When a boy of eleven years, his parents, Mr. and Mrs. George Henry Falter, migrated to the United States, the family coming direct to Cass county, Nebraska, where many of the relatives and old friends had settled. With the parents settling on a farm northwest of Plattsmouth Mr. Falter resumed his school work as well as assisting on the farm. On March 19, 1885, he was married at Plattsmouth to Miss Mary Lutz, they moving to the farm where they remained until moving into Plattsmouth some thirty-three years ago. While a resident of Eight Mile Grove precinct Mr. Falter was very active in the democratic political circles and in 1897 was nominated and elected as county commissioner from the first district, being elected to the office for three terms. He was one of the organizers of the Farmers Mutual Insurance Co. in 1892, being named as the secretary of the company and has held the office continuously since that time. Mr. Falter was one of the best known democratic leaders of the county and served several years as the chairman of the county committee and was active in the support of the candidates of his party in national, state and local elections. Mr. Falter is survived by the widow, Mrs. Mary Falter, two sons and two daughters, George H. and John W. From Tuesday's Daily—The meeting of the Plattsmouth Woman's Club last evening at the public library auditorium, was one in which the members of the retail section of the Chamber of Commerce, as well as the community at large, was invited to be in attendance, a very pleasing number availing themselves of the privilege. The business session of the club was presided over by Mrs. J. T. Begley, the president, the ladies taking up routine matters that demanded their attention. Miss Marie Kaufmann gave a short talk on the art exhibit that it now being shown at the high school, as well as the program that is to be given on Thursday evening. The meeting was then turned over to the civics committee who have been conducting a campaign on "Home Building and Trade," the chairman of the committee introducing some interesting facts as to support of home institutions, pointing out that some \$800,000 is paid in salaries in this city in a year, that loyal support of local institutions would make possible the greater expansion of this sum. Miss Cora Williams gave three charming vocal numbers that were very much appreciated. The accompaniment was played by Mrs. Robert Reed. C. C. Wescott, of the retail section of the Chamber of Commerce, was asked to introduce the speaker of the evening, presenting Cliff Crooks, "gadabout" man of the Nebraska Farmer. Mr. Crooks had as his subject, "Your Community," giving a fine address on the value of the small communities in the national and state life, that around the small towns are woven the best of American life. The speaker impressed the fact that unless support of home institutions is given to their communities that they must fall and fail, that the small store keeper, the local merchant and professional men were those on whom largely the burden of the maintaining of local institutions must fall. Speaking of the commercial value of the small town, the speaker pointed out that a larger part of the trade of the states, and particularly Nebraska, was in the small towns. That the ladies could aid in community upbuilding so that stores could expand, employment benefit, and the whole community be benefited, was pointed out in the fact that eighty-five per cent of the buying is carried on by the women of the nation. Cards urging community unity and support were then distributed to be used as a part of the splendid program that the local ladies have planned for the coming year, stimulating the "Trade at Home" idea.

The offense occurred several weeks ago, Mr. Sharp having departed for Omaha on Saturday night, October 3rd, taking his wife to Omaha and then starting back to this city where he claimed he was to go hunting on Sunday with some friends. The man failed to show up for the hunting trip, but his leaving the community was not discovered until on Monday, October 5th, when the time for the store to open for business arrived, but no manager, and it was necessary to force the way into the store in order to get ready for the day's business. Iowa-Nebraska Company Lowers Electric Rate

Reduction in Commercial and Residential Rates Announced—Effective All Over Territory

The Iowa-Nebraska Light and Power Company announces a reduction in Commercial and Residential Lighting rates. This reduction is general throughout the property. According to the company this change in schedule will save their customers in excess of one hundred thousand dollars per year. Mr. F. I. Rea, District Manager in making this announcement stated that "effective December 1st, there will be a reduction of one half cent per kilowatt hour on the first block of the lighting rates. This will reduce the first block in Plattsmouth from 7.5 to 7 cents per kilowatt hour. "From our own standpoint, conditions do not justify rate reductions at this time, and while these reductions were prompted by a genuine desire to be of definite help to our customers during this period of depression, our decision certainly did not lack a selfish motive. Lower cost for electric service means that more people can use it profitably. That will result in a greater load—a greater distribution of our product—which again will justify further rate reductions. We are confident that the future will justify our temporary sacrifice. "The Company has consistently reduced rates during the last seven years. These reductions were due to the increased use of current and the resulting reduced cost of overhead expense because of volume of sales. Under present conditions, the normal increased use has not continued, but for the purpose of doing its share in lowering living costs at this time, the Management has authorized this cut in rates. The amount of saving to each customer will vary in proportion to the current consumption, but over the period of a year will be substantial. As general conditions improve and the use of electricity again shows a normal increase, we expect to continue our policy of consistent rate reductions as in the past. "A comparison of the average rates paid by lighting customers in Plattsmouth seven years ago and today shows that in 1924 the average rate per kilowatt hour for lighting was 11.7 cents while in 1930, the amount was but 7.3 cents. The new rate will still further reduce this average. "The reduction of one half cent per kilowatt hour will also apply to the standard rural service rate. This reduction will, no doubt, be helpful to the farmer and assist him in meeting some of his present problems."

Railroads are Denied Increase in Freight Rates

Suggestions Made for Increases on Specific Lines Made by Interstate Commission

Washington, D. C., Oct. 20.—The interstate commerce commission today denied the railroads permission to increase freight rates throughout the country. Suggestions were made, however, for specific increases in rates upon designated commodities during a limited period. The commission was conditioned upon the submission and approval of arrangements between the carriers for pooling of revenue accruing from the suggested increases. This action, said the commission, is "primarily to enable them to meet their fixed interest payments as they mature."

\$3 to \$6 Per Car. The commission recommended a charge of \$3 a car be fixed on some commodities, \$6 a car on others and 1 and 2 cents for hundred pounds on various other products. The commodities that would be increased \$3 a car if the railroads agree to a pooling arrangement, are anthracite and bituminous coal, coke, iron ore, copper ore and concentrates, lead ore and concentrates, zinc ore and concentrates, ores and concentrates not otherwise specified, commercial gravel and sand, stone broken, ground or crushed; all other products of mines, posts, poles and piling, pulp wood, lumber shingles and laths, box, crates and cooperage materials, veneer and built up wood, forest products not otherwise specified except excelsior and sawdust and furnace slag.

For Limited Period. The suggested specific raises would be for a limited period and would be primarily to enable the roads "to meet their fixed interest payments as they mature." The commission attached to the list of products suggested for increases a condition that in no event should the increase levied on any carload be in excess of 10 per cent of the carload charges which would be assessed in the absence of the increase. Iron Included. Commodities to which an extra charge of \$6 a car might be applied were listed by the commission as follows: Crude phosphate rock, sulphur, pig iron, scrap iron and scrap steel, stone not otherwise specified, both rough and finished; crude petroleum, asphalt and artificial stone not otherwise specified. Commodities on which an increase of 1 cent per hundred pounds was suggested include: Cottonseed meal and cake, oranges and grapefruit, lemons, limes and citrus fruits not otherwise specified, melons of all kinds, cabbage, onions, tomatoes, and all fresh vegetables, dried fruits, dried vegetables, vegetable oil, cake and meal except cottonseed, peanuts, and all other products of agriculture not otherwise specified, rosin and turpentine, gasoline, and refined oils, of all types, cement, both natural and Portland, brick, and building tile, lime, ice, and fertilizers not otherwise specified.

GRAINS EXEMPT

The suggested plan of the commission provides for exemption from any increase of wheat, corn, oats, barley and rye, rice, grains not otherwise specified, flour and meal of all kinds, hay, straw, and alfalfa, cotton linters, bales, cotton linters, oils and rosins, cottonseed, fresh apples, fresh berries, fresh grapes, fresh peaches, potatoes other than sweet, dried peas and beans, flaxseed, sugar beets, live stock of all kinds, logs, wood for fuel, railroad ties and wood excelsior and sawdust.—World-Herald.
