## EIGHT THOUSAND DISLOYAL TEACHERS IN PUBLIC SCHOOLS

President General of D. A. R. Sounds Warning Against Red Propaganda and Pacifism.

Washington, April 16.—Bolshevism and pacifism were brought under a raking fire today at the opening session of the annual congress of the Daughters of the American Revolution.

Mrs. George Maynard Minor, president general, in the first address asked American women to link themselves together for a battle against influences at work to destroy American institutions and suggested that a portion of the American public school system presented a fitting place to begin such a crusade.

More than 8,000 teachers in the American schools, Mrs. Minor asserted, not only are disloyal to their country, but are using their positions to disseminate disloyal doctrines and discredit the ideals of the American nation. She asks the organization to see that the teachers, their various localities be compelled to confine themselves to patriotic methods of instruction.

The execution of Vicar General Butchkevitch in Russia, the speaker said, was only the outward manifestation of a governmental policy which denies the home, the country and God. As an evidence that all is not well in the United States, she instanced the trial of William Z. Foster in Michigan and the failure to secure convictions in the Herrin mine prosecutions.

It is time to awaken to this danger," she said, "and to tell all radical agitators that there is no room in this country for the reds."

The pacifists, Mrs. Minor said, are "trying to disarm America and kill patriotism in the hearts of her defenders." But she declared that was a vain dream.

The president general withheld her approval of birth control which she thought might make toward destruction of the American home, but she suggested that the modern tendencies which are affecting the life of American girls are less dangerous than they have been pictured.

Plans Worked Out to Eliminate a Great Deal of Interference— Stations Co-operate.

The government is beginning to arrange new wave-length schedules for the radio broadcasting stations over the country and within a few weeks it is expected that the large part of interference will be done away with.

The changing of wave-length is not obligatory upon any 350 meter station which desires to continue on that wave but stations desiring to have their programs free of so much interference may make application for and be assigned a suitable wave-length, depending upon whether they may be assigned to Class A or B.

Tests have proven that stations of equal distance from a receiving set can successfully operated on ten meter wave length separation and be tuned in without interference with each other. However, it will be the policy of the department to separate the wave-length of stations in the same locality at least 25 meters, or else assign them to the same length and provide for a division of the broadcasting time.

400 meter stations that have had to change to 485 to broadcast weather reports and the like, are relieved of the now, and will do all their broadcasting on 400 until such time as they may be assigned a new permanent wave length and scheduled hours to broadcast.

This indicates the government is cleaning up the 485 meter range for other assignment.

The action of Secretary Hoover in taking steps to relieve the present air congestion despite the failure of congress to pass suitable remedial legislation should entitle him to the honor of again carrying his initials on the flag staff at the schoolhouse in his old home town of Westbranch, Iowa, where he has been visiting the past week.

GERMAN RESEEVISTS ARE RETURNING TO GERMANY

Bloomington, Ill., April 16.—Hundreds of German reseevists are returning to Germany from the United States for what Garland W. Powell, national director of Americanism of the American Legion, said in an address today he believed was preparation for war against the French in a final stroke for restoration of the monarchy and Prussianism.

The speaker warned that pro-German propaganda in America is being directed from Berlin.

"There are German hyphenates all over the country who are trying to organize pro-German meetings and play on the sympathies of the American people," Powell asserted. "I want to give these people a new slogan. It is 'Back to Berlin.' They are not needed in America nor anywhere in Germany except in the capital of Prussia."

## MATHERS GUBERNATORIAL BOOM DIES SUDDENLY

Lincoln, April 17.—This is a tale of a banquet that was not held. When Speaker A. N. Mathers of the lower house evolved his amendments to the Dysart bills revising the present code and the Dysart-Mathers bills were passed by the lower house a gubernatorial boom was started for the speaker.

At two or three public gatherings reference was made to Speaker Mathers as the political "Moses" to bring back republican control.

A banquet was planned at which the boom was to be launched. And then the "cool" senate committee killed the banquet idea, caused the Mathers boom to collapse and all but caused Mathers' supporters to have chills by ditching the Mathers' state government bills and recommending passage of the Reed-Hastings bills instead.

The Mathers banquet has not been held. It probably never will be held.

## Worthless Insurance!

Last summer a hail storm which reached the extent of a calamity visited this section. The Columbia Insurance company, which is represented here by W. G. Boedeker, adjusted the loss just six days after the storm and paid every claim two days later, that is eight days after the storm.

Other insurance companies, with agents from out of the state adjusted the loss about sixty days after the storm and paid the claims six months after.

Now on one thousand dollars of loss, at eight per cent, and that is what one has to pay for money, the delay of the payment of the thousand dollars would amount to \$40.00 to each policy holder in case of loss. This would, with the Columbia, almost amount to enough to carry the risk.

Better see Glen Boedeker for your insurance, where the insurance is sure and the adjustments are made and claims paid immediately, and the cost is less.
