HOT AND DRY CONTINUES

With the mid-west suffering from the greatest drought of the past thirty-five years, the temperature Tuesday rose to 105 in the shade and today at noon the mercury was at 96 with promise of equaling if not passing the mark of yesterday.

The weather has little to offer in the way of rain to relieve the serious situation. Last night clouds massing in the east and with lightning promised relief but failed to reach this section altho local showers were reported east of here in Iowa.

The hot weather added to the dryness has given a serious problem to the farmers in the way of pastures or feed for their stock and with many the water supply for stock is a most serious one.
