Recalls Former Days.

During the early years of the life of our townsman, Winfield Scott Norris, not any relation to George W. Norris, was spent in his native city, Red Key, Indiana, and being seized by a desire, not created by Horace Greeley, but wanting to see the west just the same, came with his parents, David Norris and wife, along with two brothers of our Mr. Norris and also four sisters, on Valentine's day, fifty-two years ago, arrived at Plattsmouth and as the train stopped, they alighted and locking up Main street, saw a sea of mud, for it was wet and muddy and sure the street was muddy for that was before any pavement had been laid. Another object that attracted the attention of Mrs. Norris then a young man, was an old woman and her brood waddling in the mud near the depot.

That spring was warm, and the day sunny, and remained so, for after getting their teams and outfits, David Norris, the parent, with the boys went immediately to farming, and put in twenty acres of spring wheat.

They found some hard times, but after having gotten acquainted with the country, they liked it very well. Mr. Norris tells that he had some three hundred friends in and about his old Indiana home which he lost because he could not get enough money to buy writing material and stamps to communicate with them. He also tells of a certain prominent business man of Nehawka, who when he had come to the west and settled in Cass county, wrote to his sweetheart in the east, and carried the letter for days before he was able to mail it, in fact he wore the letter out and did not get to mail and consequently lost his sweetheart. The Norris family moved to a farm two and a half miles west of the Murray now stands and a half mile south. This was their first home in Nebraska. Mr. Norris says there is no place as good as Nebraska to live. Speaking of mud, Scott says that he remembers of having to coon a rail fence for a quarter of a mile in old Indiana to get to town. Sure that was muddier than the Main street of Plattsmouth.

WHAT A DIFFERENCE 90 DAYS MAKE!

TODAY A TODDLING CHICK... in 90 days a proud pullet about to lay. There's something to think about! Tiny bones and little muscles have grown several times in size... a delicate fuzz has sprouted into hundreds of feathers... a chick weighing grams has grown into a pullet weighing pounds... all in 90 short days!

A wonderful change... and only one thing can do it... good feed! This year consider Purina Startena Chow (mash) and Purina Chick Chow (scratch) or All-Mash Startena Chow for the first six weeks... and then Purina Growena and Purina Intermediate Hen Chow until your pullets are laying at 16 weeks.

Put these Chows before your chicks. You will see pullets that are built right... pullets that will lay eggs aplenty in fall and winter when eggs are always worth good money.
