Starting that's swift . . . starting that's safe, because this free-flowing oil never leaves working parts

Tomorrow morning, as you step hopefully on the starter, will there be a s-l-o-w disappointing groan, as it tugs at your unwilling motor? . . . Or, will there come a swift responsive roar?

If you're having trouble starting, you're probably using an old-type oil that congeals at temperatures well above freezing. You should change to Conoco Germ-Processed.

But that's not all! To ward off the wear that these prolonged starting periods bring, you want an oil which provides instant lubrication at the first reluctant revolution of a cold motor. . . . And there's just one oil which can do that! Because there is just one lubricant which penetrates metal surfaces and never drains away in idle periods.

Conoco Germ-Processed Motor Oil is that one lubricant. Change to this motor oil with twin advantages for winter use . . . 35 cents per quart for all grades at the sign of the Conoco Red Triangle.
