But much of the legislation of the near past has had a tendency to impoverish the people instead of promoting prosperity. The address was received with much manifestations of satisfaction.

THE CENSOR'S FINDINGS

I'd been writing for the magazines for so long a time, and dressing up my stories in "a little bit of rhyme"; They were "tales of human interest" clad in soul-inspiring dress. But the "slips" that were returned to me were a source of sore distress.

The rejections, I was kindly told, in words of fulsome tact. Must not be understood to mean any merit the stories lacked; But congestion of manuscripts in hand, and a paucity of space. Precluded need for more supply till they could get a place.

In glowing terms they'd thank me for the pleasure of looking through The articles submitted and presented to their view; While suggesting in complaisant words "some other house I try To find a scope available where my talents might apply."

Opportunity came—sold one or two—for some there was no use—"Not quite up to the standard of the matter we produce; The technique, tempo, touch, are good—as is also much of the rhyme— And some of it we find is just a step from the sublime."

So, no matter how long we may wait, with patience in our heart, At last we'll find an editor who interprets latent art; And a kindred soul in sympathy, who'll put you on the back To compliment you with the taste and judgment some folks lack—"K"

No better town in which to reside than Plattsmouth.

•• A DOLLAR AND A HALF WORTH OF OIL PROTECTED THIS MOTOR FOR OVER FOUR THOUSAND MILES!

Here is the winner!—the car that covered 4,729 miles at fifty miles an hour. Lubricated with New and Improved Conoco Germ Processed Motor Oil.

AAA SANCTION NO. 3001

Low Consumption and Motor Protection proved in the most daring and convincing Motor Oil Test ever made . . .

WHEN New and Improved Conoco Germ Processed Motor Oil was perfected, it had lubrication values so great that a mere statement of them would seem absurd. Could you believe that any strictly stock motor could run 4,729 miles on just five quarts of oil before wrecking itself? It did—and Conoco proved it in competition with five widely known, nationally advertised, quality brands of motor oil!

The competition was held at the Indianapolis Motor Speedway, under the supervision of the Contest Board, American

Automobile Association. Six new, strictly stock cars, were used—a different oil of the same S. A. E. grade in each.

After the cars were broken in for 2,500 miles, they were drained, examined and a fresh fill of five quarts put in each crankcase. No more oil was added. Then the cranks were sealed by an AAA official. The real test began. It was ordered that they be driven at an average of 500 miles a day at 50 miles an hour until their motors failed to operate. Oil No. 4 was first to fail at 1,713.2 miles. Oil No. 6 failed at 1,764.4 miles. Oil No. 5 ruined its motor at 1,815.9 miles; three of them were out of the running. The next day Oil No. 1 failed to lubricate and, its motor wrecked, stopped at 2,266.8 miles.

Two cars—two oils—still left in the test. Oil No. 3, after a remarkable run of 3,318.8 miles, came to a shuddering stop,

and the last competitor of New and Improved Conoco Germ Processed Oil, was out. The lone car, with this tremendously vital oil, labeled No. 2, went on and on. On the tenth day, at an almost unbelievable total of 4,729 miles, it failed—an all-timerecord mileage on a total of five quarts!

The "Hidden Quart" of new oily penetrativeness won—the greater film strength and higher resistance to the effects of dilution—the absence of carbon and sludge—all aided in this great achievement. It firmly supported Conoco's patented principle of added oiliness—it proved every claim. Conoco alone can make oil this way. It is covered by recent United States patents.

You can have this oil in your car, for it costs no more than other quality oils. Drive into a Conoco Station or dealer, marked by the Red Triangle. Fill and know the satisfaction, the freedom from repairs, the economy of low consumption that only Conoco gives.

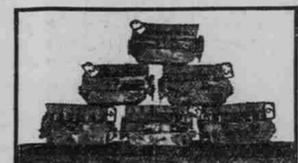

Five quarts of each brand of oil were carefully put in the cars by AAA officials.

Here are the Representatives of the Contest Board of the American Automobile Association who supervised every detail of the test and attested to the records made.

The official sealing of cranks after fill of five quarts was put in. No addition of oil was permitted in this "destruction" test.

These were new motors before the test. They were wrecked to prove to you how to protect yours.

Warning to new car owners . . .

Some car manufacturers are using new types of bearings which will stand greater pressures and temperatures, resulting from increased power and speed. New and Improved Conoco Germ Processed Motor Oil has been exhaustively tested on these new bearings. The results show that it gives them greater protection against damage than any straight mineral oil now on the market. Protect your new car by using the motor oil you can be sure of.
