AFFAIRS AT SOUTH OMAHA Raids by Mayor's Order Give Score in Certain Quarters.

PRICE MAINTENANCE. Its Necessity to Aid Consumer.
Many big industries engaged in national trade have often in the past done openly what the small concerns in their limited fields have done secretly—varied prices according to the degree of competition at different times and places. Their object has been to secure the highest price to be had, irrespective of whether the buyer was helpless or not.

The principle of selling goods at a close margin at one place to meet or to kill competition, and charging a high price, to make up for it, where little or no competition exists, is economically wrong and unfair to the buyer. Every article offered for sale should have a uniform price plainly marked upon it.

Manufacturers will then have to see that the price of their goods is a reasonable one, so they will sell, and at the same time they will provide enough profit to pay the jobber and dealer fairly for handling the goods at a uniform price. This will insure confidence in the consumer, because he will know the price can not be cut and must, therefore, be a reasonable one to permit the goods to sell. He will buy such goods in preference to a small selling article sold at exaggerated prices.

Everybody will benefit from price maintenance in this way. It will protect the manufacturer who has built up well known brands, also the newcomer who is seeking to do so. Distributors will be protected in handling it at a fair profit, and they will not be forced, through fear of throat competition, to build up their own private brands at much expense. Flooding the market with unknown private brands brings about complexity and doubt in the minds of the consumers. Many private brands are sold at exorbitant prices, and many are of doubtful quality. It is better to eliminate thousands of the unknown brands and force the manufacturers to establish one brand for each quality of goods made by them. This will avoid confusion and complexity in the mind of the consumer, and he will use the well established brand, which are of the right quality and sold at one fair price to all.

The General says: A well satisfied customer is seldom lost. He will come back to the same house of business which has given him satisfaction and service before. The next time you are in the market for roofing remember—

Certain-teed Roofing. Quality Cert-ified Roofing Durability Guarant-eed. —has won its way to the front because customers who have covered one building with Certain-teed want it for other buildings. They know by experience that Certain-teed is the highest quality roofing possible to buy, and they know it is reasonable in price.

When you buy Certain-teed you are made of the best felt, saturated with our properly blended asphalt, and coated with a harder asphalt as a protection for 3-ply, and this guarantee is backed by the world's largest roofing mills.

Certain-teed Roofing contains no coal tar because coal being a by-product of gas works and coke ovens, dries out too quickly. Certain-teed Roofing is made of the best felt, saturated with our properly blended asphalt, and coated with a harder asphalt as a protection for 3-ply, and this guarantee is backed by the world's largest roofing mills.
