Henry M. Pollard Long Time Resident of County

Funeral Held at Late Home Where He Had Spent So Many Years of His Useful Life

The funeral of the late Henry M. Pollard was held on last Wednesday at the home at Nehawka where a very large number of the old friends gathered to pay their last tributes to the memory of this great man gone to rest. The services were in charge of Rev. W. A. Taylor of Union, a friend of many years standing. The services at the grave in Mt. Pleasant cemetery were in charge of the Missions.

Henry Moses Pollard was born in Plymouth, Vermont, July 24, 1867, the oldest of the three children of Moses Pollard and Sally Miner Pollard. He passed away April 7, 1930 at his home in Nehawka, Nebraska. He grew to manhood on the old Pollard farm in Plymouth, Vermont, which farm was purchased by his grandfather and is still in the family, being occupied by his sister. He inherited a talent for carving and woodwork from his mother and during his life, even in early boyhood, was always making some artistic piece of bric-a-brac or furniture.

In the spring of 1889 he came to Nehawka, Nebraska. For a few weeks he stayed with the Isaac Pollard family, then moved to the home of Mr. and Mrs. Lawson Sheldon, where he lived until December 13, 1895, when he was married to Mollie E. Switzer. To this union, one son was born, George, who is married and is now in the grocery business in Avoca, Nebraska.

When first in Nehawka he practiced the carpenter trade, and was very successful. Many homes in the community now stand as monuments to him. In the spring of 1895 he gave up carpentering and bought the Nehawka Elevator from the James E. Banning estate. This elevator burned in the summer of 1901 and

was rebuilt in the spring of 1902. He continued in business until the spring of 1908 when he sold to the Nehawka Farmers Grain Co. Mr. Pollard has been a member of the Board of Directors of the Farmers Elevator Co. continuously for the past 18 or 19 years. He then sold his home south of town to C. W. Stone and moved to his farm north of Nehawka. Here they lived until October 1913 when they purchased their present home and moved to town.

September 16, 1893, when the I. O. F. Lodge No. 214 of Nehawka was instituted, his name appeared among the charter members and November 25, 1899, was elected Noble Grand. He was also a Charter member of Nehawka Rebekah Lodge No. 190 which was instituted February 12, 1904. He was a Charter member of Nehawka Lodge No. 246 A. F. & A. M. chartered January 2, 1900, having transferred his membership from Euclid Lodge No. 97, Weeping Water. He was Worshipful Master in 1904 and again in 1914, and has held every important office in the lodge. He took an active part in the work of the lodge and probably assisted more new members in learning the work than any other one member.

He took a deep interest in all public and civic improvements and was a public spirited and surprising citizen. He has been a member of the Town Board since May, 1923, and has always been a staunch supporter of the Republican party.

He was a great lover of flowers and fully enjoyed working with them. He fairly lived to see them blossom forth.

Henry had a very large circle of friends and relatives in this community where he has made his home for so many years. He is survived by his wife, his son, George Pollard of Avoca, a sister, Miss Clara Pollard of Plymouth, Vermont, and a brother, Ernest Pollard of Ludlow, Vermont.

Mr. Pollard remained cheerful to the end and his interest in life continued unabated.

AN ANTI-ALCOHOL CAMPAIGN

Mexico City—President Ortiz Rubio in a signed order Sunday summoned the whole hearted support of his government for the anti-alcohol campaign started by former President Porfirio Gil. In a signed order the president directed the national anti-alcohol committee, acting thru the department of the interior, to remind every state government that it is the desire that the anti-alcohol campaign be continued and intensified.

"My government earnestly desires and requests the co-operation of all officials, with all the means possible, in the anti-alcohol campaign," the president's order said.

Ortiz Rubio and the secretary of the interior, Porfirio Gil, also circulated all state and territorial governors ordering them to enforce strictly the religious laws, especially making sure that religion is not taught in private or public schools, as this is contrary to the law. The government recently ordered closing of several schools for violation of the religious statutes.

Instructions sent to governors also commanded them to see that priests register as prescribed by the law and that the number of priests in each state does not exceed the number permitted by the state legislature in accordance with the constitution.

CURBING ACCIDENTS

The automobile accident menace will not be curbed until drivers "think safety."

During the past ten years, through intensive safety work, the American railroads have reduced fatalities on their property, owing to conditions within their control, 61 per cent.

The accident record in almost all other industries has steadily decreased, due to untiring efforts that have impregnated a knowledge and a consciousness of safety in the minds of workers.

Contrast this with the automobile accident situation. Last year motor vehicles were responsible for the deaths of 31,500 persons—a new high record. This represented a 13 per cent increase over the 1928 record, while automobile registrations gained but eight per cent. Motor vehicle accidents lead all other causes of accidental death by a wide margin.

There is but one encouraging circumstance. Accidents to school children are on the decrease due to the fact that safety education is part of the curricula in modern and progressive schools.

Every reckless and irresponsible driver is a menace to all the rest of us. Persons who disregard safety should be prevented from using the public highways.

A GROWING MENACE

In spite of the efforts of public and private organizations, fire waste is tremendous in America. It is the greatest enemy of social and industrial progress.

In 1913, the loss totaled \$203,763,550. By 1926, it had almost trebled, reaching a total of over \$560,000,000. In the next year an appreciable reduction was effected, the total being less than \$473,000,000, as a result of intensive campaigns to promote carefulness, better building construction and more adequate fire-fighting facilities.

In 1928, only a small reduction was effected and the total exceeded \$400,000,000. Loss since then has remained at approximately the same level.

It is evident that a vast amount of educational work remains to be done. Americans fail to realize the economic results of fire. A destroys part of our national wealth and causes unemployment and loss of wages. It can check the growth of communities when men, thrown out of work by fire, must seek employment elsewhere.

Our fire losses can be cut in half at least, according to "Safeguarding America Against Fire," but this will not come about until the public, realizing the economic waste of fire, learns to build better and practice carefulness in the matter of fire hazards. Our yearly sacrifice of lives and property is inexhaustible.

Common Sense

Yes, just plain common sense is what prompted the big majority of members of the Farmers Co-Operative Oil Co. to join this enterprise. In the light of excellency of investment, the high standard of their product and the service rendered each of the more than three hundred members, it is the same PLAIN COMMON SENSE that makes them enthusiastic boosters for their company, the products and the service and prompts every one to recommend to their friends that they become members. Memberships are selling at \$15 each. With the dividend paid thereon and patronage dividends, the returns are often many times more than the investment.
