, and the person talking could easily imagine himself receiving a message from a courier of old. The receiver cord would serve admirably for reins. No need to stop here with the idea. A booklover could have his transmitter and receiverbound up in a couple of books. When he wanted to hold a telephone conversation he would simply pick up his cherished volumes from his desk and proceed.

But the inclination to joke about it will be quickly suppressed if we give a little serious thought to the proposal, for a hundred different ways will be opened by which the telephone could be made a thing of beauty, or part and parcel of the decorative scheme, without the slightest impairment or interference with its serviceability. If the idea is not applied practically within a very short time our expectations, based on the progressiveness of the telephone people, will be greatly disappointed.

When the United States was in the threes of civil war a fine conspiracy was hatched among European monarchs to set Maximilian up in the emperor business in Mexico in disregard of the Monroe doctrine. Being busy for the moment, Uncle Sam said he would attend to that little matter later, which he subsequently did, whereupon Maximilian's Mexican empire went into liquidation. The Turk may have found the European powers otherwise engaged just now, but they likewise will attend to his little game later.

The official initiative and referendum pamphlet is now going out to the Nebraska voters explaining the pros and cons of the propositions submitted at the coming election. If it only contained offers of a few mail order bargains or cut-price specials we believe it would command more attention

COMPARATIVE THERAPEUTICS.

When we feel alone and friendless,
When our solltude seems endless,
And the shadows' welrd suggestions leer
Us nearly to despair,
Then we think upon the ranger
In the desert, always stranger,
And a throb and thrill of social cheer
Is answer to our prayer.

When the wheels of trade are quiet, When the wheels of trade are quiet,
When the unemployed riot,
And the burdens of expense appear
Too great for us to bear,
Then we seek to help our neighbor,
Sick and needing of our labor,
And the work enough that baffles fear
Makes light our load of care.

When the weather's damp and dreary, When our baby's sick and weary. And the undertaker's stocks are dear And soaring in the air.

Then we have a convalescing
In our bones, that is a blessing,
To observe a paralytic's tear
Drop on his rolling chair.

WILLIS HUDSPETH.

# STEINWAY INVESTMENT IN PIANOS

A STEINWAY will outlast two ordinary pianos, either of which may cost nearly as much. Steinway pianos, whether five or twenty-five years old, have a cash value at the Schmoller & Mueller Piano Co.

An investment in a STEINWAY—the standard by which all other pianos are judged-insures complete satisfaction and closes the avenue to future regret. You will never be satisfied until you own a STEIN-

We will sell you a less expensive instrument now, and agree to take it back later in exchange for a Steinway, with comparatively

little loss to you. Steinway Pianos are the creation of genius. The excellence of Steinway Pianos is that SOMETHING which the genius of the builder puts into them.
