You pay hundreds of dollars for an auto. Then why not give it the best care. We are here with expert workmen to give best care to your car. Also see us for Gas, Service, Oils and Greases, Auto Supplies and Accessories of all kinds at RIGHT PRICES.

A. D. BARKE, Owner

Murray Garage

Business called L. L. McCarthy to Murray on Monday morning of this week.

John S. Vallery shelled and delivered his last year's crop of corn on Monday of this week.

Mrs. C. D. Spangler has had a new Skelkas stove which is proving a very much desired article for the household.

Robert Shrader was a visitor in Plattsmouth on last Saturday, and was looking after some business matters while there.

E. S. Tutt and wife were visiting in Plattsmouth for the afternoon on last Sunday, they driving over to the county seat in their car.

Dr. J. F. Brendel is having John E. Reddin paint the interior of his garage, and making the color white in order to afford the most light inside.

George Rhoden was a visitor for the week end at his home in Plattsmouth, returning to his work at the new filling station on Sunday evening.

Guy Stokes and Harold Williams of Louisville were here on last Monday delivering some corn which they had in storage, hauling it to the Farmers elevator.

Robert Livingston, Misses Hilda Johnson and Marie Shrader, all of Plattsmouth, were visiting with friends for a few hours in Murray on last Friday afternoon.

Mrs. D. C. Rhoden and niece, Miss Thelma Rhoden, were visiting with friends in Omaha on last Friday, also were guests of Mr. and Mrs. John Lloyd of Council Bluffs.

Sam F. Latta had the misfortune to lose a very valuable hog weighing nearly four hundred pounds and these time of high prices for hogs and feed makes the loss a great one.

E. J. Reedecker and Phillip Schaefer each shipped two car loads of cattle to the market during the present week, they both having very excellent cattle. The shipments were sent to Chicago.

Mrs. J. W. Berger has installed a new Kelvinator at the hotel which furnishes excellent refrigeration and at the same time does away with the handling of the sloppy ice as had been the case heretofore.

Mr. and Mrs. Will L. Seyboit and Mrs. J. P. Brendel were over to Lincoln on last Sunday where they went to visit Mrs. Thomas Boone, who is in a hospital recovering from a serious injury when she fell some time ago.

H. D. Knoblock of Nehawka, was a visitor in Murray and was looking after some business matters as well

S. paved highway 75. We carry the best grades of Gasoline and Motor Oils, Tires, Tubes and Auto Accessories. We are here to serve you in the very best manner. Guaranteed Auto Repair Work! Our motto is "SERVICE and FAIR TREATMENT"

Confections and Cigars

Rock Creek Service Station,

CHAS. V. BARROWS, Manager

players. The two teams were made up of half boys and half girls. Miss Marie or "Pickles" as she is better known, showed great proficiency in her playing, she being at bat two times and in each made a two bagger making her batting average 1000 per cent. She worked in the field on the outs and caught every ball coming her way with the exception of one she could not get to in time.

Murray Makes Good Growth.

The government census of 1920 showed the village of Murray 170 and during the intervening 10 years there has been made good progress in the matter of good substantial buildings as well as a very good growth in population. During the ten years the city has made a gain of slightly over 33 per cent and in numbers 57, and the census show at 1930 227. There has been built during the year, two good business houses, the places occupied by Earl Lancaster, the Murray Hardware and Will S. Smith, the dwellings built have been greater in number and are the homes of George Nickles, C. D. Spangler, Dr. G. L. Taylor, E. S. Tutt, J. A. Scotten, Wayne Lewis, Curley Reeves, John Reddin, Thomas Jennings, James E. Gruber, C. N. Barrows, and uncle S. G. Latta, building two houses. Besides this Murray has had her streets gravelled, and the Richter Brothers have built machine sheds for their machinery and Frank Mrasek has built a bathing beach and buildings. The progress of Murray which has been unnoticeable during the passage of the years has in the main been a very satisfactory growth.

Presbyterian Church Notes.

Pastor.

Preparing for Summer Boy Scout Camps

Nemaha Area Will Have Camp at Nebraska City Where All Now in Readiness for Boys.

The well at Camp Wilson, Boy Scout camp near Nebraska City, is finished—all but putting the pump on. For the past week W. F. Misegadls has donated almost his entire time to digging the well so it would be ready for camp when it opens June 19.

At the depth of 15 feet gravel and rock were struck and from then on it was a struggle to get through the hard formations. At 47 feet it became necessary to set off five sticks of dynamite to get through; water was struck at this level. The well as it now stands is 50 feet deep with three feet of water.

As soon as the pump, which is on the grounds, is placed it will be ready for use. They have been unable, so far, to get any of the water from the well but Scout Executive Cecil Herzberger believes it is a spring of clear, cold water that will make excellent drinking.

The well and the fixing of the dam were the two main objects that concerned Herzberger in his preparation for camp. The dam still is leaking some but he hopes to have that fixed within the next few days.

The three-week period of camp opens June 19 with a new encampment every week. Registrations at present number 60 with the choice of weeks fairly evenly divided. It is possible to take care of 40 boys at each period and 120 for the entire three weeks. Mr. Herzberger believes this number will easily be reached with the expected last minute rush.

Boys from 10 towns in the Nemaha area will be there for the camp. They will be from Nebraska City, Cook, Tecumseh, Plattsmouth, Johnston, Murray, Syracuse, Auburn, Nehawka and Talmage.

ROTARIANS HOLD MEETING

From Wednesday's Daily—
The weekly meeting of the Plattsmouth club of the International Rotary was held yesterday at the Majestic cafe and was featured by a splendid address by Dr. J. S. Livingston, president of the club, taking as his subject that of "Service," pointing out the many advantages of the Rotary service in social, community and personal service, being a thorough covering of the ground of the various activities of the organization.

The club had also as guests, Peter Lautenslager, a former resident of this city now located at Davenport, Nebraska, and who was a guest of Mayor John P. Sattler, one of the five wire Rotarians, while Peterson Johnson and son, Peterson, Jr. of Omaha were guests of George K. Petring at the luncheon.

The usual songs of the Rotary were featured as a part of the program of the occasion.

FARM BUREAU NOTES

Copy for this Department furnished by County Agent

Crop Field Day.

Farmers will fly in to the 9th annual crops and soils field day at the Agricultural college, Friday June 20. Arrive at 7:30. Dr. J. S. Livingston and Fred Kelly of Nora have written in that they intend to be the first real dirt farmers to pull such a stunt on the Nebraska College of Agriculture. They sent the letter air mail.

Twenty years from now someone may look up the records and find that farmers first flew to Field Days in 1920. Dr. F. D. Keim, Chairman of the Agronomy Department, said in commenting upon the letter. Twenty years ago a good share of those attending came upon the train. No record is available of when the first farmer came in in his automobile.

Hessian fly will probably be the popular topic for discussion in the forenoon, and on the tour of the afternoon. P. H. Stewart of the Extension Service will be in charge of the tour. He will be joined by farmers with whom he has worked the past few weeks. At the experimental farm east of Havelock, College representatives will be able to show visitors how they have controlled the fly during the past season.

Modern machinery for corn production will be another important topic on the program. Stewart says. C. Y. Thompson of West Point and Wayland Magee of Bennington, both practical farmers, will lead the discussion.

Dr. T. A. Kieselbach of the college is to outline the possibilities of Hybrid seed corn in a talk on the morning program. Prof. M. H. Swenk chairman of the Entomology department will mention the common corn insect and tell how to prevent or control them. His talk is also on the morning program. Dr. Kaim opens up the day with the identification of a number of Nebraska Weeds.

All the afternoon will be spent in looking over the field corps of the experiment station. Guides will be furnished and the visitors divided up into small enough groups so they can all see and hear.

4-H Clubs Will Practice Judging June 21st.

The first practice judging day for 4-H clubs ever held at the Agricultural College is scheduled for Saturday June 21.—Notices have gone out to county agents asking them to estimate the number who will attend from their counties. Help is to be offered in animal husbandry, dairy, poultry, crops, clothing, dairying, baking, and girls room improvement judging. Faculty of the

SHERIFF'S SALE

State of Nebraska, County of Cass, ss: By virtue of an Order of Sale issued by Golda Noble Beal, Clerk of the District Court within and for Cass County, Nebraska, and to me directed, I will on the 22nd day of July, A. D., 1930, at 10 o'clock a. m., of said day, at the South front dining room of the court house in the City of Plattsmouth, Nebraska, in said County, sell at public auction to the highest bidder for cash the following real estate to-wit:

Lot Twelve (12), Block ninety-three (93) in the City of Plattsmouth as surveyed, platted and recorded—
The same being levied upon and taken as the property of Harry H. Kuhney, et al., defendants to satisfy a judgment of said Court recovered by Standard Savings and Loan Association of Omaha Nebraska, plaintiff against said defendants.

Plattsmouth, Nebraska, June 17th A. D., 1930.
BERT REED,
Sheriff Cass County,
Nebraska

college will give the instruction and provide the animals and articles to be judged. Another such day is set for Saturday July 19, and another for Monday August 4.
Any 4-H club interested in trying out for judging at state fair should plan to take advantage of this judging day in Lincoln, Saturday, June 21. Work starts promptly at 9:30 and will be completed by 4:00 p. m.

Kills the Weeds.

Several experiments were tried last year on the poisoning of various weeds such as: Bind weed, Ten weed, Wold Gloden Glow, Canadian thistle and buck brush. Both the calcium and sodium chlorate were used in quantities ranging from 1-5 pounds per square rod.

The wet treatment (where the chlorate is dissolved in water and sprayed on the weeds) as well as the dry treatment (where the powdered form is sprinkled or dusted on the weeds) were used on all of the above mentioned weeds.

The results of these experiments show that it takes about 3 lbs. of the chlorate per square rod to completely kill the weeds. The dry treatment gives the same results as the wet but where the patches are large the spray is more economical.

The active principal of all chlorates in chloric acid which combines with the cell saps of the plant, disorganizing the plant processes and results in eventual death. It might be compared to blood poisoning in the human body. A chlorate is several hundred times more effective in plant killing poison than ordinary common salt (sodium Chlorate).

The buck brush was treated last summer and this spring it was found entirely dead and the roots were removed from the ground in lengths as much as 12 feet and not a live cell was found. Care should be taken not to cultivate the weed patch for some time before treatment. Cultivation will break the roots thus the entire plant will not be killed. Considerable foliage is desired so that the chlorate will have a greater chance of entering the plant system.

In one plot of tan weed that was treated last year, not a green shoot is showing now and the corn planted on the plot looks as good as it does a few rods away from the treated plot.

The full results of chlorate treatment may not appear until the spring following application, as plants will often appear and develop thru the fall months but will not survive thru the winter. Therefore do not attempt to judge the final results until the following spring.

Inquire at the farm bureau office for more details.

May D. H. I. A. Report.

W. G. Hoffman, of Alvo has a grade Holstein cow that produced 262 lbs. of milk and 825 lbs. of butter fat during the month of May. This cow was the highest producing cow of the 259 on test for that month.

In the group of 5-15 cows, C. D. Gear of Mynard had five cows that averaged 1284 lbs. of milk and 44.9 lbs. of butter fat.

In the group of 16 or more cows R. B. Stone of Nehawka, lead the list with a herd of 26 Guerneys that averaged 803 lbs. of milk and 36.8 lbs. of butter fat.

At the present price of butter fat more farmers need to cure their herd and milk only the good cows. The best way to do this is by joining the Cass County Dairy Herd Improvement Association.

Henry Sexson Wins Trip to Wash.
Henry Sexson of Eagle, is one of the four boys and girls who are representing Nebraska at the National 4-H Club Camp at Washington, D. C. this week. Henry won this trip by years of diligent club work and no doubt will come home more enthused about 4-H work than ever before.—D. D. Wainscott, Jessie H. Baldwin, County Extension Agents.

INTERESTING NEW FACTS ABOUT FEET

From Monday's Daily—

It is no longer necessary to wear large or peculiarly shaped shoes in order to have comfortable feet. Mr. Clement Woster of the Fetzner Shoe Co. made this assertion today, thereby puncturing what has long been a popular notion. He also made the interesting statement that seven out of ten persons suffer from foot troubles of some kind. These were government statistics, he said.

Mr. Woster was explaining the significance of Dr. Scholl's Foot Comfort Week, which will be held June 14 to 21. This, he said, was a concerted movement of progressive shoe dealers all over the United States and Canada to spread the message of foot comfort.

Mr. Woster, who has had special training in Dr. Scholl's method of giving foot comfort, says he can send every person, whether they are suffering from broken down arches, weak ankles, extreme tiredness or painful, burning feet, out of the store in comfort, and in neat, stylish shoes. Pains from corns, callouses and bunions can be relieved at once he said; suffering is needless, for there is a Dr. Scholl Appliance or Remedy for every foot trouble.

"I expect that a great many people will call at our store during Foot Comfort Week," he said, "and they can be assured they never had had such an opportunity as this to find out just what their foot troubles are and how easily and inexpensively they can be remedied."

RETURNS TO HOME HERE

Mrs. Lon Henry and little son have returned to the home here from the hospital at Omaha where the little one was born, both the mother and child doing nicely and the return home has been most pleasant to all of the members of the family circle.
