

# UNION ITEMS.

John Banning and wife of Alvo were visiting in Union for a short time on Monday evening of this week.

W. B. Banning and Frank L. Anderson were at Schubert on last Tuesday where they were called to look after some business matters.

The Rev. W. A. Taylor was asked to come to Nehawka to assist in the funeral services of his friend, Joshua Sutphan, which occurred last week.

Mrs. J. C. Gillespie, mother of Dean Gillespie, the barber, has been spending the past week at the home of her son in Union and visiting with the family.

Robert James, a farmer residing a few miles south of Nehawka in Otoe county, was looking after some business matters in Union on Tuesday afternoon of this week.

Israel Freeze, a farmer residing south of Nehawka on the county line, was visiting with friends in Union on Tuesday afternoon of this week.

Regular preaching and other services at the Baptist church on July 26th to which all are invited to be present and enjoy. We are here to assist you with the problems of every day life.

Raymond C. Pollard of Nehawka, where he is manager of the Nehawka Farmers Oil company, was a business visitor in Union on Tuesday afternoon and also was viewing the pouring of the concrete on the paving.

Rev. Beebe, pastor of the Methodist church, who with the family were enjoying a vacation of two weeks which was spent in the south, returned home last week, feeling fresh and fine and ready to tackle the work of the church again.

Mr. and Mrs. D. Ray Frans and son, Jimmie, were over to Omaha on last Sunday where they were guests at the home of Mr. and Mrs. Bryon Clow, who gave a picnic dinner on their lawn and at which a large number of Murray people were also in attendance.

Edward Spies and wife and the mother of Mrs. Spies, all of St. Louis and who has been visiting in Sioux City for a time, on their way to Lincoln to visit with relatives before returning to their home, stopped in Union and visited for a day with their cousin, P. F. Rihn and wife.

Eugene Roddy, who is a hustler and a very popular carrier of the U. S. mails on the rural route, and also is Orville Hathaway, they both make an excellent team. Eugene has recently purchased him a new tudor Model A Ford car for use on the mail route and which enables him to make the route in good time and in comfort, and which takes pleasure in doing and bends every effort to please every patron and which he does.

Hears Former Teacher Dead. Word was received on last Tuesday morning telling of the passing of the late Miss Helen Dowell, since married, and that the funeral would be at their former home in Kansas. The reports reaching the people here at that date, Tuesday, were very meager, and we, from what we were able to learn at that time, cannot furnish much in particular. Superintendent of the Union schools, James Marsell and wife, who were attending summer school at Boulder, Colorado, were called from there to attend the funeral. Helen was a sister of Mrs. Marsell. Mr. and Mrs. Marsell have the sympathy of their friends in Union and Murray, as well as at their home in Kansas.

Will Hold Mission Sunday. The appointments have been made for a special service on August 2nd at the Union Baptist church which will be known as Mission Sunday and at which there will be no discourse by the pastor, but the day will be occupied by the reports of the missionary societies and some special addresses, one of which it is hoped will be from the State Superintendent of the Baptist church, the Rev. H. Q. Morton, D.D., who has been invited to make the address by the secretary of the missionary society, Mrs. Charles Garrison. Remember this meeting is to be held on August 2nd, and not the coming Sunday. There will be a basket dinner at the noon hour and everyone bring their basket and enjoy the entire day.

Many Watch the Paving. On last Tuesday afternoon there were many from Union out to see the working of the crew who were paving and indeed they did see a nice team organization work. There were there as well as many others, W. H. Porter and wife, Messrs. and Mesdames W. A. Taylor, Ralph Pearsley, D. B. Porter, Mrs. Vesta Clark and a score of men and boys of the city.

Paul Griffin Doing Nicely. Paul Griffin, son of Mr. and Mrs. W. H. Griffin, who has been in the hospital at Omaha for some time past where he has been receiving treatment for an infection of his throat and which was very serious for a time is so much improved that he was

able to return home last Sunday, the father going over to Omaha to bring him and the mother home, Mrs. Griffin having been at his bedside caring for him.

There are eight lots of pigs used in the experiment. When started on feed, the pigs averaged seventy-seven pounds each. There are thirteen pigs to each lot. All lots have about one acre of sudan grass pasture. One lot receives shelled corn and tankage self-fed, another coarsely ground wheat and tankage self-fed, a third gets finely ground wheat and tankage. The fourth lot receives hand-fed soaked ground wheat and tankage, the fifth, finely ground wheat and tankage, the sixth, whole wheat and tankage free choice, the seventh ground rye and tankage and the eighth corn and ground soybeans, self-fed free choice.

Three Hot Weather Drinks. Miss Florence Atwood of the Agricultural College suggests three hot weather drinks which can be made at home. To make fruit punch, she combines equal parts of grated pineapple, lemon juice, orange juice and grape juice, then adds twice the amount of tea. She makes a sugar syrup adding some mint leaves while it is cooling, then mixes the fruit juices and the syrup together and strains.

Another suggestion is to take a package of Jello of any flavor, dissolve it in a pint of boiling water, add a pint of cold water, cool it and combine it with fruit juices, ice tea or ginger ale. Ice may be added to chill the drink. Another simple suggestion is to add three tablespoonsful of chocolate syrup to a glass of milk, mix it well, and chill it.

Revises Circular About Chlorate. Extension circular, No. 116, regarding the use of sodium chlorate and atalacide on noxious weeds, has again been revised and brought up to date. It is available for free distribution through all county agents and at the Agricultural College at Lincoln. About four out of five of the inquiries regarding weeds coming to the present time deal with the use of chemicals.

In a preliminary statement at the start of the circular, P. H. Stewart and D. L. Gross state that the Agricultural College will continue its policy of picking up all the experience possible from farmers and Extension Agents in the state. The use of chemicals is comparatively new and every farmer's experience is worth something in determining the best methods to be used in applying the chemical to the weeds. In the latter part of the new circular, Stewart and Gross discuss the eradication of weeds by cultivation. They say it has been possible to completely rid fields of weeds by continuous and thorough cultivation for two summers. The weeds were not allowed to get more than an inch or two high between cultivations, and it was sometimes necessary to cultivate every four days. The men who have used this system have used the duck foot shovel cultivator. The method is particularly advisable when the bindweeds, thistle, or other weeds have spread over a large area.

Prevent Pullets "Going Light." While there is no known remedy or management practice which will prevent or cure pullets "going light" during the summer, several poultrymen have been able to cut down the serious loss due to this trouble by the following feeding method: They give the young pullets all the mash they will eat until about the middle of the morning then no feed at all until toward evening, when they supply the flock with all the scrap grain they will eat. Plenty of clean, range, shade, and clean fresh water will, of

course, help to maintain the vigor of the flock and to prevent the seriousness of the trouble. "Going light" and losing weight is probably caused by coccidiosis. Poultry house and yard sanitation is the only sure way to combat the trouble. It is particularly prevalent around houses and on ground where young chickens have been raised continuously for a number of years. Pullets that have the disease cannot be cured, so it is advisable to dispose of them by very deep burying or burning. No one is justified in spending money or time trying to bring them back to normal weight. A good test of a poultryman's ability to grow strong healthy pullets.

Mothers' Vacation Camp. Miss Ella Gardner, a recreation specialist from the Children's Bureau in Washington, and Mrs. Clara Woodall, a food demonstrator of Ames, Iowa, are two of the attractions of the mothers' vacation camp program at Camp Brewster on August 11-14.

Miss Gardner will teach the mothers to play again, and with some new games as well as the old ones. She will give a demonstration regarding posture showing the mothers how to stand, sit, and work without tiring their bodies more than necessary. She also is to have charge of the Thursday evening pageant at the camp. All of the women will take part in it.

Mrs. Woodall has two topics on the program. She calls her first topic, "Smiling Thru Household Tasks" and the second, "Kitchen Savings." In the first she talks about foods and food preparation after she has prepared the meal. In the second she takes up handy equipment and good management.

The home extension agents will show how to make flower baskets during the handcraft periods. Each mother will complete a basket to take home.

Round table discussions on topics of interest to the women are other features of the four day program. Four dollars and seventy-five cents (\$4.75) takes care of all expenses the four days. All applications must be in the Farm Bureau office by Thursday, August 6th.

Comments. The condition of corn is good throughout the state. There was never a time that corn was of a more uniform size from east to west than this year. The acreage is the largest on record, being revised upward by the Washington office approximately one half million to conform with the Federal Census. The reserve supply of subsoil moisture is not so good over most of the state, so weather conditions from now on will have to be favorable if the crop maintains its present high condition.

Wheat is even better than last year in most of the eastern two-thirds of the state. The crop is poor in southwestern Nebraska and unusually poor in the Panhandle counties. In the latter area, part of the wheat is not worth harvesting. Considerable of the wheat has already been plowed under. Farmers have cut some for hay and expect to plow under considerable more of the poor wheat. Oats and barley were injured badly throughout the state by dry weather and the heat wave. Spring wheat fared better, but was also injured. Rye has done poorly this year. Potatoes were injured in southern and eastern Nebraska by the high temperatures. The crop is promising in the western commercial districts. The acreage is nearly 25% larger. Alfalfa is poor. The first crop was short and the second crop was short due to being frozen down by the low temperatures late in May and dry weather since then in the sandhills. It appears that the hay crop will be very short in Nebraska this year. Sugar beets are not promising. The stand is not good due to the shortness of the planting time. Beets vary considerably in size due to difference in time of planting. The acreage has been reduced considerably. Beans are in good condition in western Nebraska and the acreage is much larger. Flax is very poor and the acreage was reduced heavily. Apples are about a half crop. The condition of Millet and Sorghum feed crops is good.

able to return home last Sunday, the father going over to Omaha to bring him and the mother home, Mrs. Griffin having been at his bedside caring for him.

Will Play Sunday.  
On Sunday July 26th the Union ball team will play the South Side Merchants, at the Union ball park and a very fine game is expected. Better keep your eye on this date so as not to miss this event.

Visited at Plattsmouth.  
Mr. and Mrs. W. H. Marks were over to Plattsmouth early this week where they were visiting at the home of Mrs. Dora Marks of that place and where they went to meet Mrs. Nellie Stucks and daughter and husband who were visiting there from their old home in Ohio. It was a pleasure to Mr. and Mrs. Marks to get to visit with their old time neighbors when they were young.

Old Settlers Will Hold Picnic.  
At a meeting of the board of directors and the officers of the Old Settlers association on last Saturday night, it was determined to hold a two days picnic as usual the date selected being August 21-22, on Friday and Saturday, and which makes the line unbroken during the 44 years. People always enjoy this occasion and will this time as it affords an opportunity for people to come back to the old home and see the friends of other days. Come, let us all help and make this a great success.

SECURES BUILDING CONTRACT  
The award of the contract for the new addition to the Louisville high school, was let on Tuesday by the board of education of that city with Everett S. Dods, of Omaha, architect, assisting. The contract for the two room addition to the building was awarded to Henry F. Brand, of Louisville for the sum of \$9,047. The work will be started at once and be completed in time for the school use this fall. This addition will care for the additional scholars at this time and it is hoped to have by that time sufficient funds to make further addition to the building, the new addition being so arranged that it can be added to as desired.

SERVANT \$100,000  
Washington, July 21.—Cutting off her reputed granddaughter, Mrs. Beatrice Henderson Whole, whom she adopted as her daughter five years ago, without a penny, and leaving \$100,000 to Jesse S. Shima, her Japanese servant, the will of Mrs. John B. Henderson, wealthy Washington social dictator, was filed for probate in district supreme court Tuesday.

The will was executed last April, shortly after Mrs. Henderson and her adopted daughter engaged in a legal controversy over disposition of real estate.

IN CALIFORNIA HOSPITAL  
Mr. and Mrs. E. J. Ferrie of near Mynard have received word from their son, J. A. W. Ferrie, at San Diego, California, that his wife was in one of the hospitals at that place, being taken there as the result of a very serious case of blood weakness and which had made necessary the giving of one blood transfusion and it is expected that it will be necessary to have one or two more given in the hope of giving the patient added strength. The condition of the patient is quite serious and the outcome of the case has caused much apprehension to the attending physicians.

ENTERTAINS BALL TEAM  
From Tuesday's Daily—  
Last evening a party of some fifty of the residents of Murray gathered in the vicinity of King Hill to enjoy a picnic supper and which was given in honor of the Murray Red Sox. The event was an expression of appreciation on the part of the Murray people for the fine work that the team has shown on the diamond for the past season. There was a large array of the good things to eat and the occasion was one that all enjoyed to the utmost in the delightful surroundings of the woodland.

COZY BARBER SHOP  
The Cozy barber shop will be open for the benefit of the patrons on Wednesday evenings during the summer season. Best of service and at reasonable prices, haircut, 40c; shave, 20c; shampoo, 35c; massage, 35c.

ARNOLD LILLIE, Proprietor.

## Cass County Farm Bureau Notes

Copy furnished from Office of County Agent Waincott

Rooter's Day.  
Cass county farmers attending the annual Rooter's Day at the College of Agriculture in Lincoln during the forepart of October are going to hear the results of a study being made to determine the relative value of corn, wheat and rye as hog feeds.

Word received from Prof. Wm. Loeffel of the College states that the test has been started.

Not only will the test determine the relative feeding value of the different grains but it will also find the value of grinding the different grains for hogs. Cost of grinding and degree of fineness most practical for Cass county farmers will also be determined in the test.

Soybeans are also being compared with tankage as a protein supplement in the test. Since eastern packers are discriminating against soybean-fed hogs, claiming that the carcasses produce a soft pork, the experiment will bring out the facts. Carcasses studies will be made in all phases of the experiment.

There are eight lots of pigs used in the experiment. When started on feed, the pigs averaged seventy-seven pounds each. There are thirteen pigs to each lot. All lots have about one acre of sudan grass pasture. One lot receives shelled corn and tankage self-fed, another coarsely ground wheat and tankage self-fed, a third gets finely ground wheat and tankage. The fourth lot receives hand-fed soaked ground wheat and tankage, the fifth, finely ground wheat and tankage, the sixth, whole wheat and tankage free choice, the seventh ground rye and tankage and the eighth corn and ground soybeans, self-fed free choice.

Three Hot Weather Drinks.  
Miss Florence Atwood of the Agricultural College suggests three hot weather drinks which can be made at home. To make fruit punch, she combines equal parts of grated pineapple, lemon juice, orange juice and grape juice, then adds twice the amount of tea. She makes a sugar syrup adding some mint leaves while it is cooling, then mixes the fruit juices and the syrup together and strains.

Another suggestion is to take a package of Jello of any flavor, dissolve it in a pint of boiling water, add a pint of cold water, cool it and combine it with fruit juices, ice tea or ginger ale. Ice may be added to chill the drink. Another simple suggestion is to add three tablespoonsful of chocolate syrup to a glass of milk, mix it well, and chill it.

We'll See You At Camp.  
Five more days till camp! Don't that give you a thrill? 4-H club members have all been enthusiastic about attending district camp at Bellevue Institute, July 29 to August 1. Don't delay any longer in getting in your application. They must be at the Farm Bureau office on Monday, Saturday, July 25th.—D. D. Waincott, Cass Co. Extension Agent. Jessie H. Baldwin, Ass't Co. Extension Agent.

LITTLE STITCHERS 4-H CLUB  
A group of girls met at the home of Mrs. Mary Schneider, Tuesday, July 14th. We opened our meeting with our opening song "4-H Will Shine Tonight." All the members were present but two, Helen Albert and Ruth Miller.

Ellen Kaffenberger gave a very good demonstration on various kinds of princess slips. Maryann Swanda gave a demonstration on feather stitch, shell stitch and putting on bias tape.

We were very much surprised at having Miss Baldwin as her visitor. She gave us several very good points and told us where our mistakes were. She also demonstrated many kinds of bindings.

There are six of us going to Bellevue for a four-day outing, Ellen and Bernice Kaffenberger, Maryann Swanda, Joyce Gauer, Lucille Stivers and our leader, Mrs. Mary Schneider.

Our next meeting will be July 28th at the home of Mrs. Mary Schneider.

<b>CHRISTIAN SCIENCE</b> The subject of the Lesson-Sermon read at all Christian Science churches and societies on Sunday, July 19, was "Life." Biblical citations were read to show that God is Life, and since there is but one God there can be but one Life, which is reflected by spiritual creation. The selections read show that God is not in matter, and that man's existence is dependent on God and not on any material thing. One citation read from "Science and Health with Key to Scriptures" by Mary Baker Eddy (p. 288) is as follows: "The chief stones in the temple of Christian Science are to be found in the following postulates: that Life is God, good, and not evil; that Soul is sinless, not to be found in the body; that Spirit is not and cannot be materialized; that	<b>LIFE IS NOT SUBJECT TO DEATH</b> ; that the spiritual real man has no "birth, no material life, and no death." One selection read from the Bible is in part as follows: "He that hath the Son hath life; and he that hath not the Son of God hath not life." <b>MISS BLY OPERATED ON</b> Miss Alice Bly, one of the members of the teaching force of the Plattsmouth city schools, who is spending her vacation at the home at Beaver City, was taken ill several days ago with what was decided was appendicitis and she was hurried to the hospital at Oxford where she was operated on at once. The patient came through the ordeal nicely and is showing a very pleasing rate of progress, the latest reports from Oxford state.	<b>PUSHING PAVING WORK</b> The paving crew that is engaged in the work on highway No. 75 east and south of Union, are now within less than a mile of the end of the present pavement east of Union, and from reports they are planning on the connecting of the new strip with the old pavement this week. Operations were started at the Fey corner working north for a distance of about four miles across the Weeping Water bottoms. When this stretch of the highway is completed, work will begin at the fill for the overhead crossing of the Missouri Pacific tracks at the Mullis corner. It is expected the work on the overhead will start soon and that material will be placed on the ground within a short time. <b>Journal Want Ads get results.</b>
