YOUR OWN WELFARE!

The bank of a community is the one most interested in the welfare of the entire community, and is ever keeping its ear to the ground and its eye upon the financial horizon for that which may be of common benefit to everyone in the community.

The bank's interest is in reality your interest, and all should work in conjunction with this institution for the upbuilding of all enterprises of the community.

If you have no account with the home town bank, start one; if you have one, increase it. Work in conjunction with your home bank for the community's good.

MURRAY STATE BANK MURRAY NEBRASKA

Lester Schoemaker has disposed of his Ford car to Bert Lloyd. Mrs. Joseph Mrasek is reported as being on the sick list, but is getting better.

George Nickles is having a new platform placed on his scale and it otherwise repaired. Dr. G. L. Taylor began testing the cows of Murray and vicinity Wednesday of this week.

Bert Lloyd and Lester Schoemaker were at a dance at Charlie Boardman's near Union Monday evening. Eugene Fitch, of north of Nehawka was looking after some trading in Murray last Tuesday afternoon.

The little babe of Mr. and Mrs. Fong Wilson has been very sick, but is at this time showing some improvement. Mr. and Mrs. Ed Ruby and two children Thelma and Bernard were visiting at the E. E. Doty home on Sunday afternoon.

John Robbins is reported as being confined to his bed on account of illness, but is getting along well, although pretty sick. Lester and Ray Schoemaker were in town Sunday listening over the radio at the garage, which Mr. Bakke has recently installed.

Bert Lloyd was a visitor at the Edward Schoemaker home Tuesday. Bert and Lester went to Plattsmouth in the afternoon.

Messrs Leland and Chester Briggs were visiting in Murray last Sunday, being in attendance at the Bible school at the Christian church. Miss Plak, the teacher of the Murray schools, has been kept from her work by illness and has been staying at the home of her mother in Plattsmouth.

Mr. and Mrs. Alfred Sorenson of Omaha, the latter a sister of Mrs. G. L. Taylor, were guests at the home of Dr. and Mrs. G. L. Taylor on Sunday last week.

D. J. Pitman, manager of the lower elevator, was kept to his home on account of the grippe for three days, but was able to be back at his duties on last Tuesday.

M. R. Minch and family, who have been visiting in Murray for the past winter, have returned to Omaha, where they will make their home in the future.

W. S. Smith has been putting in a portion of his time making some furniture and while otherwise than finding the work hard, is making a good success of the matter. Lester Schoemaker and Sanford

Homan were visiting Albert Schoemaker and family at Weeping Water Tuesday evening, Albert Schoemaker being an uncle of Lester.

J. A. Scotten has been feeling pretty badly, but is still around. The other members of the family, who have been sick, are well again and the children back in school.

Thomas Jamison and A. W. Stowell both of Lincoln were guests at the home of Dr. and Mrs. J. F. Brendel last Monday evening, Mr. Jamison being the father of Mrs. Brendel.

Mr. and Mrs. Edward Schoemaker and three little daughters, Vivian, Golda and Eloise, were visiting Mrs. Schoemaker's mother, Mrs. Elizabeth Doty, of near Weeping Water last Sunday.

Jesse Chambers, who is employed in the Burlington shops at Plattsmouth has been on the sick list and not able to work for the past few days and has been staying at his home in Murray.

Henry Rice who has been with Dr. J. F. Brendel during the winter, is engaged with C. M. Reid for a few months and during that time Mr. Clarence Keil will assist in the driving for Dr. Brendel.

Henry Heebner, who is at the hospital in Omaha where he underwent an operation for appendicitis, is reported as making very satisfactory progress and is expected to be able to return home in a short time.

C. H. Boedeker, who has been visiting for some time at the home of relatives and friends in Nodaway county, Missouri, is very dry there, but with an excellent crop last year.

C. M. Reid, who has been living on the M. A. Hall place east of Murray, is moving to the place where Henry Creamer formerly lived and the place where he has lived will be occupied in the future by Arthur Reed.

Messrs and Mesdames Paul Peterson of Omaha and Millard Kelsey, of Millard, the parents of Mr. and Mrs. Edmund L. Peterson, were guests at the home of the latter last Sunday, and a most delightful day was spent by all.

Messrs Herman Wohlforth, Otto Schaeffer, Herman Gansner and Nick Fredrick were attending a pure bred hog sale at the home of David Basinger at Courtland last Saturday and found a large crowd in attendance buying good hogs.

Mr. and Mrs. Noah Parker and little daughter, Helene, who have

been visiting Mrs. Parker's parents, Mr. and Mrs. Edward Schoemaker, returned to their home at Louisville last week, Mrs. Parker taking the flu after she got home.

W. H. Homan has been kept to his home on account of an attack of the grippe and has been confined to his bed during the most of the time. His son Sanford has also been having a tussle with the grippe, but has been able to keep at his work during the time.

In order to avoid a collision last Sunday between two autos, one of them was run against the side of Scotty's place with such a hard bump that it seemed it would go through the wall. However, no serious damage was done, but one's heart beat a little faster at the time.

'Curley' got a cold bath one day last week while assisting in harvesting ice, slipping and falling into the water of the pond, which wet him all over, but fortunately he suffered no ill effects from the experience, other than the inconvenience and cold chill which the icy waters gave him.

M. G. Churchill and wife were enjoying a farewell dance which was held at the home of Mr. and Mrs. Frank Boardman, who are moving from the Scotia bottoms to Omaha, where they will live in the future. The dance was held last Monday evening and a most pleasant evening was had.

Both the elevators in Murray have been blessed with a goodly number of cars, and were able to move a good portion of the grain which they had in their warehouses. Mr. Gansner moved during the past few days some six cars. Mr. Pitman moved not quite so many, but has now an abundance of room for other grain to come.

Many of the friends of Mr. Cash Ellington, who formerly lived in Murray, but who have been living near Brunswick, where he has been engaged in farming, were pained a few days since to learn of his having been accidentally killed by a car which he was hauling in his wagon. Mr. Ellington was a nephew of Mrs. V. A. Kennedy and Mrs. W. A. Royal and was well known around here. He leaves a wife and five children.

Will Probably Form Company

Last Saturday a number of people interested in the invention of Mrs. J. A. Wilson known as the Wilson Rotary collendar, met in Murray and discussed the matter of forming a company for marketing this most useful article and adjourned to meet again on February 28th, when the matter will be further considered and a company formed. All interested in this article and the forward step of Murray are invited to be present at this meeting on February 28th.

For Sale

Pure bred Buff Orpington hens and cockerels. MRS. J. H. BROWN, 125-4T. Murray, Nebr.

Gave Surprise Hoise Warning

A number of the friends of Mr. and Mrs. E. L. Peterson went to their home last Wednesday with well laden baskets and gave the very popular couple a most pleasant evening. The evening was spent in games, music and cards. Those present on the occasion and to help make the evening one of perfect enjoyment were Messrs and Mesdames J. F. Brendel, Mortimer Bartlett, T. J. Brendel, F. A. Hill, G. L. Taylor, Alf Sorenson and Mrs. Kelly.

Philip Keil Has Moved

Last Sunday evening Philip Keil was prepared to begin moving on the following morning and just as the shades of evening were falling, the families of A. G. Long, John Ferris, Alfred Gansner and W. H. Polis came and made the evening one of much pleasure, both for the host and hostess and their family and also for themselves. The evening was spent in games by the younger ones, music and cards by the older ones. Good cats, of course, cut a figure in the evening's entertainment. However, Mr. Keil and family moved the day following to their new home where formerly H. G. Tilson and family lived before moving to Plattsmouth.

Almost a Hospital

given by the neighbors and friends during the illness of Mrs. Graham, their daughter, Miss Helen and their son, as well as Uncle S. G. Latta and his son James, all at the one place. Miss Helen Graham has been the one who has been the most severely ill, but is reported as having been able to hold her own during the past few days and it is hoped that she will soon begin to show marked improvement. While the whole of the household has been sick with the exception of Mr. Graham, he feels very kindly to the friends who have rendered such valuable assistance.

Obituary

William J. Doty was born at Wooster, Ohio, April 6, 1844, and died near Murray February 7, 1923, aged 78 years, 10 months and 1 day. He came to Nebraska in the year 1881 and lived near Weeping Water until about three years ago, since which time he made his home with his daughter, Mrs. Edward Schoemaker. He was married to Elizabeth E. McClelland April 22, 1867, of which union seven children were born: they being Charlie E. Doty, of Oklahoma City, Oklahoma; Nettie B. Amick, of Weeping Water; Harry A. Doty, F. E. Doty and Mrs. Edward Ruby, of Weeping Water; Mrs. Edward Schoemaker of Murray and Mrs. Lauren Mickle of Denton. Thirty-two grandchildren and two great-grandchildren also survive him.

HAS NEW FORD

Martin Sporer of near Murray has purchased himself one of the latest type of the universal car that he expects to make good use of during the coming summer months in traveling over the hills of old Cass county. The car was purchased through the Plattsmouth Motor company of this city and is the latest thing in the way of the always servicable Ford cars.

THE WETTEST SPOT DURING A DRY YEAR

Hatteras, N. C., Can Claim the Distinction, While Yuma, Ariz., Holds Other Extreme.

Washington, Feb. 17.—The country was not so wet last year as it normally is. Philadelphia was the driest it has been in 100 years. Compilations of the weather bureau show that ninety-six of the 175 reporting stations had less rainfall than normally. Hatteras, N. C., was the driest spot, while Yuma, Ariz., was the wettest. Mobile, Ala., was a close second for the wettest place and El Paso, Tex., took second position as drier.

From the Mississippi valley eastward, the amounts of precipitation generally from about thirty inches in the upper lake region to between fifty and sixty inches in most of the Gulf coast states, although slightly less than thirty inches of precipitation fell in much of Pennsylvania. Between the Mississippi river and the Rocky mountains, the amounts varied from slightly more than twelve inches at Havre, Mont., to about fifty inches in southeastern Texas. Less than ten inches were reported in most of the southern Rocky mountain districts and the far southwest. On the Pacific coast precipitation varied from about sixty inches in extreme northwestern Washington to a little more than nine inches in extreme southern California.

The outstanding features of precipitation during the year compared with the normal were the large deficiencies in amount in the far northwest, especially in western Washington, and also in the area from central Colorado southward. Tacoma, Wash., received but little more than half the normal rainfall, while in extreme western Texas and southeastern New Mexico less than half the annual amount was received. There was a general deficiency also in the central-northern states from the western upper lake region westward to the Rocky mountains, except at a few points in Montana and North Dakota.

Less than the normal amount was recorded very generally from western Tennessee, Arkansas and Missouri northeastward over the Ohio valley lake region. The year was unusually dry in portions of Pennsylvania. Compared with the normal, the amounts were unevenly distributed in New York and New England.

FORD SYSTEM TO HAVE TEST IN NEW INDUSTRY

Five Hundred Workmen in Pennsylvania Glass Factory Enter on a Probationary Period.

Glassmere, Pa., Feb. 17.—Five hundred or more workmen in the factories of the Allegheny Glass company "brought in" their week by Henry Ford for operation in connection with his other industries, today entered upon a probationary period of two months, with every one determined to make good and to reap the financial benefit of what they termed the "Ford system." The little village fairly buzzed with excitement when it was announced by D. K. Albright, general manager, that wages throughout the plant had been increased about 80 per cent and that for sixty days every man would be on probation, with a month's "trial" period. If he proved satisfactory. They also were informed that they would be permitted to invest their savings in the stock of the Ford enterprises to one-third of their earnings and that an extensive program of welfare work would be carried out. The dozen boys under twenty years of age, among the employees, were not quite sure of their status, but it was made plain to them that they were to be part of a plan that also looks to their welfare.

The Allegheny plant has a rated capacity of about 5,000,000 square feet of polished plate glass a year. In the immediate vicinity are six other important plate glass factories whose managers frankly said they would watch Mr. Ford's experiment with "great interest." Arthur E. Braun, publisher of the Pittsburgh Post and former president of the corporation, instituted many innovations when the factories were rebuilt seven years ago. All machinery was electrically controlled and the danger of accidents reduced to a minimum. Community nursing, medical attention and a modern hospital were established. All of these will not only be continued by the Ford management, but will be extended.

"All the men are happy and contented today and I believe they are giving their best to measure up to the Ford standard," said an official. "They feel that the chance is here and knowing that I do, I am sure they will go right along and meet the requirements. This is the best glass plant in the world and we are going to show that we have the best working force."

There is no union in the plate glass industry. Prolificacy in pure breeds (By Joe Haaga, Ass't Sec. Nat'l Duroc Jersey Record Ass'n.) The number of pigs farrowed and raised by a brood sow has a direct bearing on the net profit she returns her owner each year. The cost of each pig at birth is determined by what it has cost to feed and care for the sow during the whole year. If a sow farrows only ten pigs in twelve months, these ten pigs have cost at birth time just twice as much as if the same sow had produced twenty pigs in the same period. It is therefore a good idea to keep in the herd only those brood sows that have and raise large litters.

Prolificacy is one of the strong points of pure bred sows of all breeds. Adherents of the different breeds of registered swine have always maintained that pure bred sows are superior to grade and scrub sows or those of mixed and non-descript breeding in their tendency to have large litters and in their ability to rear them safely to weaning age. In substantiation of this claim a few figures, recently obtained from the pure bred herds of four Duroc-Jersey breeders located in different states, are interesting. These four herds are representative of the average breeder. No attempt was made to select certain particular herds in which unusual records were attempted and made. The information was obtained in a casual way so as to present an honest and fair estimate of the re-productive power of the pure bred sow and what she can do on the farm when given the proper attention in the way of food and shelter.

The first farm reported nine sows farrowing 89 pigs and raising 77 of them. Six of these litters were raised by gilts and the other three by tried sows. In the next herd eight sows farrowed 89 pigs and succeeded in raising 77 of them to weaning time. The third farm giving figures is operated on somewhat of an extensive scale growing hogs principally for market, most of the animals sold for breeding stock going to neighbors. 355 pigs were farrowed by 35 sows. Of the total number of pigs produced 283 were raised by the sows. The fourth herd had ten sows farrow 131 pigs, 94 of which were saved and raised. According to these figures, 62 sows produced a total of 674 pigs or an average of a little better than 10 4-5 pigs per litter. The average number of pigs raised was 8 1/2 for each sow. These figures give ample evidence of the prolificacy of the pure bred sow. In addition they show that her mother instinct is highly developed, and that she will care for her young and raise them.

It is not intended that these figures should mislead any one. The averages made are very good but would not have been possible had the sows not had the proper rations and been cared for and handled in the right manner. The pure bred sow will do her part but the caretaker or feeder must also be on the job. The increased tonnage of pork per sow possible through the use of pure breeds is worthy the consideration of our farmers.

GROCERIES!

The Winning Breed Duroc-Jerseys For Every Need

At the 1922 International Live Stock Show, Chicago, Illinois, the world's grand champion Barrow over all breeds was a Duroc-Jersey. This barrow, a senior pig, weighed 550 pounds and sold for \$36.00 per cwt. He will be exhibited at all leading livestock shows in the United States for educational purposes. He is a model of the correct type of the profitable market hog.

WOODROW WILSON'S HEALTH IMPROVES PROMINENT UTAH MEN ARRESTED FOR SMOKING

Washington, Feb. 17.—If you were invited out to that quiet home on 8 street today and you spent fifteen minutes in conversation with Woodrow Wilson, you would observe:

A mind as keen as a razor blade, an amazing knowledge of current events, and ability to discuss almost any angle of the foreign or domestic political situation, an almost uncanny knowledge of world conditions, remote and recent, and a cheerful and happy disposition.

Wilson's physical condition is better—much better. Slowly, but surely he is regaining the use of his paralyzed left leg and arm. His step is approaching something close to its old-time steadiness. He is getting heavier every day, the color is flush in his cheeks and he eats and sleeps well. But he is by no means a well man—and probably never will be—because his age stands against complete recovery.
