LINCOLN CARS WIN TEST IN POLICE TRYOUT RACE

Elimination Contest Shows Up Qualifications of These Fine Cars for Speed and Service.

In a series of three tests for speed and quick get-away conducted by the Detroit Department of Police on Oakland boulevard at Dearborn last Thursday, first place among the field of ten competitors was awarded to the Lincoln car.

The tests were made in an effort of the Police department to secure a "Flying Squadron" of motor cars to enlist in the campaign against robberies and other crimes of the road.

Quick starting from a dead stop, rapid acceleration over long and short distances, and the ease with which the cars could be handled in an emergency demanding immediate ability to get going at race track speed were covered in a quarter mile, half mile and two mile tests, two of which were made from standing starts.

A large gathering of city officials, engineers from representative automobile plants, and many spectators were present. Official clocking of the speed was made by stop watches held by the official referee and by judges in the cars, and cars were also timed and speedometer readings checked by members of the Detroit Motor Cycle squad.

The tests called for stock touring cars carrying six passengers each. In the two mile standing start, quick acceleration test, the Lincoln finished first, covering the distance in one minute and forty-nine and two-fifths seconds, attaining a speed of eighty miles an hour. The next nearest competitor covered the distance in one minute fifty-seven and two-fifths seconds. The slowest time recorder was two minutes, twenty-three seconds, finishing at a speed of sixty-two miles an hour.

In the half miles test the Lincoln again taking first honors, covered the distance in thirty-eight and two-fifths seconds and finished at a speed of seventy-three miles an hour. The nearest competitor covered the distance in thirty-nine and one-fifth seconds.

The quarter mile test was made from a running start of five miles an hour in intermediate gear. In this test the winner covered the distance in twenty-six and three-fifths seconds while the Lincoln tied for second place with a time of twenty-six and four-fifths seconds. The slowest time in this test was thirty-four and two-fifths seconds.

Woman's Rights!

This does not mean the privilege of attending caucuses or being a spellbinder among the hard-working ward or precinct politicians, but means the right of enjoying the better things which the advancing civilization has brought to us—freedom from sweltering over a heated cook stove during the hot summer days, for instance. We claim that's every woman's right.

Puritan Oil Stove!
