The Roddy Colts which is a new aggregation of ball players journeyed to the neighboring village of Nehawka last Sunday and gave the ball players of that sedate town a warming as the day was comfortably hot anyway but they had also to sweat to win the game over Nehawka at a score of 11 to 8. OUTLINE NEW LAWS TO CURTAIL DEATHS

Intelligence Test For Man or Woman Who Drives Car a Possibility of the Near Future.

Chicago, Sept. 4.—An intelligence test for the man or woman who drives a motor car is a possibility within the next two or three years. Representatives of thirteen middle western states are to be invited to attend the conference of motor vehicle administrators, representing state automobile licensing bureaus, to be held here early in September, at which plans will be made for working out safety first laws for automobilists and pedestrians.

The movement is being fostered by the national safety council. The convention is to be called by Fred M. Roseland, chief of the public safety division of the national safety council.

"The man who drives a car for somebody else must pass an examination," said Walter M. Miller, chief clerk of the automobile division of the Illinois department of state. "But anybody can drive an automobile if he owns it, whether he has ordinary horse sense or not."

"The accidents do not happen to licensees. They happen to the unskilled drivers. The conference will make plans for uniform laws to govern the licensing of automobile operators to see if they are sufficiently competent mentally to handle a motor driven vehicle. Some form of intelligence test is likely to be devised."

Representatives of the state departments of Illinois, Indiana, Ohio, Wisconsin, Michigan, Minnesota, Iowa, Missouri, Kentucky, Kansas, Nebraska and North and South Dakota will be invited. It is hoped to have the conference just prior to the meeting of secretaries of state at Asheville, N. C., September 13, 14, 15.

There is a real need, according to the officials sponsoring the conference, for uniform laws of driving to lessen the death date. One way suggested is to prevent a man who never has handled a car before from buying a machine and promptly setting forth as if he were an experienced driver. This prevalent custom could be prevented, they say, by forcing the dealer by law to see that everybody to whom he sells a car is thoroughly instructed before he is permitted to operate it on the public highways.

ALMOST

In London they were discussing advertising. "Great stuff, these electric signs on Broadway," said the Yankee. "They've got one advertising Wrigley's gum, runs a whole block, 250,000 electric bulbs."

"How many?" cried the astonished Londoner. "Two hundred and fifty thousand," answered the Yankee. "But I say, old chap, isn't that a bit conspicuous?"—The Kan-Sun.

CONFERENCE ON COAL SITUATION REOPENS TODAY

Miners and Operators Fail to Change Views—Settlement is up to Governor Pinchot.

Philadelphia, Sept. 4.—Miners and operators charged with working out a new wage contract between the workers and mine owners tonight were preparing to resume their conference tomorrow at Harrisburg where they were temporarily suspended last Saturday. The best information obtainable here was that neither side has changed its position and unless Governor Pinchot has some new idea to present to bring about settlement and end the suspension of mining, the negotiations may last longer than generally was expected.

There was no formal meeting of operators here today, as far as could be learned, but it is understood that there has been an exchange of views among the leading officials of some of the coal companies.

President John L. Lewis of the United Mine Workers and the president of the three anthracite districts met here tonight to check-up

on the negotiations so far as they have gone and a review the situation in the coal fields. President Rinaldo Cappellini, Thomas Kennedy and C. J. Golden gave Mr. Lewis detailed information of the situation in their respective districts.

Harrisburg, Pa., Sept. 4.—Governor Pinchot will renew tomorrow his efforts to compromise the labor controversy in the anthracite region and get miners who suspended work September 1, back as their tasks. Representatives of employers and officials of the miners' union will meet with him at 2 p. m. to go over again the four points of a peace proposal on which they failed to get together last week.

The governor has continued his study of the situation since the negotiations adjourned last week but has not indicated publicly any change of plans. His previous suggestion was that the workers be given a 10 per cent increase in present rates; that the union be allowed to install an agent in mining company pay offices to collect dues; that eight-hour day employment be made fully effective and that the union be recognized and principles of collective bargaining maintained.
