REDUCE PNEUMONIA DEATHS

Omaha—How the mortality rate from pneumonia is being reduced thru the use of high frequency electrical heat current was explained to 125 physicians from all parts of the United States by Dr. J. Zvery Hibben, Pasadena, Calif., at the opening session of the tenth annual convention of the American Congress of Physical Therapy.

The treatment, Dr. Hibben said, is used as an adjunct to other forms of treatment, and does not interfere with these other methods. Other lectures dealt with infantile paralysis and with the operation of all types of physical therapy machines. Monday night the formal convention opening was held with Dr. H. F. Buerhardt, St. Louis, being installed as president of the congress. He succeeds Dr. Roy W. Fouts, Omaha. A banquet preceded the installation. Mayor Metcalfe and his son, Lieutenant Governor Metcalfe, welcomed the convention. D. M. F. Behnaman, chief of the department of physical therapy at the University of California, spoke on the "Physician's Obligations."

HAPPY DAY FOR HERNDONS

New York—Even the family dog caught the spirit in the Hugh Herndon home here. He yipped and yapped with all the force of his canine fangs. One hardly would have thought a simple four-word sentence, "They made it safely," could cause such a commotion. Hugh's mother sat down on a sofa and lost her composure. Down at his brokerage office brother John couldn't concentrate on his figures. Brother Billy's school mates at Taft, Waterloo, declared a general strike on study.

Hugh's mother, Mrs. Dixon Boardman, suddenly reached for a telephone. "Hello, sweetheart," she said over long distance to Wenatchee. "It's mother," said Mrs. Boardman. Then, receiver to ear, she beamed at the family. "He sounds happy and hungry as he always does," she said.

She had been sleepless for a good many hours, but she didn't care. She told Hugh to be sure to bring a piece of the broken propeller with him when he comes home next week.

At Pangborn-Herndon flight headquarters things were all in an uproar, too. In a corner, a quiet youth stood for a long time sort of lost in the shuffle. "May I add my congratulations?" he asked. It was Wiley Post on the ground, around the world in record time.

BLAMES TOO MUCH LAW

Chicago—Thomas F. Wickham, director of the board of trade, in a statement charged that governmental interference had brought about the present depression in a "land of plenty." As "panic laws" he listed the grain futures act; Volstead act; Grundy tariff and farm marketing act. He added: "No one can live permanently beyond his income. The cost of government everywhere, from the school district to Washington has finally exceeded the ability of the people to pay for it."

"We can quit eating, close our schools, junk our cars, railroads, banks and factories and keep on with our commissions and bureaus and multitude of governing bodies, or we can put the government back to the proper sphere of government, where we say what it does and what it spends instead of it telling us what we do and what we need, and go ahead with our normal activities. We simply can't go on keeping up both."
