Soft

Near 1000 Miles Dry Soft—Still Soft!

Why Shell Horsehide
(Though Soft As Buckskin)
Outwears All Other Leathers!

IF YOU want to get longer wear and greater comfort out of work shoes, we recommend that your next pair be Wolverine Work Shoes—made of Shell Cordovan Horsehide. This leather outwears all others because it includes an inner shell found only on the horse's hips (about one-sixth of the hide). First you wear out the leather—then you wear out the shell. No wonder many say Wolverines wear two or three years!

And that's not all. Shell Horsehide as tanned by Wolverine dries soft under all weather conditions; remains scuffproof; has fifty percent greater resistance against acids; and is almost impossible to rip and tear.

We predict that after wearing one pair of Wolverine Horsehide, you'll never be satisfied with anything less in wear and comfort.
